with 1992 includes electronic journals electronic newsletters hypercard stacks digest newsletters and academic discussion lists and interest groups this book on canonical duality theory provides a comprehensive review of its philosophical origin physics foundation and mathematical statements in both finite and infinite dimensional spaces a ground breaking methodological theory canonical duality theory can be used for modeling complex systems within a unified framework and for solving a large class of challenging problems in multidisciplinary fields in engineering mathematics and the sciences this volume places a particular emphasis on canonical duality theory s role in bridging the gap between non convex analysis mechanics and global optimization with 18 total chapters written by experts in their fields this volume provides a nonconventional theory for unified understanding of the fundamental difficulties in large deformation mechanics bifurcation chaos in nonlinear science and the np hard problems in global optimization additionally readers will find a unified methodology and powerful algorithms for solving challenging problems in complex systems with real world applications in non convex analysis non monotone variational inequalities integer programming topology optimization post buckling of large deformed structures etc researchers and graduate students will find explanation and potential applications in multidisciplinary fields sustainability ethics is a comprehensive exploration of the ethical dimensions of sustainability the book delves into the complex relationships between ethics and sustainable development examining the role of ethics in promoting a better world for all the lens of sustainability ethics considers the interdependence of environmental social and economic factors this provides a holistic understanding of the subject matter issues covered include the interconnectedness of people s rights planetary wellbeing prosperity responsibility and service to future generations protecting sustainable human security preserving biodiversity and nature rights welcoming forced migrants and climate refugees promoting labor and children s rights advocating for human and indigenous rights and fostering the inclusion of women and lgbtqi rights the author concludes by synthesizing the various themes and offers insights for ethical discernments and sustainable ethical decision making and for building a better world for everyone throughout the book readers will find references to relevant literature providing a solid foundation for further exploration of sustainability ethics the audience for this important book includes academics researchers students policymakers and practitioners in the fields of sustainability environmental ethics and social justice and for anyone interested in understanding the ethical dimensions of sustainability and exploring practical solutions to create a more just inclusive and sustainable world wicked problems are those problems facing the planet and its inhabitants present and future which are hard if not impossible to resolve and for which bold creative and messy solutions are typically required the adjective wicked describes the mischievous and even evil quality of these problems where proposed

solutions often turn out to be worse than the symptoms this wide ranging and innovative book encourages readers to think about archaeology in an entirely new way as fresh relevant and future oriented it examines some of the novel ways that archaeology alongside cultural heritage practice can contribute to resolving some of the world s most wicked problems or global challenges as they are sometimes known with chapters covering climate change environmental pollution health and wellbeing social injustice and conflict the book uses many and diverse examples to explain how through studying the past and present through an archaeological lens in ways that are creative ambitious and both inter and transdisciplinary significant small wins can be achieved through these small wins archaeologists can help to mitigate some of those most pressing of wicked problems contributing therefore to a safer healthier and more stable world this book introduces neurourology as an emerging interdisciplinary area that covers the basic and clinical studies of the neural control on the normal lower urinary tract and the lower upper urinary tract dysfunction due to neuropathy disorders it systematically describes all aspects of neurourology from the epidemiology of the neurogenic bladder to the pathology and pathophysiology of the lower urinary tract to the diagnosis and treatment of the neurogenic bladder by conservative therapies or surgeries this book provides a useful resource for medical doctors nurses and students in the field of neurourological conditions in this 2nd edition 15 chapters are added e g on urodynamic practice psychogenic reasons of luts standard of care physiotherapy upper urinary tract rehabilitation to enable self catheterization pediatric neurourology new surgical procedures the editors have invited an impressive number of renowned contributors including 98 internationally recognized specialists in this field from 25 countries in europe asia north america and south america this handbook provides a useful resource for medical doctors nurses and students in the field of neurourological conditions this book reviews the sources extraction processing and applications of value added compounds from agro waste with a focus on drug delivery tea apple pomace lignin nanocomposites bioethanol fertilizers and sitosterol food residues provide bioactive molecules enzymes vitamins antioxidants and animal feed in this issue of critical care nursing clinics guest editor leslie altimier dnp rnc ne bc brings her considerable expertise to the topic of neonatal nursing clinical concepts and practice implications part 2 top experts provide clinical reviews covering prenatal bonding optimizing family centered care neonatal pain palliative care language developments in infants and much more with a focus on best practices and improving patient outcomes contains 12 relevant practice oriented topics including neuroprotective infant and family centered developmental care for the tiniest nicu babies perspectives from the team new opioids psychoactive drugs and synthetic marijuana neonatal abstinence syndrome and neonatal opioid withdrawal syndrome best practices to support maternal mental health during the transition from nicu to home parental views about autopsy organ donation and research donation and more provides in depth clinical reviews on neonatal nursing offering actionable insights for clinical practice presents the latest information on this timely focused topic under the leadership of experienced editors in the field authors synthesize and distill the latest research and

