

Ebook free Tort (PDF)

written by two leading scholars tort law combines detailed coverage of the legal principles supported by hypothetical case scenarios and guided further reading with critical discussion of the key academic debates and literature in the subject making it ideal for use by anyone studying tort law at undergraduate or postgraduate level extensively updated this new edition covers all important case law and legislative developments including the expansion of vicarious liability in *mohamud v wm morrison supermarkets* the treatment of the notion of defect under the consumer protection act 1987 in *wilkes v depuy international ltd* the reinvigoration of the tort in *wilkinson v downton* by *o a child v rhodes* the recognition of a tort of the malicious institution of civil proceedings in *willers v joyce* and the attempts to reform the law on the defence of illegality in *patel v mirza* the law express series is designed to help you revise effectively this book is your guide to understanding essential concepts remembering and applying key legislation and making your answers stand out join over half a million students who chose to revise with law express revise with the help of the uk s bestselling law revision series features review essential cases statutes and legal terms before exams assess and approach the subject by using expert advice gain higher marks with tips for advanced thinking and further discussions avoid common pitfalls with don t be tempted to practice answering sample questions and discover additional resources on the companion website pearsoned.co.uk/lawexpress this captivating book explores uncharted territory in tort law shedding light on underexplored viewpoints in the field the collection brings issues of social class race gender marginalisation vulnerability and harm into conversation with core tort law topics to encourage a more critical examination of the law and its impact on different groups of people written by experts in the main areas of tort law from negligence to defamation and personal torts chapters will deepen students understanding of the central concepts and practices of tort law uncover the power imbalances and privileges that underpin tort law decisions and their impact on lived experiences amplify under represented voices by signposting to the work and ideas of scholars that are less visible in the field integrating marginalised perspectives into the curriculum and discourse this indispensable textbook paves the way for a more inclusive and comprehensive understanding of tort law chapter 9 available open access digitally under cc by licence

american courts routinely hand down harsh sentences to individual convicts but a very different standard of justice applies to corporations too big to jail takes readers into a complex compromised world of backroom deals for an unprecedented look at what happens when criminal charges are brought against a major company in the united states federal prosecutors benefit from expansive statutes that allow an entire firm to be held liable for a crime by a single employee but when prosecutors target the goliaths of the corporate world they find themselves at a huge disadvantage the government that bailed out corporations considered too economically important to fail also negotiates settlements permitting giant firms to avoid the consequences of criminal convictions presenting detailed data from more than a decade of federal cases brandon garrett reveals a pattern of negotiation and settlement in which prosecutors demand admissions of wrongdoing impose penalties and require structural reforms however those reforms are usually vaguely defined many companies pay no criminal fine and even the biggest blockbuster payments are often greatly reduced while companies must cooperate in the investigations high level employees tend to get off scot free the practical reality is that when prosecutors face hydra headed corporate defendants prepared to spend hundreds of millions on lawyers such agreements may be the only way to get any result at all too big to jail describes concrete ways to improve corporate law enforcement by insisting on more stringent prosecution agreements ongoing judicial review and greater transparency from the bestselling law express revision series law express question and answer tort law is designed to ensure you get the most marks for every answer you write by improving your understanding of what examiners are looking for helping you to focus in on the question being asked and showing you how to make even a strong answer stand out this book provides a critical socio legal study that brings together the latest scholarly advances on corporate social responsibility and at the same time addresses the pressing issue of corporate liability for harmful acts across the supply and production chains corporations have seldom been held responsible and virtually never liable for the acts of their subsidiaries and subcontractors

