Songs on the Death of Children 2021-03-25 this book provides a philosophical critique of legal relations between the eu and distant strangers neither located within nor citizens of its member states starting with the eu s commitment in articles 3 5 and 21 teu to advance democracy human rights and the rule of law in all its relations with the wider world ganesh examines in detail the salient eu and international

legal materials and thereafter critiques them in the light of a theory of just global legal relations derived from Kant's philosophy of right. In so doing, Ganesh departs from comparable Kantian scholarship on the EU by centering the discussion not around the essay toward perpetual peace but around the doctrine of right, Kant's final and comprehensive statement of his general theory of law. The book thus sheds light on areas of EU law, EU external relations law, standing to bring judicial review, public international law, jurisdiction, global public goods, and human rights jurisdiction, and also critiques the widespread identification of the EU as a Kantian federation of peace. The thesis on which this book was based was awarded the 2020 René Cassin Thesis Prize, English Section.

**Rightful Relations with Distant Strangers** (2021-05-10) offers the first true textbook on the field of collaborative governance, presenting a solid grounding in relevant theory while also focusing on case studies, process design, and practical tools. It draws on case studies not only from natural resource and environmental conflict resolution but also those involving collaborative, community-based project implementation and cases that focus on human services and social equity. It provides tools for students and practitioners of collaborative governance as well as public administrators and other possible participants in collaborative governance processes to discern when collaborative governance is appropriate in politically complex, real-world settings. It offers a roadmap for students, practitioners, and process participants to help them design and effectively participate in productive, efficient, and fair collaborative governance processes. It explores constitutional democracy and the ways in which collaborative governance can be used as a tool in building a more just, fair, and functional society.

Collaborative Governance (2022-09-27) Green Engineering involves the designing, innovation, and commercialization of products and processes which promote sustainability without eliminating both efficiency and economic viability. This handbook focuses on sustainable development through green engineering and technology. It is intended to address the applications and issues involved in their practical implementation. A new range of renewable energy technologies modified to provide green engineering will be described in this handbook. It will explore all green technologies required to provide green engineering for the future. These include but are not limited to green smart buildings, fuel-efficient transportation, paperless offices, and many more energy-efficient measures. Handbook of Sustainable Development Through Green Engineering and Technology acts as a comprehensive reference book to use when identifying development for programs and sustainable initiatives within the current legislative framework. It aims to be of great interest to researchers, faculty members, and students across the globe.

Handbook of Sustainable Development Through Green Engineering and Technology (2024-01-19) Dynamic mechanical and creep recovery behaviour of polymer-based composites: mechanical and mathematical modeling covers mathematical modelling, dynamic mechanical analysis, and the ways in which various factors impact the creep recovery behaviour of polymer composites. The effects of polymer molecular weight, plasticizers, cross-linking agents, and chemical treatment of filler material are addressed, and information on thermoplastic and thermosetting polymer-based composites is also covered, including their various applications and the advantages and disadvantages of their use in different settings. The final 2 chapters of the book cover mathematical modeling of creep recovery behavior for polymer composites and software-based simulation of creep recovery in polymer composites. Restoring Relations Through Stories 2020-12-15 medieval america analyzes literary legal and historical archives that help tell a new story about the formation of american culture against cold war era studies of u.s culture that argued following political scientist louis hartz's liberal consensus model that the united states emerged from the revolutionary era free from europe's feudal institutions and uninterested in the production of its medieval culture productions robert yusef rabiee contends that feudal law and medieval literature were structural components of the american cultural imaginary in the

nineteenth century the racial gender and class formations that emerged in the first era of u s nation building were deeply indebted to medieval social political and religious thought an observation that challenges the liberal consensus model and allows us to better grasp how american social roles developed far from casting off feudal tradition the early united states folded feudalism into its emerging liberal order creating a knotted system of values and practices that continue to structure the american experience sometimes the feudal residuum contradicted the liberal values of the unites states other times the feudal residuum bolstered those values revealing deep sympathies between so called modern and premodern political thought medieval america thus aims to reorient our discussions about american cultural and political development in terms of the long arc of european history
