in this revolutionary treatise j w armstrong puts the compelling case that all diseases except those caused by traumatism or structural disorders can be cured by one simple means urine therapy the therapy is an entirely natural treatment a drugless system of healing that treats the body as a whole moreover the only ingredient needed is a substance manufactured in the body itself rich in mineral salts hormones and other vital substances namely human urine it may seem strange to take back into the body something that the body is apparently discarding yet the theory is similar to the natural practice of organic composting fallen leaves when dug back into the soil provide valuable mineral salts to nourish new plant life the same principle holds true for the human body

the intensive study of jungian psychology was amplified by another subject taught continuously while i

was a student at the jung institute in zurich switzerland the psychology of fairy tales the study of fairy tales was the specialty of a fairly young single woman dr marie louise von franz she lectured to us english speaking students in well spoken english and the conviction and power of her voice made me feel how deep and meaningful these stories were to her not only that i myself was immediately deeply affected by the convincing spiritual reality that was being presented to me in the stories themselves it was as if the reality of life came out here in a wholly new form untouched by the standard accepted form of common life what most struck me i think now was the following realization here in this story is a completely insoluble problem i want to follow it all the way through and to my surprise finally feel that this problem has been solved this outcome has been both essential and unbelievable to me as one who felt that life posed just such an insoluble problem i found the typical fairy tale both impossible and incredible i found in fairy tales a healing presence and possibility for the terror of my own early life this is the unexpressed feeling that kept me fastened on the totally unexpected subject of fairy tales

c g jung s psychology provides a unique understanding of the seven tales in this volume the archetypal images therein are many layered we can see them from the mythological viewpoint as dragons demons and witches we find them in rivers of fire in kingdoms at the bottom of the sea in talking animals and in endless transformations that defy human experience the same images mirror situations of everyday life the joys of love success in one s endeavors but also abandonment yearning for offspring loss of a sheltered existence as well as the many insurmountable tasks which confront us in life but the most significant of jung s insights into the psyche is the realization that all such experiences rest upon an inner reality which needs to be understood symbolically this is where the archetypal nature of fairy tales is most relevant for it explains why people of all ages and all levels of society have been fascinated by them people often without much formal education gathered around a fire at the end of a hard day and gazing into the flames followed the images arising from the storyteller s words today many have by and large lost the capacity for such experiences children still do adults are often distracted by the demands of outer life and yet fairy tales retell fundamental experiences of life which are timeless