actors as different as workers investors individual consumers and shareholder activists claim that corporations should accept greater responsibility for communities and environments affected by their activities the book argues that a global value chain s head corporations remain immune to any liability because of the economically dependent legally independent relationships between core corporations and their periphery suppliers and subcontractors to tackle this problem globally the author acknowledges that we as a society need to reduce the economic dependence as described above which is far too excessive by ensuring a level playing field both economically and socially more concretely she argues that in order to realise transnational corporate liability we as lawyers need to find a way or ways to establish legally effective relationships between head corporations and their economically dependent entities readers of this book will be able to export the concept of corporate social liability developed in the context of value chains and apply it to other contexts involving corporate activities where they need to tackle unrestrained corporate freedom and make global businesses responsible and socially useful in recent years there has been a growing interest in the legal aspects of mass torts in europe both academics legislatures courts and policymakers throughout the whole of europe have been struggling with the challenges that such massification of private law relationships poses both in and outside of tort law the subject moves between the law of civil procedure substantive tort law access to justice debates and regulatory frameworks for mass disputes this volume offers both a kaleidoscopic review of real life key cases of mass tort and an in depth reflection on the broader implications of mass tort in europe thus the challenges posed by mass torts are explored mapped and analysed this book is the first book length analysis of investor accountability under general and customary international law international human rights law international environmental law international humanitarian law as well as international investment law international investment law is currently facing growing criticisms for its failure to address corruption abuse environmental damage and other forms of investor misconduct reform initiatives range from the rejection of international law as a governing regime for investors to the dramatic overhaul of investment treaties that supposedly enable investor overprotection to the creation of a multilateral international instrument that would enable the litigation of claims against errant businesses before an international tribunal whether these initiatives succeed in disciplining investors remains to be seen what these initiatives undeniably show however is that change is warranted to counteract this lopsided investors international law each chapter in the book addresses a different and underexplored dimension of investor accountability thus offering a novel and consolidated study of international law the book will be of immense assistance to legal practitioners academics and policy makers involved in the design drafting application and reform of various international instruments addressing investor accountability where products develop ever more rapidly the law may face difficulties in responding accordingly to new security threats which may arise in the field of product liability an extraordinary need for legal development has thus been perceived with legislators and judges feeling compelled to find new solutions and to look across borders for these in the detailed reports in this book the world tort law society proves that it is in an ideal position to examine the most significant concepts the report on north america studies the special regime for product liability from its origin in the case law of the us the european report is centred around the eu product liability directive with its merits and faults and the influence of these two systems as well as new answers are shown in the reports on asia russia and four key jurisdictions in the rest of the world similar questions are discussed worldwide how can a strict liability regime for products be justified and can it be justified in all cases how does the special regime relate to general rules of tort law should services be subject to a similar regime the members of the society seek to provoke thought for solutions to these pervasive problems in this spirit the volume s comparative conclusions invite discussion and the book includes four responses to that call from eminent tort lawyers from different legal backgrounds this book critically evaluates the eu regulatory framework for the liability of host internet service providers isps for copyright and trade mark infringements and provides a cluster of novel recommendations for its improvement the book recommends the imposition of a duty of care to host isps to curb the dissemination of unauthorised works and counterfeit goods the ascription of a transparency obligation to host isps towards their users and the establishment of a supervisory authority for host isps host isps have facilitated the dissemination of content amongst users and the purchase of goods online enabling copyright

holders and brand owners to attract a greater audience for their works and goods however their services have attracted a high number of copyright and trade mark violations too neither article 14 of the e commerce directive nor article 17 of the copyright in the digital single market directive provide a solid response to the issue of host isps liability this book is a valuable resource for researchers in it and ip law and offers a new perspective for resolving online ip disputes understanding the risks involved in hiring new faculty is becoming increasingly important in managing risk in high stakes faculty employment decisions julee t flood and terry leap critically examine the landscape of us institutions of higher learning and the legal and human resource management practices pertinent to college and university faculty members to help minimize the potential pitfalls in the hiring and promotion processes flood and leap suggest ways that risk management principles can be applied within the unique culture of academia claims of workplace harassment and discrimination violation of free speech and other first amendment rights social movements decrying unequal hiring practices and the growing number of non tenure track and adjunct faculty require those involved in hiring and promotion decisions to be more knowledgeable about contract law best practices in hiring and risk management yet many newly appointed administrators are often not sufficiently trained in these matters or in understanding how they might be applied in an academic setting human resource departments hiring committees department chairs and academics seeking faculty jobs need resources such as managing risk in high stakes faculty employment decisions now more than ever outlines critical issues affecting u s higher education analyzes the social and psychological biases that can arise during hiring promotion and tenure decisions discusses contract and constitutional law from the perspective of institutions of higher learning illustrates complex interactions that shape contractual constitutional and collegial issues in institutions of higher learning examines contract rights and controversies for tenured and tenure track faculty describes how risk management processes can help to deal with these complicated but critical issues addresses constitutional issues associated with academic freedom and free speech on campus investigates the nebulous but important issue of collegiality discusses the future for institutions of higher learning in hiring faculty in recent years several cases concerning the liability of directors and officers have courted controversy arguments raised in such discussions oscillate between two extremes on the one hand the need for governing bodies to give a space to entrepreneurial discretion and on the other hand to ensure the protection of investors in and creditors of a company from the consequences of disadvantageous decisions by those bodies in light of the geographical dispersal of the above stakeholders the study offers a comparative insight into the liability of directors and officers in 10 key european jurisdictions in particular austria czech republic germany italy the netherlands norway poland spain and switzerland and 4 non european jurisdictions namely brazil israel turkey and the united states amongst other things it investigates existing company law principles on the topic and examines their interaction with tort law and other fields with a view to suggesting principles for better stakeholder protection national reports are complemented by an economic analysis and insurance conflict of laws and comparative reports the study also benefits from case study analyses

