Systems Thinking Basics 1997

systems thinking basics is a self study skill building resource designed to introduce you to the power of systems thinking tools with an emphasis on behavior over time graphs and causal loop diagrams this workbook guides you step by step through recognizing systems and understanding the importance of systems thinking interpreting and creating behavior over time graphs and causal loop diagrams applying and practicing systems thinking day to day each of the book s six main sections contains a wealth of examples from the business world as well as learning activities that reinforce concepts and provide you with the opportunity and space to practice an array of appendices offers extra practice activities a summary of key points and suggested responses to the learning activities a table showing the palette of systems thinking tools available a glossary of systems thinking terms a list of additional resources a summary of the systems archetypes the many diagrams within the book clarify concepts and visually reinforce key principles systems thinking basics is ideal for aspiring systems thinkers eager to try their hand at using these powerful tools

The Tip of the Iceberg 2001

a group of enterprising penguins with a yen for juicy clams teams up with some walrus colleagues to harvest a seemingly endless supply for all the good news attracts penguins and walruses from icebergs far and wide who join in the work and the delectation but on the way to establishing a clam lovers paradise territorial skirmishes arise clumsy walruses flatten penguins and confusion reigns can the penguins discover the hidden connections that have turned spiraling success into frustration and social upheaval only when they learn to see what is invisible are they able to stop their paradise from unraveling and take steps to create

sustainable prosperity the tip of the iceberg vividly illustrates how organizations can be trapped by systems when they fail to understand them the story and discussion guide will help managers sort through the complexity of surface level events and discover how to take effective actions that create the results they desire

Construction of a Concept of Neuronal Modeling *2022-02-25*

the business problem of having inefficient processes imprecise process analyses and simulations as well as non transparent artificial neuronal network models can be overcome by an easy to use modeling concept with the aim of developing a flexible and efficient approach to modeling simulating and optimizing processes this paper proposes a flexible concept of neuronal modeling conm the modeling concept which is described by the modeling language designed and its mathematical formulation and is connected to a technical substantiation is based on a collection of novel sub artifacts as these have been implemented as a computational model the set of conm tools carries out novel kinds of neuronal process modeling npm neuronal process simulations nps and neuronal process optimizations npo the efficacy of the designed artifacts was demonstrated rigorously by means of six experiments and a simulator of real industrial production processes

The Lemming Dilemma *2000*

the lemming dilemma living with purpose leading with vision this volume introduces the crucial organizational learning discipline of personal mastery the ongoing process of discovering what you really care about and working with resolve to achieve it in this engaging story emmy the lemming wakes up to her own purpose and vision and defies the age old urge to follow others off the cliff through her own surprising choices she inspires the other lemmings to pursue their deepest aims and visions both individually

and collectively in this simply told story are profound lessons about what it means to be the leader of your own life and to share your vision with others includes questions for reflection and group discussion

Dealing with Real-World Complexity *2009-04-09*

based on policy makers limitations in solving real life problems and the fact that information is rarely available in a pure quantitative form enhancements and new approaches to remedy this are proposed by mark hürlimann he introduces simple and more sophisticated static and dynamic methods to analyze complex topics in addition a semi quantitative approach is presented that integrates quantitative and qualitative variables in a feedback system the author finally illustrates on the basis of a case study the advantages and limitations of the various approaches in a didactically sound and easily understandable way

Making it Happen *1999*

este libro contiene una colección de doce artículos seleccionados entre los trabajos presentados en la cuarta edición del encuentro territorios en movimiento realizado en quito ecuador del 5 al 7 de junio 2012 y organizado en el marco del programa dinámicas territoriales rurales dtr de rimisp centro latinoamericano para el desarrollo rural los artículos contribuyen a la preocupación central del programa para detectar y entender los factores conducentes a un desarrollo inclusivo y sustentable los casos que se presentan permiten robustecer el enfoque del desarrollo territorial que promueve procesos simultáneos de crecimiento económico inclusión social y sostenibilidad ambiental en una sociedad latinoamericana marcada por la persistente inequidad que los avances de la región en reducción de la pobreza no logran superar
