Inequality and Labor Market Institutions 2015-07-10

the sdn examines the role of labor market institutions in the rise of income inequality in advanced economies alongside other determinants the evidence strongly indicates that de unionization is associated with rising top earners income shares and less redistribution while eroding minimum wages are related to increases in overall income inequality the results however also suggest that a lack of representativeness of unions may be associated with higher inequality these findings do not necessarily constitute a blanket recommendation for higher unionization and minimum wages as country specific circumstances and potential trade offs with other policy objectives need to be considered addressing inequality also requires a multipronged approach which should include taxation reform and curbing excesses associated with financial deregulation

the federal reserve system which has been congress s agent for the control of money since 1913 has a mixed reputation its errors have been huge it was the principal cause of the great depression of the 1930s and the inflation of the 1970s and participated in the massive bailouts of financial institutions at taxpayers expense during the recent great recession this book is a study of the causes of the fed s errors with lessons for an improved monetary authority beginning with an examination of the history of central banks in which it is found that their performance depended on their incentives as is to be expected of economic agents an implication of these findings is that the fed s failings must be traced to its institutional independence particularly of the public welfare consequently its policies have been dictated by special interests financial institutions who desire public support without meaningful regulation as well as presidents and those portions of congress desiring growing government financed by inflation monetary stability which used to be thought the primary purpose of central banks requires responsibility meaning punishment for failure instead of a remote and irresponsible to the public agency such as the fed it requires either private money motivated by profit or congress disciplined by the electoral system as before 1913 change involving the least disturbance to the system suggests the latter