integrity written by an international team of both established and early career scholars from various disciplines and backgrounds the chapters cover the most pressing and contemporary issues in environmental law and governance these include access and benefit sharing the right to food and water climate change coping and adaptation human rights the rights of indigenous communities public and environmental health and many more the book has a general focus on environmental governance and law in the european union and offers points of comparison with canada and north and south america this totally revised second edition is a comprehensive volume presenting authoritative information on the management challenges facing today s clinical laboratories provides thorough coverage of management topics such as managerial leadership personnel business planning information management regulatory management reimbursement generation of revenue and more includes valuable administrative resources including checklists worksheets forms and online resources serves as an essential resource for all clinical laboratories from the physician s office to hospital clinical labs to the largest commercial reference laboratories providing practical information in the fields of medicine and healthcare clinical pathology and clinical laboratory management for practitioners managers and individuals training to enter these fields this book explores relevant questions within this multi faceted and rapidly growing field and will help to define and foster scholarship within the intersection of neuroethics and clinical neuroscience the regulatory technology handbook the transformational potential of regtech has been confirmed in recent years with us 1 2 billion invested in start ups 2017 and an expected additional spending of us 100 billion by 2020 regulatory technology will not only provide efficiency gains for compliance and reporting functions it will radically change market structure and supervision this book the first of its kind is providing a comprehensive and invaluable source of information aimed at corporates regulators compliance professionals start ups and policy makers the regtech book brings into a single volume the curated industry expertise delivered by subject matter experts it serves as a single reference point to understand the regtech eco system and its impact on the industry readers will learn foundational notions such as the economic impact of digitization and datafication of regulation how new technologies artificial intelligence blockchain are applied to compliance business use cases of regtech for cost reduction and new product origination the future regulatory landscape affecting financial institutions technology companies and other industries edited by world class academics and written by compliance professionals regulators entrepreneurs and business leaders the regtech book represents an invaluable resource that paves the way for 21st century regulatory innovation what should be the role of the criminal law in controlling corporate behavior and how can the execution of that role be improved on the one hand corporations have enormous power and when a corporation causes harm there is a natural instinct to apply criminal sanctions society s most serious expression of moral disapproval in the wake of a harm in which a corporation had a prominent role there are often calls for an increased use of the criminal law to tame corporate excesses on the other hand criminal liability has historically usually required criminal intent a concept that applies oddly to a legal construction such as a corporation and more recently critics have decried what they have termed the overcriminalization of corporate behavior suggesting that there has been an overreliance on the use of criminal law in this context to provide guidance to policymakers on the proper role of criminal sanctions in this context rand corporation researchers 1 measure the current use of criminal sanctions in controlling corporate behavior 2 describe how the current regime developed and 3 offer suggestions about how the use of criminal sanctions to control corporate behavior might be improved unedited summary from book cover the medical legal aspects of acute care medicine a resource for clinicians administrators and risk managers is a comprehensive resource intended to provide a state of the art overview of complex ethical regulatory and legal issues of importance to clinical healthcare professionals in the area of acute care medicine including for example physicians advanced practice providers nurses pharmacists social workers and care managers in addition this book also covers key legal and regulatory issues relevant to non clinicians such as hospital and practice administrators department heads educators and risk managers this text reviews traditional and emerging areas of ethical and legal controversies in healthcare such as resuscitation mass casualty event response and triage patient autonomy and shared decision making medical research and teaching ethical and legal issues in the care of the mental health patient and medical record

