waste heat recovery technologies and applications

Sep 20 2023

2018 6 1 the investigated technologies and techniques include the use of heat pipes to recover heat from the cooling line regenerators to recover the waste heat from the exits of coke ovens oven chambers and blast furnaces semi wet

waste heat the dominating root cause of current global warming

Aug 19 2023

2020 5 10 the results show that the temperature changes in air oceans and land are definitively correlated to the respective heat allocated from the waste heat stream based on their specific heat capacities with high certainty and reliability