practice guidelines to create clinically significant topic based reviews engaging systematically with severe forms of poverty in europe this important book stimulates academic public and policy debate by shedding light on aspects of deprivation and exclusion of people in absolute poverty in affluent societies it examines issues such as access to health care housing and nutrition poverty related shame and violence the book investigates different policy and civic responses to extreme poverty ranging from food donations to penalisation and social cleansing of highly visible poor and how it is related to concerns of ethics justice and human dignity this book presents the findings of a comparative study of three european metropolitan regions vienna barcelona and stockholm the heart of the work consists of empirical studies carefully designed and developed in order to identify the main actors and mechanisms supporting technological innovation in each of the metropolitan regions the authors have also highlighted the similarities and differences across regions and countries investigating how these came to be and discussing the possible implications the introductory as well as the concluding chapter was written by manfred m fischer who assisted by attila varga was also responsible for chapter 2 on the metropolitan region of vienna javier revilla diez contributed chapter 3 on the barcelona metropolitan region folke snickars has provided chapter 4 which examines the metropolitan region of stockholm and all authors have reviewed and commented on the whole contents so that the volume represents a collective endeavour which has been rendered as homogeneous as possible a particular effort has been made to ensure that the study is based on a common conceptual framework distance learning is for leaders practitioners and decision makers in the fields of distance learning e learning telecommunications and related areas it is a professional journal with applicable information for those involved with providing instruction to all kinds of learners of all ages using telecommunications technologies of all types stories are written by practitioners for practitioners with the intent of providing usable information and ideas articles are accepted from authors new and experienced with interesting and important information about the effective practice of distance teaching and learning distance learning is published quarterly each issue includes eight to ten articles and three to four columns including the highly regarded and finally column covering recent important issues in the field and written by distance learning editor michael simonson articles are written by practitioners from various countries and locations nationally and internationally this special issue explores the cross disciplinary approaches methodologies and applications of socio environmental vulnerability assessment that can be incorporated into sustainable management the volume comprises 20 different points of view which cover environmental protection and development urban planning geography public policymaking participation processes and other cross disciplinary fields the articles collected in this volume come from all over the world and present the current state of the world s environmental and social systems at a local regional and national level new approaches and analytical tools for the assessment of environmental and social systems are studied the practical implementation of sustainable development as well as progressive environmental and development policymaking are discussed finally the

authors deliberate about the perspectives of social environmental systems in a rapidly changing world we are being poisoned and this book is sounding a well informed alarm read it get educated and then join the thousands rising up against those who care more for profit than the health of our bodies and our earth

