at the very foundation of religious faith and hope is a belief that consciousness will survive death and that we will live on in another dimension of reality but that foundation easily crumbles when scientific minds are unable to wrap their brains around an afterlife when they are unable to visualize a non material world as the foundation gives way the philosophy of materialism takes hold and gives rise to moral decadence egocentricity hypocrisy hatred disorder flux strife chaos and fear such seems to be the state of the world today there is so much to be found outside the highly

guarded boundaries of mainstream science and orthodox religion for those willing to open their minds to it for those willing to recognize that the dissemination of truth did not stop with the good books of organized religion and cannot always be found in the laboratory beginning in 1848 a number of sensitive people began developing as mediums bringing forth communications from the spirit world one of the skeptics investigating the popular madness was professor robert hare of the university of pennsylvania intending to debunk it all hare would after extensive research become a believer when he asked an apparently advanced spirit what it was all about he was told that it was a deliberate effort on the part of the inhabitants of the higher spheres to break through the partition which has interfered with the attainment by mortals of a correct idea of their destiny after death unfortunately both orthodox religion and mainstream science acting out of ego and fear have rebuked the efforts of those inhabitants of the higher spheres to enlighten us thus permitting the foundations of both faith and hope to further crumble in the afterlife revealed michael tymn sets forth some of the most credible messages from the spirits relative to the nature of their world instead of a heaven hell dichotomy we are told that there are many levels or as jesus is quoted many mansions and that we cross over to the other side based on what might be called a moral specific gravity we discover a divine plan one of attainment and attunement of gradual spiritual growth of evolution of spirit through progressively higher planes we see how we are really souls occupying bodies rather than bodies housing souls and how our souls are progressing in finding their way back to oneness with the creator through the challenges the adversities the trials and tribulations offered us in a particular lifetime

a father watches his teenage son step out the door on a hiking trip not knowing that this is the last time he would see him a journal of grief despair and ultimately hope this book tells the story of every parent's nightmare the sudden death of a child and a father's search for meaning in a seemingly random world of psychics and skeptics expanding on territory covered in his 2008 memoir of his son's death soul shift messages from the afterlife is both an account of ireland's journey from indifference to belief and an overview of the resources available to the bereaved to help them receive messages from the afterlife mark ireland son of celebrated psychic to the stars dr richard ireland was a successful marketing executive in arizona with little interest in his father's colorful history while his father held readings for mae west and traveled the u s demonstrating his parapsychological powers mark ireland took a more conventional route through life but when his own teenage son brandon suddenly dies while hiking in the mountains with friends ireland is forced to confront his resistance to all things spiritual and begins to explore the possibility that communication with the dead is real in his search for conclusive evidence of life after death he plunges into his father's world and meets an array of respected psychic mediums who deliver unexpected messages not only from his son in the afterlife but also from many other souls seeking to communicate with the living fighting to retain a sense of critical thinking ireland also contacts scientists

conducting research into the survival of consciousness after death the book features detailed accounts of tests and experiments that various people have conducted to obtain proof of consciousness survival including ireland s own involving a secret message left behind by his sister robin who died of pancreatic cancer the contents of this message were unknown to any living person and remained sealed in an envelope untouched until responses had been received from a group of qualified mediums who sought to crack the code messages from the afterlife shows how spirit communication can be both undeniably accurate and frustratingly ambiguous and above all demonstrates the value of having an open receptive mind while maintaining faith in the indestructibility of the human spirit

can love endure even after death the afterlife revolution written by whitley and anne strieber is among the most convincing stories of afterlife communication ever told and is a ringing endorsement not only of the fact that we do not die but also that the power of love can create an actual bridge between the physical and nonphysical worlds after anne strieber died in august 2015 she returned to her husband whitley in an ingenious and convincing way whitley began to communicate with her and the afterlife revolution began out of this exchange of love from both worlds whitley s grief at her loss has transformed into a warm and deeply satisfying new form of love after a near death experience in 2004 anne strieber became an expert in afterlife studies and created an ingenious plan of contact which to her husband whitley s amazement she proceeded to carry out starting just an hour and a half after she died as verified by famed afterlife researcher dr gary schwartz who wrote the foreword the afterlife revolution is among the most convincing stories of afterlife communication ever told and is a ringing endorsement not only of the fact that we do not die but also that the power of love can create an actual bridge between the physical and nonphysical worlds the book points the way to a new relationship between the living and as anne puts it what you call the dead anne tells of her experience on the other side saying that we are light alive and that enlightenment is what comes when there is nothing left of us but love her descriptions of the afterlife communicated to whitley from the afterlife are brilliantly articulate and nuanced at once deeply familiar and uniquely her own the afterlife revolution shows how to use basic tools such as what anne describes as objective love combined with a simple but special form of meditation to build a relationship between physical and nonphysical worlds it is intended to help us find that sweet

point at which the souls of the living touch those of the dead as anne says mankind is divided not so much between the sexes as between the living and what are called the dead it isn't natural and it isn't necessary we can become whole the afterlife revolution is about the joy of doing just that and the magnificent new human experience that will unfold as more and more of us learn to live in this way

there are very few accounts of the afterlife across the period from homer to dante most traditional studies approach the classical afterlife from the point of view of its evolution towards the christian afterlife this book tries to do something different to explore afterlife narratives in spatial terms and to situate this tradition within the ambit of a fundamental need in human psychology for the synthesis of soul or self and universe drawing on the works of homer plato cicero virgil and dante among others as well as on modern works on psychology cartography and music theory mapping the afterlife argues that the topography of the afterlife in the greek and roman tradition and in dante reflects the state of scientific knowledge at the time of the various contexts in which we find it the book posits that there is a dominant spatial idiom in afterlife landscapes a journey vision paradigm the horizontal journey of the soul across the afterlife landscape and a synoptic vision of the universe many scholars have argued that the vision of the universe is out of place in the underworld landscape however looking across the entire tradition we find that afterlife landscapes almost without exception contain these two kinds of space in one form or another this double vision of space brings the underworld as the landscape of the soul into contact with the scientific universe and brings humanity into line with the cosmos
