since 2016 millions of americans have demonstrated organized and contributed in the cause of political change some have been effective most are wasting their time while there are few clear rules of political efficacy there are techniques of campaigning agitating and lobbying that manifestly work better than others making the works of scholars and practitioners accessible to activists what i have tried to show is how real reform is possible when we put ordinary people back into politics more than a book of how to do it it shows why a new politics of interpersonal engagement can help renew our democratic system schneier s books are always sophisticated and readable appealing not only to undergraduate students but also to activists and people with a general interest in politics here he smoothly blends the insights of academics with those of campaign professionals and politicians putting people back in politics is must reading for people concerned that the long term future of american democracy may be

determined by the 2020 election and who want to do something about it ken sherrill professor emeritus of political science hunter college how can we put everyday people at the center of our politics ned schneier not only tells us how but why it is crucial to counter big money to reform an increasingly dysfunctional political system from simple but meaningful conversations with neighbors to effective get out the vote efforts to mass mobilizations schneier packs a remarkable amount of experience research and wisdom into a slim and highly readable book want to help create the world we want read this book now it will help us forge viable pathways towards a desirable 21st century a must read for anyone seeking to make a difference in 2020 and beyond ron hayduk professor of political science san francisco state university

this book is a collection of stories about the events of may 1992 which were told as part of a wide discussion and debate about democracy in thailand it was not written as a search for the essential truth about the may massacre as to see how these discourses shape our understanding of the workings of politics and thus produce truths about thai politics the author argues that much of the meaning of the stories comes not from the facts themselves but from the discursive economies of the text how the text was produced and exchanged as a social activity this narrative approach to thai politics is timely because the events of may 1992 were the first popular movement to follow the disintegration of the soviet union which in turn constituted a crisis for social science that relied so heavily on the bipolar methodology that attended the bipolar world view of the cold war
