international child abduction occurs when one parent wrongfully ie in breach of the parental responsibility of the other parent takes a child to a country other than that of the child s habitual residence or wrongfully keeps a child in such country the author of this work was part of a research team that conducted a study partially funded by the european commission to examine this problem in belgium and hungary analysing cases from 2007 and 2008 and interviewing affected parents this book is a revised version of the belgian research report which sets the problem of child abduction within its international context it looks at the families in which abductions took place how preparations were made for abduction the quest for the return of the child including legal proceedings and the aftermath of the abductions throughout the book the results of the quantitative and qualitative data are explained what emerges is that when a child is abducted the solutions offered by the law are often inadequate family conflict is a complex societal issue and child abduction is a severe form of family conflict rather than responding to child abduction with strict and contentious legal proceedings the book argues that solutions based on respect psychological assistance and a search for consensus should be favoured during the 1970s and early 80s dozens perhaps hundreds of japanese civilians were kidnapped by north korean commandos and forced to live in invitation only zones high security detention centres masked as exclusive areas on the outskirts of pyongyang the objective to brainwash the abductees with the regime s ideology and train them to spy on the state s behalf but the project faltered when indoctrination failed the captives were forced to teach north korean operatives how to pass as japanese to help them infiltrate hostile neighbouring nations for years the japanese and north korean authorities brushed off these disappearances but in 2002 kim jong il admitted to kidnapping thirteen citizens returning five of them the remaining eight were declared dead in the invitation only zone boynton an investigative journalist speaks with the abductees nationalists and diplomats and crab fishermen to try and untangle both the kidnappings and the intensely complicated relations between north korea and japan the result is a fierce and fascinating exploration of north korea s mysterious machinations and the vexed politics of northeast asia a novel defense of abduction one of the main forms of nondeductive reasoning with this book igor douven offers the first comprehensive defense of abduction a form of nondeductive reasoning abductive reasoning which is guided by explanatory considerations has been under normative pressure since the advent of bayesian approaches to rationality douven argues that although it deviates from bayesian tenets abduction is nonetheless rational drawing on scientific results in particular those from reasoning research and using computer simulations douven addresses the main critiques of abduction he shows that versions of abduction can perform better than the currently popular bayesian approaches and can even do the sort of heavy lifting that philosophers have hoped it would do douven examines abduction in detail comparing it to other modes of inference explaining its historical roots discussing various definitions of abduction given in the philosophical literature and addressing the problem of underdetermination he looks at reasoning research that investigates how judgments of explanation quality affect people s beliefs and especially their changes of belief he considers the two main objections to abduction the dynamic dutch book argument and the inaccuracy minimization argument and then gives abduction a positive grounding using agent based models to show the superiority of abduction in some contexts finally he puts abduction to work in a well known underdetermination argument the argument for skepticism regarding the external world at seventeen jacqueline pascarl married a royal prince and embarked on what she believed would be a fairy tale existence but it soon became a nightmare after years of abuse at the hands of her husband jacqueline escaped with her children hoping to leave her past behind but what followed would haunt her for the next fourteen years in this heart rending story jacqueline describes how her husband kidnapped their two young children and forced them to cut off all contact with her she tells of the pain and helplessness she felt at their loss but also of how she channelled her grief forging an existence as an aid worker and humanitarian ambassador all the while desperately hoping to hear news of them in 2006 she was reunited with her long lost children and in abducted she reveals the dramatic events that led to their meeting this is a candid compelling account of living under the shadow of child abduction it is an unforgettable ride through tragedy loss and finally triumph this book presents a fresh approach to the communicability of narratives revealing the cognitive underpinnings of charles sanders peirce s pragmatistic model it demonstrates how abductive processes modify habits of belief and action in what peirce refers to as double consciousness abductions generated during double consciousness paradigms have

