this book provides a comprehensive yet easy coverage of ad hoc and sensor networks and fills the gap of existing literature in this growing field it emphasizes that there is a major interdependence among various layers of the network protocol stack contrary to wired or even one hop cellular networks the lack of a fixed infrastructure the inherent mobility the wireless channel and the underlying routing mechanism by ad hoc and sensor networks introduce a number of technological challenges that are difficult to address within the boundaries of a single protocol layer all existing textbooks on the subject often focus on a specific aspect of the technology and fail to provide critical insights on cross layer interdependencies to fully understand these intriguing networks one need to grasp specific solutions individually and also the many interdependencies and cross layer interactions

What is e-book? *2002*

e learning is still in its infancy this can be seen both in the limited pedagogical quality and lack of portability of e learning content and in the lack of user friendly tools to exploit the opportunities offered by current technologies to be successful e learning must offer effective and attractive courses and programmes to learners while at the same time providing a pleasant and effective work environment for staff members who have the task to develop course materials plan the learning processes provide tutoring and assess performance to overcome these deficiencies the ims global learning consortium inc released the learning design specification in 2003 with learning design it is possible to

develop and present advanced interoperable e learning courses embracing educational role and game playing methods problem based learning learning community approaches adaptivity and peer coaching and assessment methods in this handbook koper and tattersall have put together contributions from members of the valkenburg group consisting of 33 experts deeply involved in e learning and more specifically learning design the result is a rich and lasting source of information for both e learning course and tool developers providing information about the specification itself how to implement it in practice what tools to use and what pitfalls to avoid the book not only reports first experiences but also goes beyond the current state of the art by looking at future prospects and emerging applications