ensler new york times bestselling author chemical poisons have infiltrated all facets of our lives housing agriculture work places sidewalks subways schools parks even the air we breathe more than half a century since rachel carson issued silent spring her call to arms against the poisoning of our drinking water food animals air and the natural environment the fight against monsanto s roundup takes a fresh look at the politics underlying the mass use of pesticides and the challenges people around the world are making against the purveyors of poison and the governments that enable them the scientists and activists contributing to the fight against monsanto s roundup edited by long time green activist mitchel cohen explore not only the dangers of glyphosate better known as roundup but the campaign resulting in glyphosate being declared as a probable cancer causing agent in an age where banned pesticides are simply replaced with newer and more deadly ones and where corporations such as monsanto bayer dow and dupont scuttle attempts to regulate the products they manufacture what is the effective practical and philosophical framework for banning glyphosate and other pesticides the fight against monsanto s roundup the politics of pesticides takes lessons from activists who have come before and offers a radical approach that is essential for defending life on this planet and creating for our kids and for ourselves a future worth living in this two volume set lncs 13398 and lncs 13399 constitutes the refereed proceedings of the 17th international conference on parallel problem solving from nature ppsn 2022 held in dortmund germany in september 2022 the 87 revised full papers were carefully reviewed and selected from numerous submissions the conference presents a study of computing methods derived from natural models amorphous computing artificial life artificial ant systems artificial immune systems artificial neural networks cellular automata evolutionary computation swarm computing self organizing systems chemical computation molecular computation quantum computation machine learning and artificial intelligence approaches using natural computing methods are just some of the topics covered in this field

with its theme our information always and forever part i of this book covers the basics of personal information management pim including six essential activities of pim and six different ways in which information can be personal to us part i then goes on to explore key issues that arise in the great migration of our information onto the and into a myriad of mobile devices part 2 provides a more focused look at technologies for managing information that promise to profoundly alter our practices of pim and through these practices the way we lead our lives part 2 is in five chapters chapter 5 technologies of input and output technologies in support of gesture touch voice and even eye movements combine to support a more natural user interface nui technologies of output include glasses and watch watches output will also increasingly be animated with options to zoom chapter 6 technologies to save our information we can opt for life logs to record our experiences with increasing fidelity what will we use

these logs for and what isn't recorded that should be chapter 7 technologies to search our information the potential for personalized search is enormous and mostly yet to be realized persistent searches situated in our information landscape will allow us to maintain a diversity of projects and areas of interest without a need to continually switch from one to another to handle incoming information chapter 8 technologies to structure our information structure is key if we are to keep find and make effective use of our information but how best to structure and how best to share structured information between the applications we use with other people and also with ourselves over time what lessons can we draw from the failures and successes in web based efforts to share structure chapter 9 pim transformed and transforming stories from the past present and future part 2 concludes with a comparison between Licklider's world of information in 1957 and our own world of information today and then we consider what the world of information is likely to look like in 2057 Licklider estimated that he spent 85% of his thinking time in activities that were clerical and mechanical and might someday be delegated to the computer what percentage of our own time is spent with the clerical and mechanical what about in 2057 translation technologies are moulded by and impact upon humans in all sorts of ways this state of the art volume looks at translation technologies from the point of view of the human users as trainee professional or volunteer translators or as end users of translations produced by machines covering technologies from machine translation to online collaborative platforms and practices from traditional translation to crowdsourced translation and subtitling this volume takes a critical stance questioning both utopian and dystopian visions of translation technology in eight chapters the authors propose ideas on how technologies can better serve translators and end users of translations the first four chapters explore how translators in various contexts and with widely differing profiles use and feel about translation technologies as they currently stand while the second four chapters focus on the future on anticipating needs identifying emerging possibilities and defining interventions that can help to shape translation practice and research drawing on a range of theories from cognitive to social and psychological and with empirical evidence of what the technologization of the workplace means to translators human issues in translation technology is key reading for all those involved in translation and technology translation theory and translation research methods machine learning continues to have myriad applications across industries and fields to ensure this technology is utilized appropriately and to its full potential organizations must better understand exactly how and where it can be adapted further study on the applications of machine learning is required to discover its best practices challenges and strategies the research anthology on machine learning techniques methods and applications provides a thorough consideration of the innovative and emerging research within the area of machine learning the book discusses how the technology has been used in the past as well as potential ways it can be used in the future to ensure industries continue to develop and grow covering a range of topics such as artificial intelligence deep learning cybersecurity and robotics this major reference work is ideal for computer scientists managers researchers scholars

