Directors Close Up 2000 matthews hamabata got off to an unpromising start when he first arrived in japan to study influential business families an unmarried third generation japanese american graduate student he was there to learn about business executives in their roles as male principals and heads of households some japanese were less than hospitable and often downright rude to him and the souvenirs bearing the harvard university emblem that he had brought along for gifts proved to be inappropriate within the highly ritualized system of japanese gift giving in this engaging and personal narrative we watch hamabata in the first disappointing six months of his fieldwork as he attempts to map the boundaries of culture class and sexuality i became my own biggest fieldwork problem he writes was i inside or out when i thought i was in i was actually out but when i acknowledged the fact that i was out i was let in he soon recognized the importance of marital and filial relations in transmitting power in the business world and he began to direct his study to examining the social and emotional lives of all members of the japanese ie household and the way they affect business activity and ownership he takes us behind the scenes of the family enterprise to see how the multiple layers of reality biological social religious emotional and symbolic relate and cause dilemmas for ie members names locations and other details have been altered for the sake of anonymity we meet the moriuchis the itoos the okimotos people who must constantly balance their own personal desires against the good of the ie many telling vignettes illustrate a central tension in their lives their need for love power

and emotional expression versus the constraints of traditional attitudes toward their ancestors public honor the economic enterprise and the obligation to continue the ie over time a grandfather stubbornly refuses to hand over the reins of succession to the next generation creating an impossible situation that eventually tears apart an economic empire as well as the fabric of various interrelated families economic familial and religious factors figure in a clash for succession between the person who possesses the ancestral tablets and the head of the enterprise a daughter must reconcile personal love with arranged marriage ambitions for the son in line for succession war with the realization that this spoiled incompetent young man may well ruin the ie a fascinating portrait of everyday life told with vibrant sensitivity as well as humor this book is full of the vitality of common concerns life choices love and commitment confrontations with death it is about very real people trying to make sense of their lives trying to reconcile the roles and duties dictated by custom and tradition with rapidly changing expectations in the international milieu of contemporary japan

**The Rise of the Network Society** 2011-08-24 this is a systematic study of the sociological debate on postmodernity in the japanese context the volume consists of a collection of 12 papers that explore the idea of postmodernity primarily from sociological perspectives covering a wide range of domains including work feminism communication science and technology social stratification fine arts and literature the contributors come from diverse disciplines ranging from sociology and history to political science and linguistics they include advocates of postmodern theories and postmodernist analyses of japanese society as well as critics who argue that a suitable revised theory of modernity is still an adequate framework for comparing japan and the west others take the view that an intermediate position might be more productive that a qualified or provisional version of postmodern can throw new light on issues traditionally neglected by social theory while the postmodernity debate has been carried out chiefly in the context of european and american experiences this book aims to pave the way for the postmodernity question to be explored in the non western but highly industrialized setting of japan and brings forward a series of open ended questions about the bias in the debate written by academics based in universities in japan and australia the volume itself is postmodern in its internal diversity and multi cultural orientation

*Saint John* 1985 in this fresh and original analysis brian j mcveigh confronts both the demonizers and apologists of japan he argues persuasively that far from being unique japanese nationalism becomes demystified once management and mysticism the same processes and practices that operate in other national states are taken into account stripping away orientalist inspired misconceptions the author stresses the variety and relative intensity of nationalisms ranging from economic ethnic and educational to cultural gendered and religious he moves beyond state centered ideologies to explore the linkages between official and popular nationalisms and the complex interplay of ethnocultural ethnopolitical and ethnoracial forms of identity the ambiguity and everydayness of nationalism mcveigh contends explain its enduring power he concludes that modern japan is imbued with a deeply rooted legacy of renovationism or reform nationalism that accounts for its streamlined state structures guarded economic nationalism and highly scrutinized relationship with the rest of the world highlighting the pluralism of identity among japanese this book will be an invaluable corrective to recent works that glibly proclaim the emergence of globalization internationalization and convergence

Witness Testimony Evidence 2007-11-19 the popular image of japanese society is a stereotypical one that of a people characterised by a coherent set of thought and behaviour patterns applying to all japanese and transcending time ross mouer and yoshio sugimoto found this image quite incongruous during their research for this book in japan they ask whether this stereotype of the japanese is not only generated by foreigners but by the japanese themselves this is likely to be a controversial book as it does not contribute to the continuing mythologising of japan and the japanese the book examines contemporary images of japanese society by surveying an extensive sample of popular and academic literature on japan after tracing the development of holistic theories about the japanese commonly referred to as the group model attention is focused on the evaluation of that image empirical evidence contrary to this model is discussed and methodological lacunae are cited a sociology of japanology is also presented in pursuit of other visions of japanese society the authors argue that certain aspects of japanese behaviour can be explained by considering japanese society as the exact inverse of the portrayal provided by the group model the authors also present a multi dimensional model of social stratification arguing that much of the variation in japanese behaviour can be understood within the framework as having universal equivalence
