today s web sites and intranets are larger more valuable and more complex than ever before and their users are busier and less forgiving designers information architects and web site managers are required to juggle vast amounts of information frequent changes new technologies and corporate politics making some web sites look like a fast growing but poorly planned city roads everywhere but impossible to navigate a well planned information architecture has never been as essential as it is now information architecture for the world wide second edition shows how to use both aesthetics and mechanics to create distinctive cohesive web sites that work most books on web development concentrate either on the graphics or on the technical issues of a site this book focuses on the framework that holds the two together by applying the principles outlined in this completely updated classic you ll build scalable and maintainable web sites that are easier to navigate and more appealing to your users using

examples and case studies information architecture for the world wide will help you develop a strong cohesive vision for your site that makes it both distinctive and usable organize your site s hierarchy in ways that are meaningful to its users and that minimize the need to re engineer the site create navigation systems that allow users to move through the site without getting lost or frustrated accurately label your site s content organize your site in a way that supports both searching for specific items and casual browsing configure search systems so that users queries actually retrieve meaningful results manage the process of developing an information architecture from selling the concept to research and conceptual design to planning and production the world will be a better place when web designers read this book it s smart funny and artfully distills years of the authors bard won experience information architecture for the world wide tackles political organizational challenges as well as content structure and user interface this is not design lite but a deep treatment of fundamental issues of information presentation that advances the state of the art it s light years ahead of the competition bonnie nardi co author of information ecologies using technology with heart

Mastering HTML 4 *1999*

after years of using spacer gifs layers of nested tables and other improvised solutions for building your web sites getting used to the more stringent standards compliant design that is de rigueur among professionals today can be intimidating with standards driven design keeping style separate from content is not just a possibility but a reality you no longer use html and xhtml as design tools but strictly as ways to define the meaning and structure of web content and cascading style sheets css are no longer just something interesting to tinker with but a reliable method for handling all matters of presentation from fonts and colors to page layout when you follow the standards both the site s design and underlying code are much cleaner but how do you keep all those html and xhtml tags and css values straight jennifer niederst robbins the author of our definitive guide on standards compliant design design in a nutshell offers you the perfect little guide when you need answers immediately html and xhtml pocket reference this revised and updated new edition takes the top 20 of vital reference information from her nutshell book augments it judiciously cross references everything and organizes it according to the most common needs of web developers the result is a handy book that offers the bare essentials on web standards in a small concise format that you can use carry anywhere for quick reference this guide will literally fit into your back pocket inside html and xhtml pocket reference you ll find instantly accessible alphabetical listings of every element and attribute in the html 4 01 and xhtml 1 0 recommendations this is an indispensable reference for any serious web designer author or programmer who needs a fast on the job resource when working with established web standards

Information Architecture for the World Wide Web 2002
