this work is divided into two autonomous books the first book the state represents a radically new political system of society one which is the most democratic system ever possible this is a completely new society a real civil society which otherwise in the capitalist system is only a utopia in this book i scrutinize the principles of scientific socialism i e all those principles of marxism concerning the state that build socialism as a political system the second book the economic theory of socialism is a sequel and as far as i know the only sequel of the greatest work by karl marx capital the economics of socialism makes marx s socialism already completely possible in this book i scrutinize the economic laws that build socialism as a more effective economic system than capitalism these laws are extracted from marx s main work capital from 1917 to 1991 the totalitarian system in ussr and east europe was called socialism and even by the scientific nonsense and absurd names of communism and communist system in this system the official ideology was allegedly marxism

but really it could not endure any marxist criticism there was never any socialism anywhere in the twentieth century we passed through a system of utopian socialism as proof that this was not socialism that was not possible but for the utopia of writers before and after marx we were visited by a utopian socialism which at the contemporary stage is simply capitalism state monopolistic there is no better application of keynes s doctrine than the socialism of the twentieth century his planned capitalism is actually planned socialism contains papers that appeal to a broad and global readership in all fields of economics the first examination in english of east german television during the early cold war discusses socialism as a political system and details the history of socialist governments throughout the world provided by publisher following a decade of u s bombing campaigns that obliterated northern vietnam east germany helped vietnam rebuild in an act of socialist solidarity in building socialism christina schwenkel examines the utopian visions of an expert group of vietnamese and east german urban planners who sought to transform the devastated industrial town of vinh into a model socialist city drawing on archival and ethnographic research in vietnam and germany with architects engineers construction workers and tenants in vinh s mass housing complex schwenkel explores the material and affective dimensions of urban possibility and the quick fall of vinh s new built environment into unplanned obsolescence she analyzes the tensions between aspirational infrastructure and postwar uncertainty to show how design models and practices that circulated between the socialist north and the decolonizing south underwent significant modification to accommodate alternative cultural logics and ideas about urban futurity by documenting the building of vietnam s first planned city and its aftermath of decay and repurposing schwenkel argues that underlying the ambivalent and often unpredictable responses to modernist architectural forms were anxieties about modernity and the future of socialism itself this study examines transitions from nazism to socialism in brandenburg between 1945 and 1952 it explores the grassroots responses and their relative implications within the context of both punitive and rehabilitative measures implemented by the soviet military administration smad and the communist socialist unity party of germany sed the doctoral study

is based on archival and oral history sources and addresses two main research questions first in what ways did people at the grassroots attempt to challenge the imposition of punitive measures and did their responses have any effect on the manner in which these policies were implemented at a grassroots level these punitive measures were designed to remove remnants of nazism and included punitive soviet practices soviet nkvd camps and denazification and sequestering second to what extent did grassroots brandenburgers participate in political organisations which were designed to integrate east germans during the rehabilitative stage and what impact did these responses have on the post war transition this study focuses on the national democratic party and the society for german soviet friendship as well as examining wider factors which may have impeded and facilitated the processes of post war transitions two main arguments are proposed first the imposition of wide ranging punitive measures often posed an existential threat at a grassroots level and therefore at times elicited grassroots actions albeit severely restricted by practical and political constraints in turn these grassroots responses could occasionally have some local impact and somewhat affect the manner in which policies were implemented at a grassroots level in brandenburg second it is argued that the rehabilitative stage despite some challenges generally provided a favourable system for grassroots integration in which the needs of the policy makers and a significant proportion of grassroots individuals somewhat converged eventually contributing to the partial stabilisation of the emerging east german socialist state copyright remains with the author dr julie deering kraft citations deering kraft jn 2013 transitions from nazism to socialism grassroots responses to punitive and rehabilitative measures in brandenburg 1945 1952 doctoral thesis phd ucl university college london available at discovery ucl ac uk 1416290 christopher pierson assesses the evidence of terminal decline but finds rather a whole series of deep seated challenges to traditional forms of socialist and social democratic thinking above all these problems are to be found in the political economy of social democracy and its commitment to incremental change in the context of an increasingly globalized market economy the latter chapters of the book are devoted to an assessment of market socialism one of the most vigorous

