Population and Strategies for National Sustainable Development 2020-07-26

the guide serves as a resource for national level policy makers and the staff of conservation organizations who wish to integrate population and environmental conditions in planning for sustainable development it presents the basic rationale for linking population and environmental issues including the demonstrable impact that growth in population and consumption is having on the environment at the same time it acknowledges the difficulty of achieving integration due to long entrenched disciplinary and institutional specialization the guide refrains from making blanket prescriptions but rather emphasizes that policy and planning responses must be attuned to the location specific nature of population environment interactions a number of mechanisms for achieving integration are presented including placement of demographers within national planning organizations or creation of country based networks of population and conservation professionals who meet regularly to share knowledge and experience for those less familiar with previous research the book includes a primer on demographic change and models and frameworks for understanding the links between population dynamics births deaths growth migration and environmental change originally published in 1996

Forging America's future 1976

focuses on the changing roles and challenges of innovation and growth policy and the strategies and measures that are critical in a globalizing world this title provides guidance for innovation policy strategy formulations and design of innovation policy measures

Innovation Imperative 2009-01-01

National Strategies for Health Care Organization 1985

innovation the process by which firms master and get into practice product designs and manufacturing processes that are new to them is vital for companies wishing to remain competitive in today's rapidly changing high technology industries american and japanese firms are among the world's most technologically innovative and competitive however the changing dynamics of global competition are forcing them to rethink their technological innovation strategies the choices they make will have great impact on their futures as companies as well as on the livelihoods of their employees and the communities in which they operate in order to understand the ways in which japanese and american companies are changing their technological innovation strategies and practices the committee on japan of the national research council and the committee on advanced technology and the international environment committee 149 of the japan society for the promotion of science jsps organized a bilateral task force composed of leading representatives from industry and academia to assess developments in corporate innovation strategies and report on their findings through a workshop discussion of the issues and subsequent interaction the task force explored the institutional division of innovation in both countries the structure and performance of technology based industries the role of the government in the support of science and technology and the role of universities in the science and technology system the task force was particularly interested in exploring the points on which the two systems are converging i.e. becoming more similar in strategy and practice and where they continue to be distinct and different although a comprehensive study of these trends in u.s. and japanese innovation was not easily feasible the task force was able to develop several conclusions based on its workshop discussion and follow up interactions that were substantial in time and content this report identifies a set of issues whose further elucidation should be helpful in guiding public policy in both nations these issues include the role of external sourcing of innovation transnational activity and globalization the organization and performance of r & d and the role of consortia joint ventures and other joint activities a call for greater international efforts to collect and analyze data on these important trends is the central recommendation of the task force

World Health Organization strategy (2022-2026) for National Action Plan for Health Security 2022-10-31

having just emerged from a prolonged civil war and faced with the urgent tasks of establishing political stability and reinvigorating an economy in tatters the transitional government of ethiopia 1991-1995 had to set a new direction for the economic reconstruction and social rehabilitation of the war-torn and poverty-ridden country during the transitional period a spate of new policies and strategies defining the development priorities goals and implementation instruments of the new regime led by the eprdf was introduced this work is a synthesis of various sectoral policies and an attempt to trace the genesis of the policies highlight the continuities significant departures and other salient features each of the reviews in this digest briefly analyses the critical elements of the policies identifies major gaps in the conceptualisation of the policy as well as the achievements registered and the challenges encountered in its implementation the authors also try to identify the outstanding issues to be addressed by policymakers and suggest remedies the policy reviews have been grouped into three parts and presented under social economic and governance sectors

New Strategies for New Challenges 1999-09-27

Digest of Ethiopia's National Policies, Strategies and Programs 2008

the ability to harness information communication technologies icts is increasingly at the heart of competitiveness and sustainable growth as countries engage in an increasingly competitive global economy they are trying to weave ict into their development strategies in the same way enterprises have learned to use ict to transform their business models and strategies this integration offers a new path to development that is responsive to the challenges of our times in national strategies to harness information technology nagy hanna and peter knight provide a framework for assessing the opportunities challenges and prospects for e transformation and for analyzing the options and innovations adopted to manage the e transformation process they ask hard questions what does it take to harness ict to transform an economy why some countries accelerate their development journey with ict while others fail how did successful countries balance the need for strategic leadership with bottom up innovation can countries reduce the risks of digital divide what have been the roles of government and private sectors what lessons can be learned for countries at different levels of development featuring contributions from country experts the editors and authors provide in depth case studies of ict deployment in singapore finland the philippines and south africa and asses the progress of such efforts the result is an essential resource for academic researchers policy analysts policymakers and industry leaders interested in the role of ict in national development innovation and economic growth in national strategies to harness information technology nagy hanna and peter knight provide a framework for assessing the opportunities challenges and prospects for e transformation and for analyzing the options and innovations adopted to manage the e transformation process they ask hard questions what does it take to harness ict to transform an economy why some countries accelerate their development journey with ict while others fail how did successful countries balance the need for strategic leadership with bottom up innovation can countries reduce the risks of digital divide what have been the roles of government and private sectors what lessons can be learned for countries at different levels of development featuring contributions from country experts the editors and authors provide in depth case studies of ict deployment in singapore finland the philippines and south africa and asses the progress of such efforts the result is an essential resource for academic researchers policy analysts policymakers and industry leaders interested in the role of ict in national development innovation and economic growth

