

Free download Forensic aspects of dissociative identity disorder the forensic psychotherapy monograph series (Read Only)

in this the sixth volume in the highly successful monograph series produced under the auspices of the european federation for psychoanalytic psychotherapy in the public health services efpp the clear distinctions which once existed between psychoanalysis proper and the psychoanalytic psychotherapies are strongly debated and reassessed in the light of contemporary paradigm shifts in treatment modalities volume 7 in the efpp series that aims to promote the pan european community of psychoanalytic psychotherapists the contributors come from different cultures but are united in their view of the importance of empirical research in psychotherapy the chapters examine issues as varied as treatment of eating disorders the differences between psychoanalysis and psychotherapy treatment outcomes of group psychotherapy and treatment of borderline personality disorders in the present day culture of evidence based practice as a guiding principle for the delivery of public and private sector health services the critical importance of collating empirical research findings relating to psychoanalytic psychotherapy cannot be overstated evidence based clinical guidelines are increasingly finding their way into the mental health arena and as of yet the place of psychoanalytic psychotherapy within such guidelines is far from extensive the present monograph brings together a number of research reports and overviews all of which have used conventional empirical research methodologies and illustrate we believe the potential of such methods to explore questions of real significance to psychoanalytic psychotherapists throughout europe the seventeen contributions begin with a discussion of how psychotherapy works and go on to discuss topics such as prediction of outcome transference and countertransference termination new developments in group therapy acidic paper annotation copyright book news inc portland or this brief from the american family therapy academy afta is a collection of chapters from the afta monograph series the chapters specifically address responses to a wide range of contextual phenomena from a relational family therapy perspective chapters are grounded in family systems concepts and informed by postmodern perspectives including social justice the collection provides cutting edge thinking and practices for a variety of experiences that strongly impact individuals and families authors address the treatment of couples and families oppressed by socio contextual phenomena such as war and poverty and of those marginalized by the insidious impact of dominant discourse on relationships and on the therapeutic context for example sexual gender identity and sexual practices established practitioners and scholars with particular expertise in the areas addressed bring exceptional transparency and knowledge to the descriptions of their work researchers clinicians educators and students of family and couples therapy will find this volume very useful this second volume in the monograph series of fielding graduate university features six articles on the cultural ramifications of the psychotherapy relationship based on recent dissertations by fielding graduates edited by sherry l hatcher faculty chair in the clinical psychology program at fielding graduate university the monograph offers six in depth studies on some of the unique socio cultural aspects of the therapy relationship jessie whitehorse lopez s article co authored by robert hatcher tells us about native american psychotherapy clients how they evaluate standard measures of alliance and which criteria they propose to add in order to foster trust in the therapy relationship interestingly dr lopez did not initially gain cooperation from native american research participants until he happened to show them that he knew how to make tobacco pouches something his grandfather had taught him that anecdote recounted in the paper also speaks to the analogous importance of an effective research relationship christine mok lamme s article serves to remind us to avoid stereotyping the article illustrates common expectations about what chinese american psychotherapy clients want from their therapy in terms of either cognitive or emotion based interventions dr mok lamme urges us to look at individual differences within cultures so as to formulate an appropriate psychotherapy treatment for each patient arielle schwartz takes us into new age culture by asking what psychologists think about embedding mind body methods in their work such as the use of relaxation techniques mindfulness practices and more she discovered interesting discrepancies between the mind body techniques that psychologists value personally and those that they are disinclined to incorporate into their professional work shanna jackson studied parallel cultures of abuse and what happens when therapists who have themselves suffered abuse and trauma treat clients with a similar history the potential for vicarious traumatization suggests that methods that typically promote therapist empathy may instead have the potential to

