paul horwich develops an interpretation of ludwig wittgenstein s later
writings that differs in substantial respects from what can already be found
in the literature he argues that it is wittgenstein s radically anti

~~clear account of wittgenstein s hyper deflationist view of what philosophy is~~
how it should be conducted and what it might achieve his second aim is to
defend this view against a variety of objections that is to display its
virtues not merely as an accurate reading of wittgenstein but as the correct
conception of philosophy itself and the third aim is to examine the
application of this view to a variety of topics but primarily to language and
to experience a further distinctive feature of this approach is its
presupposition that wittgenstein s ideas may be formulated with precision and
that solid arguments may be found on their behalf this pair of guiding
assumptions the centrality of wittgenstein s metaphilosophy and its
susceptibility to rigorous articulation and rational support are admittedly
controversial but are vindicated not just textually but by the power and
plausibility of the philosophy that results from them