practitioners academicians instructors and students maintaining the importance of socio economic issues in devising transitional justice mechanisms this book examines the widespread practice of land grabbing in afghanistan on 3 september 2003 100 armed police officers bulldozed around 30 homes in the sherpur neighborhood of kabul afghanistan evicting over 250 people historically the land was part of the property of the ministry of defense of which a zone was allocated to the ministry s employees who had built homes and had lived there for nearly 30 years after the demolition however the land was distributed among 300 high ranking government officials including ministers deputy ministers governors and other powerful warlords land grabbing in afghanistan has become a widespread practice across the country based on over 50 semi structured interviews with key informants and group discussions with war victims and local experts in kabul the current book examines the relevance of transitional justice discourse and practice in response to this situation following a critical criminological concern with social harm the book maintains that it is not enough to consider a country s political history of violent conflict and the violation of civil and political rights alone rather to decide on appropriate transitional justice mechanisms it is crucial to consider a country s socio economic background and above all the socio economic harm inflicted on people during periods of violent conflict this original and detailed account of the socio economic challenges faced by transitional justice mechanisms will be of interest to those studying and working in this area in law politics development studies and criminology this book explores how companies combine technological innovation and competitive actions that create new opportunities for business growth in the international market the complexity of designing today s technology platforms requires profound knowledge in multiple areas technology development and commercialization as an ongoing competitive process involves enabling and inhibiting mechanisms which govern the speed and acceleration of technological innovation to compete more effectively potential competitors are using cooperation and pooling their resources for shared gain in areas where they do not compete directly thus a thorough examination of the current paradigms theories and frameworks is needed to increase our understanding of the technology innovation competitiveness linkages of business growth this book brings together recent developments and methodological contributions within technological innovation international competitiveness and business growth that bridge the existing gaps and simultaneously advances the debate on this research topic this edited volume brings closer two contemporary science education research areas nature of science nos and social justice sj it starts a dialogue on the characteristics of nos for sj with the purpose of advancing the existing discussion and creating new avenues for research using a variety of approaches and perspectives the authors of the different chapters engage in a dialogue on the construct of nos for sj its characteristics as well as ways of addressing it in science classrooms issues addressed are related to why a school science aiming at sj should address nos what nos related content skills and attitudes form the basis when aiming at sj and how school science can address nos for sj through a set of theoretical and empirical chapters the authors suggest answers but they also pose new questions on what nos for sj can mean and what issues need to be

taken into consideration in future research and practice chapter nature of science for social justice why what and how is available open access under a creative commons attribution 4 0 international license via link springer com this book compares and contrasts the principles and practices of rule based machine translation rbmt statistical machine translation smt and example based machine translation ebmt presenting numerous examples the text introduces language divergence as the fundamental challenge to machine translation emphasizes and works out word alignment explores ibm models of machine translation covers the mathematics of phrase based smt provides complete walk throughs of the working of interlingua based and transfer based rbmt and analyzes ebmt showing how translation parts can be extracted and recombined to automatically translate a new input breakthroughs in smart city implementation should give answers on a wide variety of present social political and technological problems green and long lasting solutions are needed in coming 10 years and beyond on areas as green and long lasting solutions for improving air quality quality of life of residents in cities traffic congestions and many more two consense branches established in china and in india report in six book chapters on initiatives needed to overcome the obvious shortcomings at present three more chapters complete this fifth consense book an introductory chapter concerning smart city from consense perspective a chapter showing that not technology but the people in the cities are most important and a chapter on recent results and prospects of human in the loop in smart vehicular systems this book with contributions by both leading scholars and industry experts provides a coherent framework for understanding complex determinants and patterns of industry competitiveness divided into eight parts it covers both quantitative and qualitative research on the following topics technologies economic development and human resources in industry 4 0 management in the digital economy artificial intelligence and knowledge management approaches drivers of sustainable and innovative development in corporations resilient and competitive systems in the energy sector compliance and anti corruption mechanisms and competence networks and technological integration thanks to its highly stimulating discussions on the determinants and patterns of industry competitiveness this book appeals to a wide readership this open access book seeks to create a forum for discussing key questions regarding theories on teaching which theories of teaching do we have what are their attributes what do they contain how are they generated how context sensitive and content specific do they need to be is it possible or even desirable to develop a comprehensive theory of teaching the book identifies areas of convergence and divergence among the answers to these questions by prominent international scholars in research on teaching initiating exchanges among the authors it then evaluates whether consensus can be reached on the areas of divergence the book concludes by discussing lessons learned from this endeavor and outlines steps that need to be taken for advancing future work on theorizing teaching as such the book is aimed at readers interested in an overview of the theorizing of teaching and key open questions that if addressed help to move the field forward this follow up to new york times bestseller the food babe way exposes the lies we ve been told about our food and takes readers on a journey to find healthy options there s so much