unwittingly retraumatize some therapists chaya rubin and comfort shields explore the culture of therapists judgments based on archival data from a study published by the editor of this issue they investigate the question of whether the perceived culpability or vulnerability of a psychotherapy client may affect a therapist's ability to empathize with that client michelle horowitz introduces the reader to an exponentially expanding culture of social media and in particular how the delivery of electronically mediated psychotherapy may positively and or negatively impact the therapeutic relationship she further addresses ethical issues including the need for maximizing therapist competency in arranging for confidential delivery of therapy services via technologies such as skype this book will stimulate readers to cross borders between theory and practice between research and everyday therapy between out patient and in patient psychotherapy between the view of ones own the known and the culturally foreign yet it is only with an awareness of these borders an acknowledgement and respect of them that it will be possible to proceed towards integrating differences where this makes sense and appears necessary this book provides a complete and fundamental overview from a psychoanalytical point of view on theoretical and clinical aspects of psychodynamic or psychoanalytic psychotherapy it includes the theory of the human mind psychic development psychic conflicts trauma and dreams a collection of clinical essays by seven senior members of the british association of psychotherapists each essay provides a true case study of the painful states a person can break down into and the associated torments and dramas they go through with their therapist in finding new ways of feeling and doing monograph series on schizophrenia no 3 psychoanalytic psychotherapy as a practice is the antithesis of a prison regime prisons are hard psychotherapy is porous permeable echoed throughout this book is the obvious paradox that is being worked when practicing psychotherapy in prison the two are worlds apart yet each can creatively serve the other with chapters written by psychoanalytic psychotherapists from across europe and from different analytic traditions this book shows the common thread that weaves through these different traditions and the serious challenges facing psychotherapists dealing with the future adult generations of europe provided by publisher monograph series on schizophrenia no 3 the majority of the papers grew out of the proceedings of the fourth efpp congress of the adults section in 2000 and explore the therapist patient relationship with the emphasis on the influence of the therapist as opposed to that of the patient topics discussed in this collection include the impact of the patient on the analyst how the analyst's clinical theory and personal philosophy affect the analytic process the effect of the therapist's dreams on the therapeutic process the psychoanalyst's influence on the collaborative process and intersubjective phenomena and emotional exchange in the psychoanalytic process certain papers focus mainly on theory while others are more clinically oriented this volume presents an overview of historic and current thinking and aims to generate yet more discussion on this evolving and important issue it will be of interest to practicing and training psychotherapists contributors dimitris anastasopoulos christos ioannidis judy kantrowitz joachim kuchenhoff gila ofer evangelos papanicolaou maria ponsi claude smadja imre szecsod gisela zelle part of the efpp monograph series third volume in the efpp monograph series this volume deals with life and work at the interface between psychoanalytic theory and institutional reality with contributions from writers across europe it provides a fascinating cross fertilisation of ideas with chapters written by psychoanalytic psychotherapists from across europe and from different analytic traditions this book shows the common thread that weaves through these different traditions and the serious challenges facing psychotherapists dealing with the future adult generations of europe this book draws together work from across europe by leading clinical researchers who have been looking into the effectiveness of psychoanalytic interventions they are mostly time limited brief non intensive ways of working so are applicable in many settings and can therefore be generalised to other clinical teams the populations worked with are diverse and often present mainstream services with refractory clinical problems so an applied psychoanalytic approach is well worth trying given the evidence presented in this volume there is in addition an excellent theoretical chapter on the issues of such clinical research from stephen shirk which merits consideration by those wishing to evaluate their own work this book is an important contribution to services for child and adolescent mental health with increasing family distress and concerns about inadequate parenting family breakdown and troublesome adolescents it will help to ensure the full menu of interventions is retained in these times of financial restraint dimitris anastasopoulos and evangelos papanicolaou have gathered together a distinguished group of contributors to focus on the therapist's participation in therapy and the influence of personal factors on the therapeutic relationship the majority of the papers grew out of the proceedings of the fourth efpp congress of the adults section in 2000 and explore the therapist patient relationship with the emphasis on the influence of the therapist as opposed to that of the patient topics discussed in this collection include the impact of the patient on the analyst how the analyst's clinical theory and personal philosophy affect the analytic process the effect of the

