Dot Grid Journal: Mermaid, Mercats & Mertails bullet Journaling for Newbies // (Beginner Friendly .2mm Matrix Paper Notebook Plus 12) Sampl 2019-05-24

this book explores social media and technology across the lifespan the authors argue that those of different ages and life stages have very diverse experiences with these types of media and demonstrate the importance of analysing the entire lifespan in the context of technology use they acknowledge and celebrate social media for the positives that it can bring to our lives but also recognise that there may be challenges for particular developmental stages

Example 2017-09-21

improving the measurement of symptoms of emotional disorders has been an important goal of mental health research in direct response to this need the expanded version of the inventory of depression and anxiety symptoms (IDAS II) was developed to assess symptom dimensions underlying psychological disorders unlike other scales that serve as screening instruments used for diagnostic purposes the IDAS II is not closely tethered to the diagnostic and statistical manual of mental disorders (DSM) rather its scales cut across DSM boundaries to examine psychopathology in a dimensional rather than a categorical way developed by authors David Watson and Michael O'Hara the IDAS II has broad implications for our understanding of psychopathology understanding the emotional disorders is the first manual for how to use the IDAS II and examines important replicable symptom dimensions contained within five adjacent diagnostic classes in the DSM 5 depressive disorders bipolar and related disorders anxiety disorders obsessive compulsive and related disorders and trauma and stressor related disorders it reviews problems and limitations associated with traditional diagnosis based approaches to studying psychopathology and establishes the theoretical and clinical value of analyzing specific types of symptoms within the emotional disorders it demonstrates that several of these disorders contain multiple symptom dimensions that clearly can be differentiated from one another moreover these symptom dimensions are highly robust and generalizable and can be identified in multiple types of data including self ratings semi structured interviews and clinicians ratings furthermore individual symptom dimensions often have strikingly different correlates such as varying levels of criterion validity incremental predictive power and diagnostic specificity consequently it is more informative to examine these specific types of symptoms rather than the broader disorders the book concludes with the development of a more comprehensive symptom based

model that subsumes various forms of psychopathology including sleep disturbances eating and weight related problems personality pathology psychosis thought disorder and hypochondriasis beyond the emotional disorders
