TARDOS FUNCTION WIKIPEDIA DEC  $05\ 2022$  in graph theory and circuit complexity the tardos function is a graph invariant introduced by ? va tardos in 1988 that has the following properties like the Lov? SZ number of the complement of a graph the tardos function is sandwiched between the clique number and the chromatic number of the graph

an enhanced primal simplex based tardos algorithm for linear Nov  $04\ 2022$  we propose an enhanced primal simplex based tardos algorithm circumventing the computation of a while achieving a strong polynomial complexity for a slightly wider class of problems
