how should we live according to philosopher and biologist massimo pigliucci the greatest guidance to this essential question lies in combining the wisdom of 24 centuries of philosophy with the latest research from 21st century science in answers for aristotle pigliucci argues that the combination of science and philosophy first pioneered by aristotle offers us the best possible tool for understanding the world and ourselves as aristotle knew each mode of thought has the power to clarify the other science provides facts and philosophy helps us reflect on the values with which to assess them but over the centuries the two have become uncoupled leaving us with questions about morality love friendship justice and politics that neither field could fully answer on its own pigliucci argues that only by rejoining each other can modern science and philosophy reach their full potential while

we harness them to help us reach ours pigliucci  
discusses such essential issues as how to tell right  
from wrong the nature of love and friendship and  
whether we can really ever know ourselves all in  
service of helping us find our path to the best