National Intelligence Strategy of the United States of America: 2019 2019-01-23

this book brings policy making for sustainable development into the mainstream of decision making at all levels of governance and in all sectors it builds on the 2005 internationally agreed mauritius strategy which aims to implement the integration of sustainable development by small island developing states designed as a handbook for policy makers and planners in government as well as business and civil society leaders it covers seven of the twenty issues that have been outlined in the mauritius strategy as being important for the sustainable development of sids disaster management marine resources freshwater resources land resources energy resources tourism resources and trade it brings together best practices policy options and development prospects that small states can pursue in order to achieve real progress in these fields it covers the progress and experiences of countries in the caribbean region the pacific region and the atlantic indian ocean and mediterranean region in their implementation of sustainable development in these areas it also provides a useful point of reference and stimulus to policy makers and their supporting colleagues from all sectors

National Strategies to Harness Information Technology 2011-12-10

what is power and how is it effective this volume responds to these questions in terms of regional international relations with a particular focus on the baltic sea region an area still charged with a residue of cold war conflict and power disparity in a setting of new cooperative ventures each contributor examines the region from a different angle and discusses how its actors coped with the new situation facing them after 1991 the volume looks at how governments have defined their new circumstances how they have dealt with the opportunity to shift to a new mode of coexistence and collaboration and how they have tackled the challenge of peacefully converting their region to a security community the book breaks with tradition by adopting a new thematic approach based on regional issues and functions rather than a country by country discourse it will be of critical value to readers interested in security studies and european politics

Strategies for Change 1977

this book is about actions corporate and government policymakers are taking their reasons and how they can be more effective authors erik arnold and ken guy analyze the major sectors of the electronics countries in three groups of oecd economies large the united states japan and the european economic community medium the united kingdom france and germany and small belgium holland switzerland and canada they deal in turn with the kinds of advanced information technology policies that can be formulated those that are likely to succeed and how those policies can be actively and economically implemented

Integrating Sustainable Development Into National Frameworks 2011

national strategies for regional integration south and east asian case studies examines how each country s integration with its neighbours and more distant regional economies might be improved the country cases illustrate the diversity of asian development experience and offer lessons for other countries and regions interested in developing national strategies to foster regional integration

this invaluable collection of essays examines national security strategy from amny points of view

Security Strategies, Power Disparity and Identity 2013-02-28

national urban policy nup is a key instrument to achieve sustainable urban development in a shared responsibility across countries regions and cities the scale and urgency of the current urban challenges has given prominence to nups the covid 19 crisis has amplified the potential of nups in shaping more resilient green and inclusive cities as part of countries recovery packages

Assessing national capacity for the prevention and control of noncommunicable diseases 2023-07-05

this work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it this work was reproduced from the original artifact and remains as true to the original work as possible therefore you will see the original copyright references library stamps as most of these works have been housed in our most important libraries around the world and other notations in the work this work is in the public domain in the united states of america and possibly other nations within the united states you may freely copy and distribute this work as no entity individual or corporate has a copyright on the body of the work as a reproduction of a historical artifact this work may contain missing or blurred pages poor pictures errant marks etc scholars believe and we concur that this work is important enough to be preserved reproduced and made generally available to the public we appreciate your support of the preservation process and thank you for being an important part of keeping this knowledge alive and relevant

Parallel Convergence 1986-11-17

the design construction operation and retrofit of buildings is evolving in response to ever increasing knowledge about the impact of indoor environments on people and the impact of buildings on the environment research has shown that the quality of indoor environments can affect the health safety and productivity of the people who occupy them buildings are also resource intensive accounting for 40 percent of primary energy use in the united states 12 percent of water consumption and 60 percent of all non industrial waste the processes for producing electricity at power plants and delivering it for use in buildings account for 40 percent of u s greenhouse gas emissions the u s federal government manages approximately 429 000 buildings of many types with a total square footage of 3 34 billion worldwide of which about 80 percent is owned space more than 30 individual departments and agencies are responsible for managing these buildings the characteristics of each agency s portfolio of facilities are determined by its mission and its programs in 2010 gsa s office of federal high performance green buildings asked the national academies to appoint an ad hoc committee of experts to conduct a public workshop and prepare a report that identified strategies and approaches for achieving a range of objectives associated with high performance green federal buildings achieving high performance federal facilities identifies examples of important initiatives taking place and available resources the report explores how these examples could be used to help make sustainability the preferred choice at all levels of decision making achieving high performance federal facilities can serve as a valuable guide federal agencies with differing missions types of facilities and operating procedures

On Revolt 1976-02

in this report RAND researchers explore the factors contexts and mechanisms that shape a national government's decision to continue or end military and other operations during a conflict. It examines national will to fight to help U.S. leaders better understand and influence will to fight. The researchers propose an exploratory model of 15 variables that can be tailored and applied to a wide set of conflict scenarios.