confusion about what to eat are you jumping from diet to diet and nothing seems to work are you sick of seeing contradictory health advice from experts just like the tobacco industry lied to us about the dangers of cigarettes the same untruths cover ups and deceptive practices are occurring in the food industry vani hari aka the food babe blows the lid off the lies we ve been fed about the food we eat lies about its nutrient value effects on our health label information and even the very science we base our food choices on you ll discover how nutrition research is manipulated by food company funded experts how to spot fake news generated by big food the tricks food companies use to make their food addictive why labels like all natural and non gmo aren t what they seem and how to identify the healthiest food food marketing hoaxes that persuade us into buying junk food disguised as health food vani guides you through a 48 hour toxin takedown to rid your pantry and your body of harmful chemicals a quick and easy plan that anyone can do a blueprint for living your life without preservatives artificial sweeteners additives food dyes or fillers eating foods that truly nourish you and support your health feeding you lies is the first step on a new path of truth in eating and a journey to your best health ever the 11th international conference on cyber warfare and security iccws 2016 is being held at boston university boston usa on the 17 18th march 2016 the conference chair is dr tanya zlateva and the programme chair is professor virginia greiman both from boston university iccws is a recognised cyber security event on the international research conferences calendar and provides a valuable platform for individuals to present their research findings display their work in progress and discuss conceptual and empirical advances in the area of cyber warfare and cyber security it provides an important opportunity for researchers and managers to come together with peers to share their experiences of using the varied and expanding range of cyberwar and cyber security research available to them the keynote speakers for the conference are daryl haegley from the department of defense dod who will address the topic control systems networks what s in your building and neal ziring from the national security agency who will be providing some insight to the issue of is security achievable a practical perspective iccws received 125 abstract submissions this year after the double blind peer review process there are 43 academic research papers 8 phd papers research papers 7 masters and 1 work in progress papers published in these conference proceedings these papers represent work from around the world including australia canada china czech republic district of columbia finland france israel japan lebanon netherlands pakistan russian federation saudi arabia south africa turkey united arab emirates uk usa businesses must confront a pressing challenge how to navigate the turbulent seas of market dynamics and technological advancements as traditional business models face obsolescence in the wake of relentless innovation enterprises failing to quickly to harness the power of advanced technologies risk fading into obscurity this predicament sets the stage for a critical exploration of the profound impact of artificial intelligence ai and smart technology on the sustainability of entrepreneurial ventures without a strategic embrace of these innovations businesses find themselves adrift struggling to cope with the demands of a rapidly evolving market utilizing ai and smart technology

to improve sustainability in entrepreneurship serves as a guide for entrepreneurs seeking to thrive in this era of unprecedented change readers begin with a deep dive into the challenges faced by contemporary businesses this book meticulously dissects these challenges and provides guidance for those ready to chart a course toward sustainable success by leveraging the transformative and compelling aptitudes of ai the proposed solution of the integration of ai and smart technologies into the business landscape is one of great promise

