

Free epub Clinical canine and feline reproduction evidence based answers

Full PDF

evidence base feline reproduction has not received the amount of investigation and attention that has been directed at canine reproduction the result is that less data is available both for description of normal reproduction and for management of common problems clinical canine and feline reproduction evidence based answers margaret v root kustritz p cm includes bibliographical references and index isbn 13 978 0 8138 1584 8 alk paper isbn 10 0 8138 1584 3 alk paper 1 dogs reproduction 2 cats reproduction i title dnlm 1 dogs physiology handbooks 2 the widespread appeal of pedigreed cats and cat breeding means that veterinarians need to be familiar with the unique characteristics of feline reproduction and breeding management in the past 25 years considerable progress has been made in understanding the behavioral gonadal and endocrine factors involved in successful feline reproduction evidence base evidence is poor for many conditions in the breeding queen and information is extrapolated from the dog or based on case reports and case series introduction there seems to be evidence linking gut microbiota and fertility mahiddine et al test the effect of the oral administration of three commensal lactobacillus spp on canine sperm quality they find that total and progressive motility acrosome integrity and other kinematic parameters were enhanced after the commensal lactobacilli administration based on the author s years of experience answering questions on reproduction and pediatrics clinical canine and feline reproduction allows the practicing veterinarian to rapidly find abstract practical relevance cats are seasonally polyestrous meaning they exhibit multiple estrous cycles within a season followed by a period of non cyclicity cats cycle when the day length is long but can be induced to cycle year round with 14 h of continuous artificial lighting in feline reproduction all aspects of reproduction in the queen and the tom are presented by a global author team beginning with basic anatomy and normal reproduction this book reviews practical knowledge about feline pregnancy neonatal care breeding soundness exams and semen cryopreservation this article reviews reproductive problems and challenges in both sexes namely ovarian remnant syndrome mammary fibroadenomatous hyperplasia congenital anomalies of the reproductive tract and pregnancy diagnosis in the queen and cryptorchidism and low libido in the tom introduce the moistened swab at the dorsal most point of the vulvar cleft and angle it upward at a 45 degree angle rolling it between the fingers if necessary to advance it beyond the urethral papilla fig 1 1 roll the swab against the vaginal surface and pull it straight out clinical canine and feline reproduction evidence based answers provides quick reliable answers to the most common questions in canine and feline reproductive and pediatric practice written using an innovative question and answer format each answer is designed for quick reference with the best references listed for further information as regarding age young cats showed significantly higher odds of separation anxiety pica and wool sucking and fabric eating and senior cats exhibited significantly higher odds of excessive self grooming and aggression toward housemate cat s than adult cats clinical canine and feline reproduction evidence based answers section i canine techniques canine techniques 1 what is the technique for collection of a vaginal cytology specimen anatomy the vulvar lips cover the ventral clitoral fossa and dorsal vestibule the vestibule is angled dorsally and extends from the vulva to the urethral orifice based on the author s years of experience answering questions on reproduction and pediatrics clinical canine and feline reproduction allows the practicing veterinarian to rapidly find and apply evidence based answers from the scientific literature to their clinical questions a surgeon has claimed joe Biden may have shown signs of a neurological disorder after the president appeared to freeze on stage at a campaign fundraiser over the weekend cats are induced ovulators and ovulate in response to multiple natural matings successful breeding in a cattery requires knowledge of the female s reproductive cycle behavior and management and often improper management can be the sole cause of infertility in table 2 the characteristics of Japanese regulations on animal experiments are listed our ethical principles known as the 3rs are the same as in western countries the law emphasizes refinement that focuses on the alleviation of pain and distress as well as the humane death of animals table 2 reversible control of reproduction is clearly not the only topic of relevance for those of us who work with intact cats breeders are increasingly expecting us to be knowledgeable about normal pregnancy pregnancy diagnosis parturition and dystocia neonatology and congenital inherited diseases 235 0008 11 1 in 2022 it said beaver kits had been spotted at the Dorset Beaver Project site in West Dorset the trust said the latest discovery by a member of the public came from the banks of the River Stour

feline reproduction problems and clinical challenges pubmed *May 28 2024*