National Strategies for Regional Integration 2009-07-01

Health care is in the midst of a dramatic transformation in the United States spurred by technological advances, economic imperatives, and governmental policies. Information technologies are rapidly being applied to health care in an effort to improve access, enhance quality, and decrease costs. At the same time, the use of technologies by the consumers of health care is changing how people interact with the health care system and with health information. These changes in health care have the potential both to exacerbate and to diminish the stark disparities in health and well-being that exist among population groups in the United States. If the benefits of technology flow disproportionately to those who already enjoy better coverage, use, and outcomes than disadvantaged groups, health disparities could increase. But if technologies can be developed and implemented in such a way to improve access and enhance quality for the members of all groups, the ongoing transformation of health care could reduce the gaps among groups while improving health care for all. To explore the potential for further insights into and opportunities to address disparities in underserved populations, the National Academies of Sciences, Engineering, and Medicine held a workshop in October 2014. The workshop focused on 1) how communities are using digital health technologies to improve health outcomes for racial and ethnic minority populations, 2) how community engagement can improve access to high-quality health information for members of these groups, and 3) on models of successful technology-based strategies to reduce health disparities. This report summarizes the presentations and discussions at the workshop.

National Strategy for Suicide Prevention 2012-07-10

Practical and accessible, this book provides the first step-by-step guide to cognitive strategy instruction, which has been shown to be one of the most effective instructional techniques for students with learning problems. Presented are proven strategies that students can use to improve their self-regulated learning, study skills, and performance in specific content areas, including written language, reading, and math. Clear directions for teaching the strategies in the elementary or secondary classroom are accompanied by sample lesson plans and many concrete examples. Enhancing the book's hands-on utility are more than 20 reproducible worksheets and forms.

National Security Strategy 1984

The book provides the reader a 40-year enlightenment jump in fixing troubled organizations or making good ones better. It delineates hundreds of rules and principles outlined in 25 strategies for transforming any size or type of business into one that exceeds expectations for performance and profit. It lays the groundwork for taking care of yourself, the leader, creating a positive work environment, selecting key personnel, improving quality and customer satisfaction, reducing overhead costs, personal and strategic planning, self-development, time management, manning, compensation, program and process management, protecting trade secrets, and dealing with snakes, alligators, and weasels. The book is based on leading and managing 15 highly technical teams in accomplishing very dissimilar functions and missions.

Global State of National Urban Policy 2021: Achieving Sustainable Development Goals and Delivering Climate Action 2021-06-25

The United States spends approximately 4 million each year searching for near-Earth objects (NEOs). The objective is to detect those that may collide with Earth. The majority of this funding supports the operation of several observatories that scan the sky searching for NEOs. This, however, is insufficient in detecting the majority of NEOs that may present a tangible threat to humanity. A significantly smaller amount of funding supports ways to protect the Earth from such a potential collision or mitigation. In 2005, a congressional mandate called for NASA to detect 90 percent of NEOs with diameters of 140 meters or greater by 2020. Defending Planet Earth: Near-Earth Object Surveys and Hazard Mitigation Strategies identifies the need for detection of objects as small as 30 to 50 meters, as these can be highly destructive. The book explores four main types of mitigation, including civil defense, slow push or pull methods, kinetic impactors, and nuclear explosions. It also asserts that responding effectively to hazards posed by NEOs requires national and international cooperation. Defending Planet Earth: Near-Earth Object Surveys and Hazard Mitigation Strategies is a useful guide for scientists, astronomers, policy makers, and engineers.

Technology Strategies in National Context and National Programs in Taiwan 2018-02-20

A collection of essays on British and American maritime relationships in the 20th century, together with details on the British organization of warfare, Anglo-American maritime theory, their rivalries and coalitions, and their plans for dealing with a future war in the nuclear age.