Canonical Duality Theory 2017-10-09

this book on canonical duality theory provides a comprehensive review of its philosophical origin physics foundation and mathematical statements in both finite and infinite dimensional spaces a ground breaking methodological theory canonical duality theory can be used for modeling complex systems within a unified framework and for solving a large class of challenging problems in multidisciplinary fields in engineering mathematics and the sciences this volume places a particular emphasis on canonical duality theory s role in bridging the gap between non convex analysis mechanics and global optimization with 18 total chapters written by experts in their fields this volume provides a nonconventional theory for unified understanding of the fundamental difficulties in large deformation mechanics bifurcation chaos in nonlinear science and the np hard problems in global optimization additionally readers will find a unified methodology and powerful algorithms for solving challenging problems in complex systems with real world applications in non convex analysis non monotone variational inequalities integer programming topology optimization post buckling of large deformed structures etc researchers and graduate students will find explanation and potential applications in multidisciplinary fields

Surveying and Land Information Systems 2000

sustainability ethics is a comprehensive exploration of the ethical dimensions of sustainability the book delves into the complex relationships between ethics and sustainable development examining the role of ethics in promoting a better world for all the lens of sustainability ethics considers the interdependence of environmental social and economic factors this provides a holistic understanding of the subject matter issues covered include the interconnectedness of people s rights planetary wellbeing prosperity responsibility and service to future generations protecting sustainable human security preserving

biodiversity and nature rights welcoming forced migrants and climate refugees promoting labor and children's rights advocating for human and indigenous rights and fostering the inclusion of women and lgbtqi rights the author concludes by synthesizing the various themes and offers insights for ethical discernments and sustainable ethical decision making and for building a better world for everyone throughout the book readers will find references to relevant literature providing a solid foundation for further exploration of sustainability ethics the audience for this important book includes academics researchers students policymakers and practitioners in the fields of sustainability environmental ethics and social justice and for anyone interested in understanding the ethical dimensions of sustainability and exploring practical solutions to create a more just inclusive and sustainable world

Sustainability Ethics 2023-06-11

wicked problems are those problems facing the planet and its inhabitants present and future which are hard if not impossible to resolve and for which bold creative and messy solutions are typically required the adjective wicked describes the mischievous and even evil quality of these problems where proposed solutions often turn out to be worse than the symptoms this wide ranging and innovative book encourages readers to think about archaeology in an entirely new way as fresh relevant and future oriented it examines some of the novel ways that archaeology alongside cultural heritage practice can contribute to resolving some of the world's most wicked problems or global challenges as they are sometimes known with chapters covering climate change environmental pollution health and wellbeing social injustice and conflict the book uses many and diverse examples to explain how through studying the past and present through an archaeological lens in ways that are creative ambitious and both inter and transdisciplinary significant small wins can be achieved through these small wins archaeologists can help to mitigate some of those most pressing of wicked problems contributing therefore to a safer healthier and more stable world

Wicked Problems for Archaeologists 2024-05-16

this book introduces neurourology as an emerging interdisciplinary area that covers the basic and clinical studies of the neural control on the normal lower urinary tract and the lower upper urinary tract dysfunction due to neuropathy disorders it systematically describes all aspects of neurourology from the epidemiology of the neurogenic bladder to the pathology and pathophysiology of the lower urinary tract to the diagnosis and treatment of the neurogenic bladder by conservative therapies or surgeries this book provides a useful resource for medical doctors nurses and students in the field of neurourological conditions in this 2nd edition 15 chapters are added e g on urodynamic practice psychogenic reasons of

luts standard of care physiotherapy upper urinary tract rehabilitation to enable self catheterization pediatric neurourology new surgical procedures the editors have invited an impressive number of renowned contributors including 98 internationally recognized specialists in this field from 25 countries in europe asia north america and south america this handbook provides a useful resource for medical doctors nurses and students in the field of neurourological conditions