therapist's dreams on the therapeutic process the psychoanalyst's influence on the collaborative process and intersubjective phenomena and emotional exchange in the psychoanalytic process certain papers focus mainly on theory while others are more clinically oriented this volume presents an overview of historic and current thinking and aims to generate yet more discussion on this evolving and important issue it will be of interest to practicing and training psychotherapists this set of papers from members of the british association of psychotherapists demonstrates the vitality of the kleinian tradition in work with adult patients it is a picture of work from outside the inner circle of kleinians in london and it thus indicates how the concepts have fared in their transport into everyday psychotherapy in dialogue with the most famous myth for the origin of different languages the tower of babel a psychoanalytic exploration on sameness and otherness beyond babel provides a series of timely reflections on the themes of sameness and otherness from a contemporary psychoanalytic perspective how are we dealing with communication and its difficulties the confusion of tongues and loss of common ground within a european context today can we move beyond babel confusion and feared loss of shared values and identity are a major part of the daily work of psychoanalytic psychotherapists bringing together an international range psychoanalytic practitioners and researchers the book is divided into six parts and covers an array of resonant topics including language and translation cultural identity families and children the cyber world the psychotherapeutic process and migration whereas the quest for unity which underpins the myth of babel leads to mystification simplification and the exclusion of people or things multilingual communities necessitate mutual understanding through dialogue this book examines those factors that further or threaten communication aiming not to reduce but to gain complexity it suggests that diversification enriches communication and that by relating to others we can create something new as opposed to cultural and linguistic homogeneity babel is not only a metaphor for mangled communication alienation and distraction it is also about the acceptance or rejection of differences between self and other this book will be of great interest to psychoanalytic psychotherapists and researchers from a wide variety of backgrounds this exceptional book adds to the fast growing area of forensic psychotherapy and shows the relevance of winnicott's work to therapy with some of the most deprived in our society contributors brett kahr jennifer johns estela welldon joan raphael leff valerie sinason jeannie milligan donald campbell em farrell peter giovacchini charles socarides murray cox until now no book has ever attempted to compare and contrast contributions on analytic field theory and at the same time to explore its clinical and technical implications this volume is intended for the first time to link together many of these writings and to provide an initial wide ranging survey of the subject for it is our contention that a theory of the field in various of its loci can also be inhabited by different theories a particular aim of this book is to present not only theoretical discussions of field theory but also contributions on clinical work and technique for this reason we have given preference to articles with a substantial clinical component which exemplify specific underlying technical theory in the babel of psychoanalytic languages clinical practice is in our view the most effective way of comparing psychoanalytic models how do you develop a truly rich and rewarding career in psychotherapy how can you find joy in such painful work how do you develop your skills in the field how can you conquer your creative inhibitions in short how do you flourish as a psychotherapist brett kahr answers these questions and so many more in his brilliant new book painting a frank portrait of the life of the psychotherapist taking the reader through the life cycle of the therapist brett offers lots of practical advice from assessing one's suitability for the career to managing one's finances to preparing for death his clear voice and style shine through in this authentic readable narrative professor kahr has produced a must read gripping account of how you can thrive in every respect in this complex and rewarding career how to flourish as a psychotherapist should be required reading for every therapist anyone considering taking up the career and everyone who has ever wondered what kind of person becomes a therapist this is a truly original work that should become compulsory reading by all in the field this collection of papers from psychoanalysts across europe is intended to highlight the similarities and differences between approaches to working with children and adolescents part of the efpp monograph series provided by publisher volume 7 in the efpp series that aims to promote the pan european community of psychoanalytic psychotherapists the contributors come from different cultures but are united in their view of the importance of empirical research in psychotherapy the chapters examine issues as varied as treatment of eating disorders the differences between psychoanalysis and psychotherapy treatment outcomes of group psychotherapy and treatment of borderline personality disorders in the present day culture of evidence based practice as a guiding principle for the delivery of public and private sector health services the critical importance of collating empirical research findings relating to psychoanalytic psychotherapy cannot be overstated evidence based clinical guidelines are increasingly finding their way into the mental health arena and as of yet the place of psychoanalytic