Achieving High-Performance Federal Facilities 2011-11-07

With contributions from leading academics and practitioners, Strategic Planning for Regional Development in the UK is the most up-to-date treatment of a fast-changing subject. The book discusses the evolution of regional planning in the UK and the strategic thinking involved, the spatial implications of regional economic development policies, the methods and techniques needed for the implementation of strategic planning for regional development, how strategic planning for regional development is currently put into practice in three UK regions with different priorities, and strategic planning for regional development in the UK. It is essential reading for students and

academics working within strategic and regional planning and provides policy makers and practitioners with a comprehensive and thought provoking introduction to this critically important emerging field

National Will to Fight 2018-09-07

today the internet has become a source of information that no country or company can forgo it is not only used to communicate or entertain but most importantly to operate utilities and public services such as banking or air traffic as the reliance on computer networks across societies and economies keeps growing so do security risks in cyberspace referred to as cybersecurity cybersecurity means protecting information and control systems from those who seek to compromise them it also involves actors both malicious or protective policies and their societal consequences this collection of essays provides a better understanding of the risks perceptions and myths that surround cybersecurity by looking at it from three different levels of analysis the sovereign state the infrastructure and stakeholders of the internet and the individual the essays explore such issues as information ownership censorship cyberwars cyberterrorism privacy and rebellion bringing together expert knowledge from computer science and the social sciences with case studies it reviews existing policies and practices and discusses the threats and benefits of living in an increasingly networked world this authoritative analysis of one of the most controversial and compelling security debates of the twenty first century will appeal to scholars and practitioners interested in security international relations and policymaking

Responsibility for All 2001

everyone government agencies private organizations and individuals is facing a changing climate an environment in which it is no longer prudent to follow routines based on past climatic averages state and local agencies in particular as well as the federal government need to consider what they will have to do differently if the 100 year flood arrives every decade or so if the protected areas for threatened species are no longer habitable or if a region can expect more frequent and more severe wildfires hurricanes droughts water shortages or other extreme environmental events both conceptually and practically people and organizations will have to adjust what may be life long assumptions to meet the potential consequences of climate change how and where should bridges be built what zoning rules may need to be changed how can targets for reduced carbon emissions be met these and myriad other questions will need to be answered in the coming years and decades informing decisions in a changing climate examines the growing need for climate related decision support that is organized efforts to produce disseminate and facilitate the use of data and information in order to improve the quality and efficacy of climate related decisions drawing on evidence from past efforts to organize science for improved decision making it develops guidance for government agencies and other institutions that will provide or use information for coping with climate change this volume provides critical analysis of interest to agencies at every level as well as private organizations that will have to cope with the world s changing climate

The Promises and Perils of Digital Strategies in Achieving Health Equity 2016-06-22

with the increase in the culture of new aquatic animal species and the consequential discovery of new and emerging diseases it appears timely to provide an update on the range of disease emergency management strategies the main purpose of this volume of the review is therefore to provide a state of the art compilation and assessment of aquatic animal disease emergency management strategies covering policies as well as operational tools from international to farm levels it aims to provide useful generic information on the different issues surrounding the management of aquatic animal disease emergencies written by world specialists

Strategy Instruction for Students with Learning Disabilities, Second Edition 2013-09-16

our legacy 1947 1989 national security system is unsuited for the dynamic and complex global security environment that has developed since the end of the cold war over time the national security council has evolved from the very limited advisory group initially imagined by president truman to that of a vast network of interagency groups that were developed since 1989 these interagency groups view themselves as deeply involved in integrating policy development crisis management and staffing for the president however the national security staff nss and the national security system are relics of the industrial age vertical stovepipes in an age that demands that the management of the national security system be conducted at the strategic level what is required is a true national security strategy based on ends ways and means the alignment of resources with integrated national security missions and the assessment and accountability of management functions that should be performed by a properly resourced nss unburdened from the urgency of the 24 7 news cycle the president s national security strategy of may 2010 calls for reform in many of these areas section 1072 of the 2012 defense authorization act calls upon the president to outline the changes and resources that are needed in both the executive branch and in congress to implement his national security strategy the president s response to this legislative mandate can and should be the first step in a strategic partnership for transforming our national security system in both the executive branch and the congress to that of a system that can meet and anticipate the challenges and opportunities for ensuring our security and well being

Twenty-Five Strategies for Organizational Success 2017-04-07

the major european powers drafted war plans before 1914 and executed them in august 1914 none brought the expected victory by christmas why this tightly focused collection of essays by international experts in military history reassesses the war plans of 1914 in a broad diplomatic military and political setting for the first time in three decades the book analyzes the war plans of austria hungary france germany great britain italy and russia on the basis of the latest research and explores their demise in the opening months of world war i collectively and comparatively these essays place contingency war planning before 1914 in the different contexts

and challenges each state faced as well as into a broad european paradigm this is the first such undertaking since paul kennedy s groundbreaking war plans of the great powers 1979 and the end result is breathtaking in both scope and depth of analysis

Defending Planet Earth 2010-07-21

this book presents a wide range of perspectives on the role of national parliaments in eu politics and policy making looking at efforts to address perceived democratic and information deficits

Maritime Strategy And The Balance Of Power 1989-10-24
