science has always created problems for traditional ways of seeing things but now the very attributes that make us human free will the permanence of personal identity the existence of the soul are threatened by the science of the mind if the mind is the brain and therefore a physical object subject to deterministic laws how can we have free will if most of our thoughts and impulses are unconscious how can we be morally responsible for what we do if brains and bodies undergo relentless change how can our identities be constant the problem of the soul shows the way out of these paradoxes framing the conflict in terms of two dominant visions of the mind the manifest image of humanistic philosophy and theology and the scientific image

owen flanagan demonstrates that there is common ground and that we need not give up our ideas of moral responsibility and personal freedom in order to have an empirically sound view of the human mind this is a profoundly relevant work of philosophy for the common reader

ultimately i propose that considering internalization as embodiment is a critical methodological shift in understanding mystical methods in general and especially for probing recollection mysticism in depth the inner man as opposed to the outer man is a pauline and lutheran commonplace that is too frequently taken out of context leading historians of the renaissance in general and of spanish renaissance religion in particular to value references to internal or mental methods of spirituality as an improvement over external or bodily rituals this book takes its cue from the recent cognitive turn in medieval studies that complicates studies of the body in religion by focusing on the embodied aspects of cognition claiming a continuum between body and soul rather than a hierarchy i argue that medieval theories of cognition made the divorce of the body from the soul impossible for a galenic doctor even one who spoke of the body and the world with contempt and by implication impossible for his castilian audience without serious consideration of laredo s reliance on an embodied soul rather than on a body soul dualism therefore no proper assessment of the unitive stage of recogimiento can be made introduction p 6 7
