Project Management in Health and Community Services 2013-09-13 in denmark finland and sweden the evolution of administrative

law including social welfare law has been marked by a shift towards a stronger protection of the recipient's individual rights. The adoption of activation policies targeting recipients of social assistance has highlighted the tensions between decision making concerning the implementation of these policies and the legislative efforts to promote the realisation of individual rights in the field of social welfare. An examination of the legislation in question and its implementation conditions shows that the realisation of individual rights is subordinated to the pursuit of organisational and other objectives. The findings of the study are used to formulate proposals for the promotion of individual rights based on the Nordic egalitarian model of citizenship. This critical assessment of activation policies should be of broad international appeal. It will be of interest to researchers in social policy as well as those concerned with protection of rights.

Strategies for Deconstructing Racism in the Health and Human Services 2016-06-07 whilst enterprise technology departments have been steadily building their information and knowledge management portfolios, the internet has generated new sets of tools and capabilities which provide opportunities and challenges for improving and enriching knowledge work. This book fills the gap between strategy and technology by focussing upon the functional capabilities of 2.0 in corporate environments and matching these to specific types of information requirement and behaviour. It takes a resource based view of the firm: why and how can the knowledge capabilities and information assets of organisations be better leveraged using 2.0 tools? Identifying the underlying benefits requires the use of frameworks beyond profitability and cost control. Some of these perspectives are not in the usual business vocabulary but when applied demonstrate the role that can be played by 2.0. How to manage towards these and how to assess success. Transactive memory systems, social uncertainty, identity theory, network dynamics, complexity theory, organisational memory and the demographics of inter-generational change are not part of normal business parlance but can be used to clarify 2.0 application and potentiality. Written by a well-respected practitioner and academic, drawing on the author's practical experience as a technology developer, designer, senior manager and researcher, provides approaches to understanding and tackling real world problems.

Activation Policies and the Protection of Individual Rights 2016-03-16 it is vitally important for businesses to have a holistic understanding of the many issues surrounding and shaping sustainability from competitors to government and political factors to economics and ecological science. This integrated textbook for MBA and senior level undergraduates offers a comprehensive overview of the issues of sustainability as they relate to business and influence corporate strategy. It also features a wide range of cases and an extensive discussion of tools to incorporate sustainability issues into strategic decision making, helping instructors and students to build and then apply a solid understanding of sustainability in business.

Web 2.0 Knowledge Technologies and the Enterprise 2010-05-17 social spending is a powerful tool to reduce poverty, achieve higher equality and better life conditions for the inhabitants of a country. In social expenditure in Central America, Panama and the Dominican Republic 2007-2013, a characterization of the different variables that have taken social expenditure to its current position is performed during the economic crisis period. Many governments of the region confront this situation with an increase in social expenditures, however, part of the increase was centered on inflexible items, particularly wages, which

facilitated the increase in fiscal deficits and consequently on public debt thus after the financial crisis the fiscal situation has reduced governments buffers to respond to economic shocks which imply that we need to examine the fiscal policy given its rigidity the scarcity of public resources and the institutional contract the study of wage bill increases provides more information related to the causes of this dynamic and allow us to offer recommendations to improve spending management without threatening public finances a better use of resources could contribute to define a more efficient and equitable agenda for the countries in the region finally something that was not deeply explored as of today is the institutional complexity and how this could facilitate or hinder the government s ability to express its fiscal policy including the effectiveness in the use of public resources