Anticancer Research 1981

this book reviews the sources extraction processing and applications of value added compounds from agro waste with a focus on drug delivery tea apple pomace lignin nanocomposites bioethanol fertilizers and sitosterol food residues provide bioactive molecules enzymes vitamins antioxidants and animal feed

Handbook of Neurourology 2023-11-26

in this issue of critical care nursing clinics guest editor leslie altimier dnp rnc ne bc brings her considerable expertise to the topic of neonatal nursing clinical concepts and practice implications part 2 top experts provide clinical reviews covering prenatal bonding optimizing family centered care neonatal pain palliative care language developments in infants and much more with a focus on best practices and improving patient outcomes contains 12 relevant practice oriented topics including neuroprotective infant and family centered developmental care for the tiniest nicu babies perspectives from the team new opioids psychoactive drugs and synthetic marijuana neonatal abstinence syndrome and neonatal opioid withdrawal syndrome best practices to support maternal mental health during the transition from nicu to home parental views about autopsy organ donation and research donation and more provides in depth clinical reviews on neonatal nursing offering actionable insights for clinical practice presents the latest information on this timely focused topic under the leadership of experienced editors in the field authors synthesize and distill the latest research and practice guidelines to create clinically significant topic based reviews

engaging systematically with severe forms of poverty in europe this important book stimulates academic public and policy debate by shedding light on aspects of deprivation and exclusion of people in absolute poverty in affluent societies it examines issues such as access to health care housing and nutrition poverty related shame and violence the book investigates different policy and civic responses to extreme poverty ranging from food donations to penalisation and social cleansing of highly visible poor and how it is related to concerns of ethics justice and human dignity

Neonatal Nursing: Clinical Concepts and Practice Implications, Part 2, **An Issue of Critical Care Nursing Clinics of North America, E-Book** **2024-05-07**

this book presents the findings of a comparative study of three european metropolitan regions vienna barcelona and stockholm the heart of the work consists of empirical studies carefully designed and developed in order to identify the main actors and mechanisms supporting technological innovation in each of the metropolitan regions the authors have also highlighted the similarities and differences across regions and countries investigating how these came to be and discussing the possible implications the introductory as well as the concluding chapter was written by manfred m fischer who assisted by attila varga was also responsible for chapter 2 on the metropolitan region of vienna javier revilla diez contributed chapter 3 on the barcelona metropolitan region folke snickars has provided chapter 4 which examines the metropolitan region of stockholm and all authors have reviewed and commented on the whole contents so that the volume represents a collective endeavour which has been rendered as homogeneous as possible a particular effort has been made to ensure that the study is based on a common conceptual framework

Absolute poverty in Europe 2019-04-03

distance learning is for leaders practitioners and decision makers in the fields of distance learning e learning telecommunications and related areas it is a professional journal with applicable information for those involved with providing instruction to all kinds of learners of all ages using telecommunications technologies of all types stories are written by practitioners for practitioners with the intent of providing usable information and ideas articles are accepted from authors new and experienced with interesting and important information about the effective practice of distance teaching and learning distance learning is published quarterly each issue includes eight to ten articles and three to four columns including the highly regarded and finally column covering recent important issues in the field and written by distance learning editor michael simonson articles are written by practitioners from various countries and locations nationally and internationally

Metropolitan Innovation Systems 2013-03-09

this special issue explores the cross disciplinary approaches methodologies and applications of socio

environmental vulnerability assessment that can be incorporated into sustainable management the volume comprises 20 different points of view which cover environmental protection and development urban planning geography public policymaking participation processes and other cross disciplinary fields the articles collected in this volume come from all over the world and present the current state of the world s environmental and social systems at a local regional and national level new approaches and analytical tools for the assessment of environmental and social systems are studied the practical implementation of sustainable development as well as progressive environmental and development policymaking are discussed finally the authors deliberate about the perspectives of social environmental systems in a rapidly changing world