and innovative attempts to seek to recast socialist aspirations under these quite changed circumstances in essence market socialism represents an attempt to reconcile new forms of social ownership with the seeming ubiquity of the market having outlined this position pierson carefully and systematically critiques it and in the process develops a set of distinctive arguments about the nature of social ownership the potential of the labor managed economy and the appropriate forms for an extension of economic democracy first published in 1992 routledge is an imprint of taylor francis an informa company the essays in this collection make up the first study of dropping out of late state socialism in eastern europe and the soviet union from leningrad intellectuals and berlin squatters to bosnian muslim madrassa students and romanian yogis groups and individuals across the eastern bloc rejected mainstream socialist culture in the process multiple drop out cultures were created with their own spaces music values style slang ideology and networks under socialism this phenomenon was little known outside the socialist sphere only very recently has it been possible to reconstruct it through archival work oral histories and memoirs such a diverse set of subcultures demands a multi disciplinary approach the essays in this volume are written by historians anthropologists and scholars of literature cultural and gender studies the history of these movements not only shows us a side of state socialist life that was barely known in the west it also sheds new light on the demise and eventual collapse of late socialism and raises important questions about the similarities and differences between eastern and western subcultures this title first published in 1987 is a study of the appeals of socialism for the educated middle and lower classes in the nineteenth century and explores the role of the educated middle classes during this formative period for major modern socialist organisations and movements this title will be of interest to students of history and politics this text documents the economic development of east asian countries in order to highlight the beneficial techniques used to increase growth socialist and capitalist structures are discussed complete with an analysis of the future extent of interaction between east asian countries this title is part of uc press s voices revived program which commemorates university of california press s mission to seek out

as the vital interests for irish catholics became a socialist and adapted his radical political views and devotional roman catholic convictions to a parliamentary and catholic socialism this title will be of interest to scholars and students of british and labour history dr borkenau discusses the ideals of international socialism in the light of the realities of a world of strife and struggle he maintains that socialist internationalism of the old type has little relation to the problems of the present the world has become much more nationalist and the labour movements of all countries have had to give in to the forces of nationalism he is sceptical of the revival of liberal democratic internationalism in the league and the attempt to revive the league in the shape of a federal union he believes however that powerful forces are working in the direction of the growth of supernational units and points to symptoms of an impending sudden collapse of nationalism which would enable labour to put itself at the head of an anglo american peace similar to the roman piece which for centuries gave quiet and prosperity to the world this collection of essays is designed to shed light on the issues of imperialism and the transitions to socialism delving into the theoretical aspects whose analysis is key for understanding the subject under consideration and practical experiences of socialist transition in china vietnam north korea cuba venezuela ecuador and brazil

After Socialism: Volume 20, Part 1 2019-10-10 this book blends real world history intellectual history and personal history into a compelling case for a new way of thinking about such highly controversial and highly misunderstood concepts as market socialism a global marshall plan and world government it argues that if properly designed according to clear and specific blueprints all three of these possibilities would indeed greatly benefit humanity if they were fully implemented the book puts a human face on these proposals by documenting their origin and development through a detailed account of the author s professional efforts over a long and productive academic career this story of steadfast determination in the face of steep odds will resonate deeply with every person who has nourished a vision that is commonly dismissed as excessively idealistic and unrealistic

Taking Socialism Seriously 2013-05-14 dr borkenau discusses the ideals of international socialism in the light of the realities of a world of strife and struggle he maintains that socialist internationalism of the old type has little relation to the problems of the present the world has become much more nationalist and the labour movements of all countries have had to give in to the forces of nationalism he is sceptical of the revival of liberal democratic internationalism in the league and the attempt to revive the league in the shape of a federal union he believes however that powerful forces are working in the direction of the growth of supernational units and points to symptoms of an impending sudden collapse of nationalism which would enable labour to put itself at the head of an anglo american peace similar to the roman piece which for centuries gave quiet and prosperity to the world
