excerpt from hot water supply and kitchen boiler connections a d104 book on the installation of hot water service in residences and other buildings and methods of connecting range boilers steam and gas water heaters the popular hand book kitchen boiler connections dealt principally with piping problems and with the connec tions to boilers in the smaller type of residence while the examples shown in the book which is designed to replace it cover the larger buildings as well it has been recognized that the former are the more important by reason of their far greater number and therefore the examples of piping construction and connections for small buildings are shown in greater

variety this is considered all the more necessary as the opportunity for departure from certain standard types of construction are more in small buildings than in large ones as a rule owing to greater variety in architectural design about the publisher forgotten books publishes hundreds of thousands of rare and classic books find more at forgottenbooks.com this book is a reproduction of an important historical work forgotten books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy in rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition we do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
