The Art of Company Valuation and Financial Statement Analysis 2014-04-30 americans have always loved risktakers like the icarus of ancient greek lore however even the most talented entrepreneurs can overstep their bounds all too often the very qualities that make icarus executives special self confidence visionary insight and extreme competitiveness spur them to take misguided and even illegal chances the icarus failure of an ordinary entrepreneur isn't headline news but put icarus in the corporate boardroom and as david skeel vividly demonstrates the ripple effects can be profound ever since the first large scale corporations emerged in the nineteenth century their ability to tap huge amounts of capital and the sheer number of lives they affect has meant that their executives play for far greater stakes excessive and sometimes fraudulent risks competition and the increasing size and complexity of organizations these three factors have been at the heart of every corporate breakdown from 1873 when financial genius jay cooke collapsed to the corporate scandals of the early 21st century compounding the scandals is an ongoing cat and mouse game between regulators efforts to police the three factors that lead to icarus effect failures and efforts by corporate america to evade this regulation in the name of efficiency and flexibility these efforts to side step oversight can rapidly spiral out of control setting the stage for the devastating corporate failures that punctuate american business history but there is also a silver lining to the stunning failures the outrage they provoke galvanizes public opinion in favor of corporate reform the most important american business regulation has always been enacted in response to a major breakdown in corporate america today's business environment poses unprecedented perils for the average american as for the first time ever more than half of americans now own stock identifying the problems of the past skeel offers a strikingly new diagnosis of the fundamental flaws in corporate america today and of what can be done to fix them

United States Circuit Courts of Appeals Reports 1896 baptizing business sifts through popular perceptions regarding the relationship between business and religion and the agenda of conservative christian business leaders drawing on personal interviews with the most diverse group of evangelical executives yet studied while stereotypes and previous research both emphasize the perceived incompatibility of religious mandates and business objectives bradley c smith argues that evangelical executives experience tension not because business and religion are inherently opposed but because they are made to feel like second class citizens by members of their own faith communities indeed in cases of apparent conflict between faith and business evangelical executives insist that it is faith not business that must be reconceived smith reveals that evangelical business leaders are as inclined to export business concepts into other domains as to import religious objectives into business contexts prompting us to reconsider the direction of influence between religious and economic life baptizing business is filled with compelling stories that paint a nuanced unbiased picture of the increasing influence of intensely religious business leaders the spirit of capitalism defined by max weber as a positive attitude toward work and wealth finds ongoing embrace and new expression in evangelical executives and their accounts with implications for our understanding of the faith at work movement evangelicalism and the role of religion among elites

The Railway and Corporation Law Journal 1887 i began this book to articulate my sense of disappointment and alienation from the status i had fought so hard to achieve a remarkable admission from an alumnus of harvard law school who has held tenured professorships in the law schools of yale and stanford and has taught in the law schools of harvard and chicago in this personal reflection on the status of higher education julius getman probes the tensions between status and meaning elitism and egalitarianism that challenge the academy and academics today he shows how higher education creates a shared intellectual community among people of varied races and classes while simultaneously dividing people on the basis of education and status in the course of his explorations getman touches on many of the most current issues in higher education today including the conflict between teaching and research challenges to academic freedom the struggle over multiculturalism and the impact of minority and feminist activism getman presents these issues through relevant often humorous anecdotes using his own and others experiences in coping with the constantly changing academic landscape written from a liberal perspective the book offers another side of the story told in such works as allan bloom s *the closing of the american mind* and roger kimball s *tenured radicals*
