this report is the first of two volumes that present information on the spatial and temporal distribution relative abundance and life history characteristics of 47 fish and invertebrate species in 32 estuaries along the contiguous west coast of the u s its purpose is to disseminate data developed in noaa s estuarine living marine resources elmr project page 1 the articles in this volume originally published in a variety of journals between 1890 and 1937 deal with the themes of the distribution of income and welfare highlighting the contribution which hobson made to welfare economics and the way in which he distanced himself from his more orthodox contemporaries in interpretation the articles also show the changes in hobson s views over the decades in which they were written this is a fascinating collection of material that provides an unparalleled depth of insight into the views of one of the most important economic thinkers of the early twentieth century special edition of the federal register containing a codification of documents of general applicability and future effect with ancillaries this collection brings together significant new contributions to the sraffa based theories of production and distribution from post keynesian arguments concerning monetary and macro economics to the history of thought and methodology all of the authors are well established authorities in their field and in this book they add stimulating and original pieces of analysis to the contemporary literature production distribution and trade is divided into three parts the first explores analytical issues in production and exchange theory the second examines postkeynesian macroeconomics and the final part includes essays on the history of economic thought and methodology this collection has been written in honour of sergio parrinello and is a fitting tribute to his untiring efforts to stimulate discussion among classicists marxists postkeynesians and evolutionists the book is a clear and convincing attempt to prove that an alternative paradigm to mainstream economics is alive and thriving and to argue that these perspectives shed better light on current economic problems both as diagnosis and in terms of policy conclusions the book will be of interest to economics postgraduate students and researchers working in the classical and postkeynesian tradition drawing on comparisons with historical shake ups in the film industry screen distribution post hollywood offers a timely account of the changes brought about in global online distribution of film and television by major new players such as google youtube apple amazon yahoo facebook netflix and hulu this book examines the current state of global media distribution today including legacy and born digital media industries and the social cultural and economic impact of the digital distribution ecosystem it has been said that every generation of historians seeks to rewrite what a previous generation had established as the standard interpretations of the motives and circumstances shaping the fabric of historical events it is not that the facts of history have changed no one will dispute that the battle of waterloo occurred on june 11 1815 or that the allied invasion of europe began on june 6 1944 what each new age of historians are attempting to do is to reinterpret the motives of men and the force of circumstance impacting the direction of past events based on the factual social intellectual and cultural milieu of their own generation by examining the facts of history from a new perspective today s historians hope to reveal some new truth that will not only illuminate the course of history but also validate contemporary values and societal ideals although it is true that tackling the task of developing a new text on logistics and distribution channel management focuses less on schools of philosophical and social analysis and more on the calculus of managing sales campaigns inventory replenishment and income statements the goal of the management scientist like the historian is to merge the facts and figures of the discipline with today s organizational cultural and economic realities hopefully the result will be a new synthesis where a whole new perspective will break forth exposing new directions and opportunities it is vitally important for businesses to have a holistic understanding of the many issues surrounding and shaping sustainability from competitors to government and political factors to economics and ecological science this integrated textbook for mba and senior level undergraduates offers a comprehensive overview of the issues of sustainability as they relate to business and influence corporate strategy it also features a wide range of cases and an extensive discussion of tools to incorporate sustainability issues into strategic decision making helping instructors and students to build and then apply a solid understanding of sustainability in business this book explores the changing economics regulations and operations of electricity distribution networks it highlights the central challenges and opportunities caused by the rise of decentralisation paradigm in the power system within this segment of the electricity supply chain as decarbonisation objectives continue to transform the power sector the distribution system experiences an increased penetration of energy and flexibility resources that come from a variety of sizes technologies and capabilities this makes traditional approaches to economic regulation and operation of electricity distribution networks obsolete this book aims to provide insights into the ways which decarbonisation decentralisation and digitalisation trends in the electricity sector will eventually shape future of distribution grids it will be relevant to students researchers and policymakers interested in energy economics the political economy of energy and the electricity sector includes the decisions of the supreme courts of massachusetts ohio indiana and illinois and court of appeals of new york may july 1891 mar apr 1936 appellate court of indiana dec 1926 feb 1927
