breaking and fascinating study not since darwin s the expression of emotions in man and animals has a book so thoroughly and effectively explored the full range of emotions that exist throughout the presents an analytical exposition of the nine schools of indian philosophy extrapolating environmental ethics from the profound metaphysics of these nine schools which serve as the cornerstone of a life lived in wisdom this book uses the popular contemporary word environment with the meaning expounded by the vedic texts therefore it includes the internal external and cosmic states of all the creatures of the world and relates them to the universal laws of creation preservation and annihilation of every existence following the path of the cosmic order r ta it argues that realization of the fact that all entities in the world are illuminated by the same universal spirit is also necessary while the book emphasizes the external environmental woes of the world such as deforestation animal cruelty pollution climate change and more it also underscores that these are merely manifestations of humans internal perverted environmental states thus humankind should not look at external issues that are limited and temporary but should focus on the longer lasting internal transformation according to spiritual masters e g sages seers yogis mystics etc whether we know or believe it or not we this book presents an analytical exposition of the nine schools of indian philosophy extrapolating environmental ethics from the profound metaphysics of these nine schools which serve as the cornerstone of a life lived in wisdom this book uses the popular contemporary word environment with the meaning expounded by the vedic texts therefore it includes the internal external and cosmic states of all the creatures of the world and relates them to the universal laws of creation preservation and annihilation of every existence following the path of the cosmic order | it argues that realization of the fact that all entities in the world are illuminated by the same universal spirit is also necessary while the book emphasizes the external environmental woes of the world such as deforestation animal cruelty pollution climate change and more it also underscores that these are merely manifestations of humans internal perverted

environmental states thus humankind should not look at external issues that are limited and temporary but should focus on the longer lasting internal transformation