psychotherapy within such guidelines is far from extensive the present monograph brings together a number of research reports and overviews all of which have used conventional empirical research methodologies and illustrate we believe the potential of such methods to explore questions of real significance to psychoanalytic psychotherapists throughout europe from the preface contributors anthony w bateman peter fonagy ines gitzinger ralf grabhorn tilman grande johan grant dorothea huber thorsten jakobsen burkard jager horst kachele wolfram keller guenther klug peter kohler werner kopp peter malewski kingsley norton claudia oberbracht camilla renlund phil richardson gerd rudolf rolf sandell silke schmidt bernhard strauss jorn von wietersheim and fiona warren provided by publisher this coherent and compelling book enriches the developing field of forensic psychotherapy and illustrates how winnicott s thinking continues to inform psychoanalytical work with deprived delinquent and forensic patients brett kahr brings together the work of eminent clinicians who have combined a wide range of thought provoking clinical material with careful theoretical discussion a collection of papers dealing with supervision new horizons in forensic psychotherapy exploring the work of estela v welldon edited by the author contains many rich contributions by some of welldon s most distinguished former students and proteges the book consists of important chapters on the creative ways in which colleagues have utilised and expanded upon welldon s work in the field of forensic psychotherapy in a variety of settings including in hospitals prisons community mental health clinics and also in private practice psychoanalytic psychotherapy as a practice is the antithesis of a prison regime prisons are hard psychotherapy is porous permeable echoed throughout this book is the obvious paradox that is being worked when practicing psychotherapy in prison the two are world s apart yet each can creatively serve the other intellectual disability and psychotherapy the theories practice and influence of valerie sinason charts the transformative impact of the noted psychotherapist s work with children and adults with intellectual disabilities upon both a generation of clinicians and the treatment and services delivered by them examining how contemporary disability therapists have discovered used and adapted such pioneering concepts as the handicapped smile and secondary handicap as a defence against trauma in their clinical work the book includes contributions from renowned practitioners and clinicians from around the world it shines a light on how sinason s work opened doors for working with people who were previously thought of as unreachable intellectual disability and psychotherapy will be an essential resource to anyone working with children or adults with disabilities as well as psychotherapists interested in exploring valerie sinason s work this monograph brings together the presentations from the nineteenth john bowlby memorial conference in 2012 organised by the bowlby centre it explored the growing role of the body in relational psychotherapy over the last decade and to bring us up to date in thinking about the relationship between attachment the body and trauma questions addressed included how do we anchor the new understandings we are gaining within the framework of attachment how might the integration of these ideas about the body change what we do in the consulting room what impact might this have on the therapy relationship can we maintain and respect the place of a secure attuned attachment between therapist and client and its healing potential at the centre of our therapeutic work a psychoanalytic exploration of social trauma presents a thorough introduction to social trauma from a range of perspectives exploring several key themes specific causes and symptoms and clinical interventions with chapters from a diverse range of authors the book considers social trauma as it relates to stories and history group identity the consulting room migration and post traumatic conditions these topics are explored via a range of frames including individual therapy group analysis social dream matrix large groups case studies narrative recollections and cinematographic expression the book also considers the implications of new technology in causing and treating social trauma a psychoanalytic exploration of social trauma will be of great interest to psychoanalytic psychotherapists in practice and in training psychoanalysts and psychoanalytically informed professionals working with trauma from leading researcher and bestselling author john mcLeod this substantially rewritten and restructured third edition is the most accessible and comprehensive how to guide on conducting a successful research project in counselling and psychotherapy taking you step by step through the research process this new edition includes a list of 9 basic principles for doing meaningful and practically useful research chapters on basic research skills developing a research question critically evaluating research studies compiling a research proposal using qualitative and quantitative methods and fulfilling the requirements of ethics committees chapters on 5 main types of research product that can be accomplished by novice researchers qualitative interview studies systematic case studies practice based outcome research autoethnographic inquiry and publishable literature reviews guidance on how to get your work published supported by a companion website offering relevant journal articles sample ethical consent forms links to open access research tools and more this is an indispensable resource for any counselling trainee or practitioner learning about the research process for the first time john mcLeod is emeritus

professor of counselling at the university of abertay dundee this collection of papers from psychoanalysts across europe is intended to highlight the similarities and differences between approaches to working with children and adolescents part of the efpp monograph series we now have access to a much deeper understanding of both the aetiology of aggressive acts and their treatment we need no longer ignore criminals or abuse them instead we can provide compassion and containment the volumes in this series provide both practical advice and theoretical stimulation for introductory students and senior practitioners alike
