this is the golden age of cognitive therapy its popularity among society and the professional community is growing by leaps and bounds what is it and what are its limits what is the fundamental nature of cognitive therapy it is to my way of thinking simple but profound to understand it it is useful to think back to the history of behavior therapy to the basic development made by joseph wolpe in the 1950s wolpe astounded the therapeutic world and infuriated his colleagues by finding a simple cure for phobias the psychoanalytic establishment held that phobias irrational and intense fear of certain objects such as cats were just surface manifestations of deeper underlying disorders the psychoanalysts said their source was the buried fear in male children of castration by the father in retaliation for the son's lust for his mother for females this fear is directed toward the opposite sex parent the biomedical theorists on the other hand claimed that some as yet undiscovered disorder in brain chemistry must be the underlying problem both groups insisted that to treat only the patient's fear of cats would do no more good than it would to put rouge over measles wolpe however reasoned that irrational fear of something isn't just a symptom of a phobia it is the whole phobia
