neurolinguistics is the study of the neural mechanisms in the human brain that control the comprehension production and

acquisition of language as an interdisciplinary field neurolinguistics draws methodology and theory from fields such as neuroscience linguistics cognitive science neurobiology communication disorders neuropsychology and computer science researchers are drawn to the field from a variety of backgrounds bringing along a variety of experimental techniques as well as widely varying theoretical perspectives much work in neurolinguistics is informed by models in psycholinguistics and theoretical linguistics and is focused on investigating how the brain can implement the processes that theoretical and psycholinguistics proposes are necessary in producing and comprehending language neurologists study the physiological mechanisms by which the brain processes information related to language and evaluate linguistic and psycholinguistic theories using aphasiology brain imaging electrophysiology and computer modeling neuroscience is the scientific study of the nervous system traditionally neuroscience has been seen as a branch of biology however it is currently an interdisciplinary science that collaborates with other fields such as chemistry computer engineering linguistics mathematics medicine and allied disciplines philosophy physics and psychology the term neurobiology is usually used interchangeably with the term neuroscience although the former refers specifically to the biology of the nervous system whereas the latter refers to the entire science of the nervous system the scope of neuroscience has broadened to include different approaches used to study the molecular cellular developmental structural functional evolutionary computational and medical aspects of the nervous system the techniques used by neuroscientists have also expanded enormously from molecular and cellular studies of individual nerve to imaging of sensory and motor tasks in the brain recent theoretical advances in neuroscience have also been aided by the study of neural networks given the increasing number of scientists who study the nervous system several prominent neuroscience organizations have been formed to provide a forum to all neuroscientists and educators forensic linguistics is the application of linguistic knowledge methods and insights to the forensic context of law language crime investigation trial and judicial procedure it is a branch of applied linguistics there are principally three areas of application for linguists working in forensic contexts understanding the language of the written law

understanding language use in forensic and judicial processes and the provision of linguistic evidence the discipline of forensic linguistics is not homogenous it involves a range of experts and researchers in different areas of the field a linguistic fingerprint is a concept put forward by some scholars that each human being uses language differently and that this difference between people involves a collection of markers which stamps a speaker writer as unique similar to a fingerprint under this view it is assumed that every individual uses languages differently and this difference can be observed as a fingerprint it is formed as a result of a merged language style a person s linguistic fingerprint can be reconstructed from the individual s daily interactions and relate to a variety of self reported personality characteristics situational variables and physiological markers e g blood pressure cortical testosterone in the process of an investigation the emphasis should be on the relative rather than the absolute difference between the authors and how investigators can classify their texts however argues that although the concept of linguistic fingerprinting is attractive to law enforcement agencies there is so far little hard evidence to support the notion in order to carry out the cesium test on habits of utilizing two to three letter words and vowel initial words in a sentential clause the occurrences of each type of word in the text must be identified and the distribution plotted in each sentence the cesium distribution for these two habits will be compared with the average sentence length of the text the two sets of values should track each other any altered section of the text would show a distinct discrepancy between the values of the two reference points the tampered section will exhibit a different pattern from the rest of the text contents general linguistics 1 applied linguistics 10 computational linguistics 18 anthropological linguistics 25 evolutionary linguistics 33 sociolinguistics 59 psycholinguistics 77 neurolinguistics 87 forensic linguistics 105 internet linguistics 119 cognitive linguistic 145 quantitative linguistics 156 second language teaching 164 translation theory 193 machine translation in india now a days 248 science and technology of machine translation 264 clinical linguistics 281 language planning 301 index 327

this book explores neoliberalism a view of the world that puts the market at its centre from the perspective of applied linguistics neoliberalism and applied linguistics argues that while applied linguistics has become more interdisciplinary in orientation it has ignored or downplayed the role of political economy namely the way in which social political and economic factors relate to one another within the context of a capitalist economy the authors take the view that engagement with political economy is central to any fully rounded analysis of language and language related issues in the world today and their collaboration in this volume represents an initial attempt to redress what they perceive to be an imbalance in the field the book begins with a discussion of neoliberalism and an analysis of the ways in which neoliberal ideology impacts on language this is followed by a discussion of how globalization and identity have been conceptualised in applied linguistics in ways which have ignored the political centrality of class a concept which the authors see as integral to their perspective the book concludes with an analysis of the ways in which neoliberal ideology plays out in two key areas of applied linguistics language teaching and language teacher education neoliberalism and applied linguistics is essential reading for advanced undergraduates postgraduates and researchers in applied linguistics
