Exploration and Hunting in Central Africa 1895-96 1898 example in this ebook it has been the business of my life to teach history and the informal division of labour which comes to pass in a university has led me to pay special attention to the military side of it this aspect of history involves much comparison of statements and weighing of evidence and is therefore calculated to be very useful to those for whom the study of history is not their permanent occupation but the means of completing their mental training campaigns and battles present in an exceptionally clear shape the stock problems of history what was done why it was done what were the results what ought to have been done what would have been the consequences if this or that important detail had been different it is however not easy to gain from books a clear general idea of a campaign or a battle harder perhaps than to obtain a similar grasp of the work of a legislator or of the drift of a social change to the ordinary historian the military side is only one aspect of his theme and very possibly an aspect which interests him but little he narrates the facts as given him by his authorities but when these are vague as mediæval writers mostly are or discrepant as modern writers are who mean to be precise and write from different standpoints he need be something of an expert to make his narrative lifelike on the other hand purely military works are very reasonably technical they are written for experts to whom the technical language is familiar and they often go into considerable detail ordinary readers are apt consequently to want help in obtaining from them a clear idea of the outline of events like pindar s poetic shafts they are φωνᾶντα συνετοῖσιν ἐξ δὲ τοπᾶν ἔρμηνέων χατίζει having experienced these difficulties myself both as student and as teacher i have thought that i might render some service by trying to act as interpreter and to describe the chief military events of english history in a way which shall not be technical but yet shall bring out their meaning i do not write for experts though it is they who must judge whether i have described correctly i write for those who do not know much about battles and would like to understand events which are interesting in themselves and are great turning points in history they must judge whether i have described intelligibly if i have met the proverbial fate of those who sit on two stools it is not for want of pains in trying to keep my balance i feel that it is prima facie presumptuous for a civilian to write what is in some sense a military book but after all it is the customer who feels where the shoe pinches moreover many of the battles of english history occurred in past ages in relation to which the professional training of a modern soldier would teach him little beyond the permanent principles of strategy which every educated man should understand given also an elementary knowledge of tactics which has spread pretty widely in this country since volunteering began and the war game became popular a civilian ought to be able to deal adequately with hastings and crecy with towton and marston moor if not with the campaigns of marlborough and wellington if i have failed it is not because the subject is outside the province of a civilian but because the writer has been unequal to his task to be continue in this ebook
