industriali l'interesse per i prezzi si ridusse dagli anni settanta agli anni novanta. È ripreso tuttavia negli ultimi quindici vent'anni come conseguenza della rinnovata attenzione per il tema della crescita e per i cambiamenti di lungo periodo nelle economie del passato. Il confronto fra i livelli di sviluppo di economie diverse come quella europea e quella asiatica insieme con l'uso di strumenti statistici più avanzati nel campo della storia economica ha rafforzato l'interesse per i prezzi. I contributi presenti in questo volume si articolano intorno a due macro temi: la formazione dei prezzi nelle economie e società pre industriali durante i secoli dal XII all'inizio del XIX e il movimento dei prezzi nel lungo periodo nonché il rapporto esistente con quello di altre variabili economiche e non economiche quali la popolazione, la massa monetaria, il prodotto, la produttività, la velocità di circolazione della moneta, i cambiamenti nelle istituzioni.

The fourth international conference on the history of mathematics education was hosted by the academy of sciences and university of turin, Italy, about 50 senior and junior researchers from 16 countries met for four days to talk about one topic: the history of mathematics education. In total 44 contributions were presented. The themes were: ideas, people and movements; transmission of ideas; teacher education; geometry and textbooks; textbooks changes and origins; curriculum and reform; teaching in special institutions and teaching of geometry. In this volume you find 28 of the papers, all of them peer reviewed since the first international conference on the history of mathematics education. The aim has been to develop this area of research to attract more researchers and provide new insights that stimulate further digging. It is therefore very pleasing that so many new young researchers joined the conference presenting results from ongoing or recently finished PhD projects. This makes us confident about a prosperous future of this research area as we look forward to the fifth international conference on the history of mathematics education to be held in Utrecht, the Netherlands in 2023-05-09.

~~the herzog august bibliothek wolfenbüttel in 1992 starting with~~
the theory of regressus as displayed in its most developed form by
william wallace these papers enter the vast field of the
renaissance discussion on method as such in its historical and
systematical context this is confined neither to the notion of
method in the strict sense nor to the renaissance in its exact
historical limits nor yet to the aristotelian tradition as a well
defined philosophical school but requires a new scholarly
approach thus besides galileo zabarella and their circles which
are regarded as being crucial for the emergence of modern
science in the end of the 16th century the contributors deal with
the ancient and medieval origins as well as with the early modern
continuity of the renaissance concepts of method and with non
regressive methodologies in the various approaches of
renaissance natural philosophy including the lutheran and
calvinist traditions this volume integrates the theme of spain in
italy into a broad synthesis of late renaissance and early modern
italy by restoring the contingency of events local and imperial
decision making and the distinct voices of individual spaniards
and italians between 1190 and 1525 the teutonic order the third
major military religious order after the temple and the hospital
maintained extensive possessions in italy this volume examines
the history of the order s italian branch arguing that it served as
an intermediary between east and west as well as north and south
it reflects on the reasons for the teutonic order s success and the
persistence of its settlement particularly its ability to adapt to
various and changing political and economic contexts and its
talent in garnering the support of the local population not only
focusing on political diplomatic economic and religious history
but also considering the history of art and architecture
spirituality prosopography and everyday life this book portrays
the teutonic order in italy as an example of medieval coexistence
collaboration and crossing borders this book will be a useful study
for scholars interested in medieval italy cross cultural positions and