documentation and confidentiality furthermore this volume includes chapters dedicated to critically important topics such as team leadership the team model of clinical care drug and device regulation professional negligence clinical education the law of corporations tele medicine and e health medical errors and the culture of safety regulatory compliance the regulation of clinical laboratories the law of insurance and a practical overview of claims management and billing authored by experts in the field the medical legal aspects of acute care medicine a resource for clinicians administrators and risk managers is a valuable resource for all clinical and non clinical healthcare professionals this open access book reflects on matters of social and ethical concern raised in the daily practices of those working in and around precision oncology each chapter addresses the experiences concerns and issues at stake for people who work in settings where precision oncology is practiced enacted imagined or discussed it subsequently discusses and analyses bioethical dilemmas scientific challenges and economic trade offs the need for new policies further technological innovation social work as well as phenomenological research this volume takes a broad actor centred perspective as whenever cancer is present the range of actors with issues at stake appears almost unlimited this perspective and approach opens up the possibility for further in depth and diverse questions posed by the actors themselves such as how are cancer researchers navigating biological uncertainties how do clinicians and policy makers address ethical dilemmas around prioritisation of care what are the patients experiences with and hopes for precision oncology how do policy makers and entrepreneurs envisage precision oncology these questions are of great interest to a broad audience including cancer researchers oncologists policy makers medical ethicists and philosophers social scientists patients and health economists

almost nine months since the first recorded case the novel betacoronavirus severe acute respiratory syndrome coronavirus 2 sars cov 2 has now passed 18 million confirmed cases the multi disciplinary work of researchers worldwide has provided a far deeper understanding of covid 19 pathogenesis clinical treatment and outcomes lethality disease spread dynamics period of infectivity containment interventions as well as providing a wealth of relevant epidemiological data with 27 vaccines currently undergoing human trials and countries worldwide continuing to battle case numbers or prepare for resurgences the need for efficient high quality pipelines for peer reviewed research remains as crucial as ever for this ebook and the associated research topic in frontiers in genetics entitled cancer associated defects in the dna damage response drivers for malignant transformation and potential therapeutic targets we have selected 10 papers that each discusses important yet distinct aspects of the response to dna damage in normal cells and cancer cells using an evolutionary conserved signaling network called the dna damage response ddr cells maintain the integrity of their genome and thus safeguard cellular functioning and the ability to create viably progeny initially the ddr appeared to consist of few linear kinase driven pathways however research over the past decades in model organisms as well as in the human system has revealed that the ddr is a complex signaling network wired by multiple parallel pathways and displaying extensive crosstalk besides phosphorylation multiple other post translational modifications including ubiquitination and sumoylation are involved to achieve chromatin remodeling and initiation of dna repair also rather than being a cell intrinsic phenomenon we increasingly appreciate that cell cell communication is involved the recognition and repair of dna damage is essential to maintain normal physiology multiple pathological conditions have been attributed to defective dna repair most notably accelerated aging neurodegeneration and cancer in the context of cancer through repair of dna damage or elimination of irreparably damaged cells the ddr clearly has a tumor suppressive role indeed many tumor cells show partially inactivated ddr signaling which allows proliferation in the context of dna damage inducing oncogenes simultaneously loss of specific ddr signaling nodes creates a specific dependence of tumor cells on their remaining ddr components and thus creates therapeutic opportunities especially in the context of cancer treatment numerous targeted agents are under investigation either to potentiate the cytotoxic effects of chemo radiotherapy or to induce synthetic lethality with cancer specific alterations with the treatment of brca1 2 mutant cancers with parp1 inhibitors

as a prototype example we have selected four review articles that provide insight into the key components and the wiring of the ddr and dna repair *torgovnick and schumacher* review the involvement of dna repair in the initiation and treatment of cancer *brinkmann et al* describe the involvement of ubiquitination in dna damage signaling and *jaiswal and lindqvist* discuss how cell extrinsic signaling participates in communication of dna damage to neighboring cells in addition *shatneyeva and colleagues* review the connection between the cellular response to dna damage and escape from immune surveillance concerning the therapeutic application of targeting the ddr and dna repair three articles were included *krajewska and van vugt* review the wiring of homologous recombination and how this offers therapeutic opportunities additionally *knittel and colleagues* describe how genetic loss of the central ddr component *atm* in chronic lymphocytic leukemia can be exploited therapeutically by targeting certain parallel dna repair pathways *syljuasen and colleagues* report on how targeting of the ddr can be used as a therapeutic strategy in lung cancer finally three chapters describe newly identified regulators of the cellular response to dna damage *von morgen et al* describe the *r2tp* complex *lezzi and fanciluuli* review the involvement of *che 1 aatf* in the ddr and *ohms and co* authors describe how retrotransposons are at the basis of increased genomic instability altogether these articles describe how defective responses to dna damage underlie disease and especially in the context of cancer can be exploited to better treat disease
