Organic Writing Assessment 2009-09-01 brian huot s aim for this book is both ambitious and provocative he wants to reorient composition studies view of writing assessment to accomplish this he not only has to inspire the field to perceive assessment generally not the most appreciated area of study as deeply significant to theory and pedagogy he also has to counter some common misconceptions about the history of assessment in writing in re articulating writing assessment huot advocates a new understanding a more optimistic and productive one than we have seen in composition for a very long time assessment as huot points out defines what is valued by a teacher or a society what isn t valued isn t assessed it tends to disappear from the curriculum the dark side of this truth is what many teachers find troubling about large scale assessments as standardized tests don t grant attention or merit to all they should instead assessment has been used as an interested social mechanism for reinscribing current power relations and class systems

Texas Test Prep Practice Test Book Star Writing Grade 4 2017-12-09 in a provocative book length essay patricia lynne argues that most programmatic assessment of student writing in u s public and higher education is conceived in the terms of mid 20th century positivism since composition as a field had found its most compatible home in constructivism she asks why do compositionists import a conceptual frame for assessment that is incompatible with composition theory by casting this as a clash of paradigms lynne is able to highlight the ways in which each theory can and cannot influence the shape of assessment within composition she laments as do many in composition that the objectively oriented paradigm of educational assessment theory subjugates and discounts the very social constructionist principles that empower composition pedagogy further lynne criticizes recent practice for accommodating the big business of educational testing especially for capitulating to the discourse of positivism embedded in terms like validity and reliability these terms and concepts she argues have little theoretical significance within composition studies and their technical and philosophical import are downplayed by composition assessment scholars there is a need lynne says for terms of assessment that are native to composition to open this needed discussion within the field she analyzes cutting edge assessment efforts including the work of broad and haswell and she advances a set of alternate terms for evaluating assessment practices a set of terms grounded in constructivism and composition coming to terms is ambitious and principled and it takes a controversial stand on important issues this strong new volume in assessment theory will be of serious interest to assessment specialists and their students to composition theorists and to those now mounting assessments in their own programs