increased efficacy compared to instinctual abductions novel inferences from working memory become consciously integrated with existing long term memory units which permits fuller consideration of the plausibility of propositions special attention is given to children's prelinguistic means to represent propositional or assertory conflicts and to resolve these conflicts via listening and re-telling narrators' accounts overall this book serves both a theoretical and applied purpose it is intended to support innovative therapeutic interventions to facilitate the re-construction of narratives by adults and children its practical applications and theoretical grounding will appeal to graduate students and scholars alike who wish to examine narrative as an interdisciplinary enterprise an ontological and cultural phenomenon narration by way of action image sequences not just a literary linguistic paradigm ultimately this account presents narrative as a modal forum to resolve logical and practical conflicts compelling the interpreter to become an involved partner in the narrated event itself from the very beginning of their investigation of human reasoning philosophers have identified two other forms of reasoning besides deduction which we now call abduction and induction deduction is now fairly well understood but abduction and induction have eluded a similar level of understanding the papers collected here address the relationship between abduction and induction and their possible integration the approach is sometimes philosophical sometimes that of pure logic and some papers adopt the more task-oriented approach of AI the book will command the attention of philosophers logicians AI researchers and computer scientists in general international criminal law language is always generated and interpreted in a certain context and the semantic syntactic and lexical properties of linguistic expressions reflect this interactive language understanding systems such as language based dialogue systems therefore have to apply contextual information to interpret their inputs and to generate appropriate outputs but are in practice very poor at this this book contains a number of studies in computational pragmatics the newly emerging field of study of how contextual information can be effectively brought to bear in language understanding and generation the various chapters center around the conceptual formal and computational modeling of context in general of the relevant beliefs of dialogue participants in particular and of the reasoning that may be applied to relate linguistic phenomena to aspects of the dialogue context these issues are discussed both from a theoretical point of view and in relation to their roles in prototypical language fascinating areas of family law practice the 1980 hague convention on the civil aspects of international child abduction was the response of the international community to the increase in the phenomenon of parental child abduction however behind the widely acclaimed success of this convention which has now been ratified by more than 90 states lie personal tragedies academic controversy and diplomatic tensions the continuing steady flow of case law from the various member states has resulted in the emergence of different approaches to the interpretation of key concepts in the convention in addition over the years other global and regional legal instruments and the recommendations of the special commissions have had an impact on the implementation of the convention this book brings together all these strands and provides an up to date clear and highly readable discussion of the international operation of the abduction convention together with in depth critical academic analysis in light of the objectives of the convention and other relevant legal norms such as the 1989 un convention on the rights of the child throughout the book examples are brought from case law in many jurisdictions and reference is made to relevant legal and social science literature and empirical research over the past decade increasing focus has been placed on what might be seen as procedural issues such as separate representation for children undertakings judicial liaison and mediation the book analyses the significance of these developments and the extent to which they can help resolve the continuing tension between some of the objectives of the convention and the interests of individual children this book will be essential reading for judges practitioners researchers students policy makers and others who are seeking a critical and informed analysis of the latest developments in international abduction law and practice from the foreword by brenda hale justice of the supreme court of the united kingdom this book is as far as i am aware the first scholarly monograph to study the interpretation and application of the convention across the whole legal space which it occupies and to critically assess these in light of the object and purposes of the convention and other relevant legal norms cases are drawn from many jurisdictions to discuss how different countries interpret the convention and links are made with relevant statistical social and psychological research in a thoughtful discussion of the significance of such material both to judicial decision making and to policy development a study which deserves to be read by anyone with an interest in the modern phenomenon of international child abduction whether judge practitioner policy maker parent researcher or scholar there is plenty for us all to think about while most people have heard about high profile abductions such as the elizabeth smart case such abductions are not isolated cases the abduction of children occurs much more often in our country than most people would suspect but because of a fault in our country s national crime reporting procedures no one knows the true number this book

children and how families can help them re integrate themselves into a normal life real life examples are provided in every chapter it is every parent s worst nightmare someone has abducted their child and no one including the police has a clue where the child is but worse while parents feel certain their child is terrified and crying desperately for them they don t know if their child is being physically mistreated sexually molested or worse the uncertainty and powerlessness can drive parents of abducted children to the edge of insanity but there are measures parents and children can take to avoid being the victim of abduction there are things families can do too to apprehend offenders and bring children home even after an abduction occurs here a retired police captain offers a chilling phenomenon that jacobs began noticing in 2003 the alien integration action plan has kicked into high gear the incidents of alien abductions have declined as occurrences of alien involvement
