as organizations drive to transform and virtualize their it infrastructures to reduce costs and manage risk networking is pivotal to success optimizing network performance availability adaptability security and cost is essential to achieving the maximum benefit from your infrastructure but what is needed to support these networking requirements expertise to plan and design networks with holistic consideration of servers storage application performance and manageability networking solutions that enable investment protection with a range of performance and cost options that match your environment technology and expertise to design implement and manage network security and resiliency robust network management software to provide integrated simplified management that lowers the operating costs of complex networks ibm and juniper have entered into an agreement to provide expanded network technology choices with the new ibm ethernet switches routers and appliances to provide an integrated end to end resiliency and security framework combined with the ibm vast data center design experience and with a field proven operating system junos this portfolio which we describe in this ibm redbooks publication represents the ideal convergence of strength and intelligence for organizations striving to transform and virtualize their it infrastructure such a combination can help you reduce costs manage risks and prepare for the future this book is intended for anyone who wants to learn more about ibm j type data center networking

marvin sascha wahl presents the possibilities for optimising diesel engine combustion in the advanced process of partially premixed diesel combustion nitrogen oxide and soot emissions can be minimised at the same time a new feature is the possibility of applying this strategy up to 2000 revolutions and 10 bar indicated mean pressure in this work various effective parameters are also compared and correlated with each other a final comparison with conventional diesel combustion shows the advantages and disadvantages and evaluates them

since world war ii japan has become not only a model producer of high tech consumer goods but also despite minimal spending on defense a leader in innovative technology with both military and civilian uses in the united states nearly one in every three scientists and engineers was engaged in defense related research and development at the end of the cold war but the relative strength of the american economy has declined in recent years what is the relationship between what has happened in the two countries and where did japan s technological excellence come from in an economic history that will arouse controversy on both sides of the pacific richard j samuels finds a key to japan s success in an ideology of technological development that advances national interests from 1868 until 1945 the japanese economy was fired by the development of technology to enhance national

security the rallying cry rich nation strong army accompanied the expanded military spending and aggressive foreign policy that led to the disasters of the war in the pacific postwar economic planners reversed the assumptions that had driven japan s industrialization samuels shows promoting instead the development of commercial technology and infrastructure by valuing process improvements as much as product innovation the modern japanese system has built up the national capacity to innovate while ensuring that technological advances have been diffused broadly through industries such as aerospace that have both civilian and military applications struggling with the uncertainties of a post cold war economy the united states has important lessons to learn from the way japan has subordinated defense production yet emerged as one of the most technologically sophisticated nations in the world the japanese like the venetians and the dutch before them show us that butter is just as likely as guns to make a nation strong but that nations cannot hope to be strong without an ideology of technological development that nourishes the entire national economy
