commentary devotes considerable care to achieving a balance between technical information and homiletic devotional interpretation het evangelie van marcus is een boek dat meer dan 1950 jaar geleden is laboratory to contribute to spatialized understanding of the history of knowledge vols 1 cover debates of the house of the 1st parliament of the republic of south africa the concept of traffic conflict was initiated in the uni ted states in the 60s and raised a lot of interest in many countries it was an opening towards the develop ment of a new tool for safety evaluation and the diagnosis of local safety pro blems the need for such a tool was great because of the many situations where accident data was either scarce unsatisfactory or unavailable development of traffic conflict techniques tct started simultaneously in the 70s in several european count ries and new studies were also undertaken in the uni ted states canada and israel the need for international cooperation was rapidly feit in order to exchange data compare definitions and check progresses an association for international cooperation on traffic conflict techniques ictct was therefore created grouping researchers and safety administrators with the aim of promoting and organising exchange of information and common practical work three traffic conflict techniques workshops were organised in oslo 1977 paris 1979 and leidschendam 1982 a small scale international experiment of calibra tion of tcts was also carried out in rouen france in 1979 and five teams took part in it from france germany sweden the united kingdom and the united states results of this first experiment were used as a basis for the present enterprise to be acknowledged as a safety measuring tool traffic conflict techniques had to be validated in relation to traditional safety indicators such as injury accidents dutch the division of science into natural sciences social sciences and humanities may seem matter of course but is in fact a fairly recent and by no means undebated one this book describes how these different visions on science came to be and what ideals of knowledge and styles of argumentation they suppose it also discusses the nature structure and development of the humanities it delves into the history of these fields and the varying notions on their cultural place and function the book displays a broad scale of twentieth century philosophical and methodological movements and therefore offers not only students of the humanities a great insight into the background of their field but also shows students of social or natural sciences a wider vision on the historical and philosophical aspects of the sciences this volume in honour of eep talstra focusses on the function of tradition in the be known as the reformed and presbyterian branch of the protestant reformation perhaps less well known is the fact that he devoted the bulk of his creative efforts to pre a ing lecturing and commenting on the bible calvin envisioned a program of reform in geneva in which the bible properly interpreted would shape the minds and morals of the genevan populace the people of geneva whom calvin viewed as a precise spiritual reincarnation of the sti necked intractable hebrews of the old testament were in need of some serious remedial education and it was his duty as their chief minister to provide the requisite training in doctrine and godliness despite calvin s emphasis on preaching and producing biblical c mentaries however scholars have often portrayed him as a man of one 1 book that one book being the institutes of the christian religion in so ing they have produced a one dimensional and consequently incomplete view of calvin s theological work scholars have tended to study calvin s theology exclusively from the perspective of his institutes without taking into account his work of biblical interpretation and preaching or the re tionship of those efforts to the officials even the french minister of war a point viewed as highly suspicious worse yet she spoke several european languages fluently and travelled widely in wartime europe but was she guilty of espionage for all the publicity mata hari and her trial received key questions remain unanswered these questions concern not only her inadequate trial and her unproven guilt but also the events in her personal life what propelled margaretha zelle destined to be a dutch schoolteacher to transform herself into mata hari the most desirable woman in early 20th century paris she danced before
