this accessible and cutting edge work offers a new look at the history of western civilization one that brings into focus the interrelated suffering of oppressed humans and other animals nibert argues persuasively that throughout history the exploitation of other animals has gone hand in hand with the oppression of women people of color and other oppressed groups he maintains that the oppression both of humans and of other species of animals is inextricably tangled within the structure of social arrangements nibert asserts that human use and mistreatment of other animals are not natural and do little to further the human condition nibert s analysis emphasizes the economic and elite driven character of prejudice discrimination and institutionalized repression of humans and other animals his examination of the economic entanglements of the oppression of human and other animals is supplemented with an analysis of ideological forces and the use of state power in this sociological expose of the grotesque uses of the oppressed past and present nibert suggests that the liberation of devalued groups of humans is unlikely in a world that uses other animals as fodder for the continual growth and expansion of transnational corporations and conversely that animal liberation cannot take place when humans continue to be exploited and oppressed

this innovative volume focuses on tourism through the twin lenses of cultural theory and cultural geography presenting a set of innovative case studies on tourist destinations around the world the contributors explore the paradoxes of the tourist experience and the implications of these paradoxes for our broader understanding of the problems of modernity and identity the book examines how tourism reveals the paradoxical ways that places are both mobile and rooted real and fake inhabited by those who are simultaneously insiders and outsiders and both subjectively experienced and objectively viewed the concepts of travel and mobility long have been used to explain modern identity and social behavior but this work pushes beyond the established literature by considering the ways that place and mobility are inherently related in unexpected even contradictory ways travel the international cast of authors contends occurs in place rather than between places thus instead of offering yet another interpretation of the ways modern societies are distinguished by their mobilities in contrast to the supposed place bound quality of traditional societies the chapters here collectively argue for an understanding of modern identity as simultaneously grounded and mobile this rich blend of empirical and theoretical analysis will be invaluable for cultural geographers anthropologists and sociologists of tourism