translation technologies are moulded by and impact upon humans in all sorts of ways this state of the art volume looks at translation technologies from the point of view of the human users as trainee professional or volunteer translators or as end users of translations produced by machines covering technologies from machine translation to online collaborative platforms and practices from traditional translation to crowdsourced translation and subtitling this volume takes a critical stance questioning both utopian and dystopian visions of translation technology in eight chapters the authors propose ideas on how technologies can better serve translators and end users of translations the first four chapters explore how translators in various contexts and with widely differing profiles use and feel about translation technologies as they currently stand while the second four chapters focus on the future on anticipating needs identifying emerging possibilities and defining interventions that can help to shape translation practice and research drawing on a range of theories from cognitive to social and psychological and with empirical evidence of what the technologization of the workplace means to translators human issues in translation technology is key reading for all those involved in translation and technology translation theory and translation research methods

Managing Information 2001

machine learning continues to have myriad applications across industries and fields to ensure this technology is utilized appropriately and to its full potential organizations must better understand exactly how and where it can be adapted further study on the applications of machine learning is required to discover its best practices challenges and strategies the research anthology on machine learning techniques methods and applications provides a thorough consideration of the innovative and emerging research within the area of machine learning the book discusses how the technology has been used in the past as well as potential ways it can be used in the future to ensure industries continue to develop and grow covering a range of topics such as artificial intelligence deep learning cybersecurity and robotics this major reference work is ideal for computer scientists managers researchers scholars practitioners academicians instructors and students

Transitional Justice in Afghanistan 1991

maintaining the importance of socio economic issues in devising transitional justice mechanisms this book examines the widespread practice of land grabbing in afghanistan on 3 september 2003 100 armed police officers bulldozed around 30 homes in the sherpur neighborhood of kabul afghanistan evicting over 250 people historically the land was part of the property of the ministry of defense of which a zone was allocated to the ministry s employees who had built homes and had lived there for nearly 30 years after the demolition however the land was distributed among 300 high ranking government officials including ministers deputy ministers governors and other powerful warlords land grabbing in afghanistan has become a widespread practice across the country based on over 50 semi structured interviews with key informants and group discussions with war victims and local experts in kabul the current book examines the relevance of transitional justice discourse and practice in response to this situation following a critical criminological concern with social harm the book maintains that it is not enough to consider a country s political history of violent conflict and the violation of civil and political rights alone rather to decide on appropriate transitional justice mechanisms it is crucial to consider a country s socio economic background and above all the socio economic harm inflicted on people during periods of violent conflict this original and detailed account of the socio economic challenges faced by transitional justice mechanisms will be of interest to those studying and working in this area in law politics development studies and criminology

Encyclopedia of the Mouse Genome 1998

this book explores how companies combine technological innovation and competitive actions that create new opportunities for business growth in the international market the complexity of designing today s technology platforms requires profound knowledge in multiple areas technology development and commercialization as an ongoing competitive process involves enabling and inhibiting mechanisms which govern the speed and acceleration of technological innovation to compete more effectively potential competitors are using cooperation and pooling their resources for shared gain in areas where they do not compete directly thus a thorough examination of the current paradigms theories and frameworks is needed to increase our understanding of the technology innovation competitiveness linkages of business growth this book brings together recent developments and methodological contributions within technological innovation international competitiveness and business growth that bridge the existing gaps and simultaneously advances the debate on this research topic

Transforming Technologies to Manage Our Information 2013-10-01

this edited volume brings closer two contemporary science education research areas nature of science nos and social justice sj it starts a dialogue on the characteristics of nos for sj with the purpose of advancing the existing discussion and creating new avenues for research using a variety of approaches and perspectives the authors of the different chapters engage in a dialogue on the construct of nos for sj its characteristics as well as ways of addressing it in science classrooms issues addressed are related to why a school science aiming at sj should address nos what nos related content skills and attitudes form the basis when aiming at sj and how school science can address nos for sj through a set of theoretical and empirical chapters the authors suggest answers but they also pose new questions on what nos for sj can mean and what issues need to be taken into consideration in future research and practice chapter nature of science for social justice why what and how is available open access under a creative commons attribution 4.0 international license via link springer.com
