digital innovations in healthcare education and training discusses and debates the contemporary knowledge on the evolution of digital education learning and the web and its integration and role within modern healthcare education and training the book encompasses topics such as healthcare and medical education theories and methodologies social learning as a formal and informal digital innovation and the role of semantics in digital education in addition it examines how simulation serious games and virtual patients change learnings in healthcare and how learning analytics and big data in healthcare education leads to personalized learning online pedagogy principles and applications participatory educational design and educational technology as health intervention are bridged together to complement this collaborative effort this book is a valuable resource for a broad audience both technical and non technical including healthcare and medical tutors health professionals clinicians web scientists engineers computer scientists and any other relevant professional interested in using and creating digital innovations for healthcare education and training provides contemporary knowledge on the evolution of learning technologies and the web and its integration and role within modern healthcare education and training discusses the latest digital innovation in healthcare education and training thus enabling all type of readers to apply best practices encompasses a cross theme scholarly explanation based on successful cases which provides a deep knowledge experience into digital innovation in healthcare education and training

FPGAs 2015-09-28

this open access book presents an in depth analysis of data from iccs an international group of scholars critically address the state of civic and citizenship education in the four nordic countries that participated in the iea international civic and citizenship education study iccs in 2009 and 2016 the findings are of particular relevance to educators at all levels from school education through to

teacher education nordic countries have long traditions of democracy and their students have performed relatively well in the iccs assessments nonetheless citizenship education continues to evolve and has received increasing attention in recent educational reforms indicating policymakers understanding that schools play an important role in establishing democratic values among future citizens data from iccs can be used to analyze discuss and reflect on the status of civic and citizenship education and can contribute to the discourse on the potential role of education in contributing to sustainable democracies for a common future however teaching citizenship and learning democracy are two different things while young people can be taught about democracy in school it is vital that schools work together with the wider community in which youth operate to strengthen civic understanding and values for all young people regardless of their social and economic background
