Foundations Student Notebook 1 Second Edition

2012

this book sets the foundations of newton s alchemy in their historical context in restoration england it is shown that alchemical modes of thought were quite strong in many of those who provided the dynamism for the scientific revolution of the seventeenth century and that these modes of thought had important relationships with general movements for reform in the same period

Student Notebook K

2002-07-01

newtonian scholarship has taken great steps forward in the last half century the recent completion of critical editions of newton s mathematical papers and of his scientific correspondence as well as the publication of the first volume of his optical papers and of variant readings of the principia in the original latin have made most of newton s scientific work generally available for study and analysis for the first time this has provided a better understanding of newton s principia and optics especially regarding their origin and interpretation much of which has remained obscure for several centuries some of the new developments and insights are presented in this book by several of the scholars who have made these primary sources accessible and by others who are using them to elucidate

newton s work most of the papers included were presented at the symposium on the foundations of newtonian scholarship held at the royal society in london in march 1997

2 the globalization of capital has far outstripped the ability of current labor movements organized at best on a national level to conduct an effective defense of the interests of labor within capitalism let alone to seriously challenge the capitalist system to develop some form or forms of international organization of labor long an ideological challenge workers of the world unite has now become an urgent matter of survival for the labor movements of the world here is a challenge on which i think broad agreement is possible even those who think capitalism is capable of indefinite survival must agree that it has functioned best in the past for example during the long period of post world war ii expansion when the power of capital has been effectively limited by the countervailing power of labor effective exercise of that power has always depended on overcoming the segmentation of labor due to such factors as locality race gender occupation etc which stilremain important above i have singled out the two factors that today seem key to me the split between mental and manual labor and segmentation by nationality let all concerned about the current state of capitalism work to build up the countervailing power of labor and let time show whether this results in nothing more than the better functioning of capitalism or whether a new challenge to the system ultimately emerges
