## **Proceedings - American Society for Testing and Materials**

1982

vols 61 66 include technical papers

## **Endocrine Bioassay Data**

1964

vol 12 includes under the same cover the society s year book for 1912

## **Gas Well Test Analysis Under Water-drive Conditions**

1973

lists citations with abstracts for aerospace related reports obtained from world wide sources and announces documents that have recently been entered into the nasa scientific and technical information database

## **Proceedings of the Annual Meeting**

1974

an important role of diagnostic medicine research is to estimate and compare the accuracies of diagnostic tests this book provides a comprehensive account of statistical methods for design and analysis of diagnostic studies including sample size calculations estimation of the accuracy of a diagnostic test comparison of accuracies of competing diagnostic tests and regression analysis of diagnostic accuracy data discussing recently developed methods for correction of verification bias and imperfect reference bias methods for analysis of clustered diagnostic accuracy data and meta analysis methods statistical methods in diagnostic medicine explains common measures of diagnostic accuracy and designs for diagnostic accuracy studies methods of estimation and hypothesis testing of the accuracy of diagnostic tests meta analysis advanced analytic techniques including methods for comparing correlated roc curves in multi reader studies correcting verification bias and correcting when an imperfect gold standard is used thoroughly detailed with numerous applications and end of chapter problems as well as a related ftp site providing fortran program listings data sets and instructional hints statistical methods in diagnostic medicine is a valuable addition to the literature of the field serving as a much needed guide for both clinicians and advanced students

## **A Digital Computer Method for Design and Analysis of Axisymmetric Thin Shells Subjected to Pressure and Thermal Environments**

1964

buildings influence people they account for one third of energy consumption across the globe and represent an annual capital expenditure of 7 10 of gnp in industrialized countries their lifetime operation costs can exceed capital investment building engineering aims to make buildings more efficient safe and economical one branch of this discipline building physics science has gained prominence with a heightened awareness of such phenomena as sick buildings the energy crisis and sustainability and considering the performance of buildings in terms of climatic loads and indoor conditions the book reflects the advanced level and high quality of research which building engineering and building physics science in particular have reached at the beginning of the twenty first century it will be a valuable resource to engineers architects building scientists consultants on the building envelope researchers and graduate students

## **Accelerated Traffic Test at Stockton Airfield, Stockton, California**

1949

list of members in vols 1 24 38 54 57

## **Book of ASTM Standards, with Related Material**

1976
