the new york times bestselling author of witnessed intruders and missing time
three groundbreaking books on the ufo phenomenon returns with astonishing
evidence that other worldly beings are a very real and growing part of our
lives in sight unseen budd hopkins and coauthor carol rainey show how
fascinating discoveries in modern science support the plausibility of the ufo
phenomenon featuring sixteen never before published cases sight unseen probes
two newly uncovered patterns in alien abduction cases of ufo invisibility and
reports of genetically altered alien beings who interact with humans during
their routine lives the invisibility accounts detailed by hopkins include
numerous daylight abductions in densely populated urban areas all apparently
unseen and accomplished through a technology of invisibility two air force non
coms are snatched from the tarmac of a busy military airfield an australian
family is levitated up into a hovering craft while the father remains paralyzed
on the ground with a camera to his eye the resulting evidence on film is
discussed in terms of our own scientific advances in the second series of cases
abductees report encounters with beings who appear human but apparently possess
paranormal powers and stunted emotional ranges three young women unknown to
each other are mysteriously summoned to job interviews in ordinary office
settings they encounter human looking beings who lead them into baffling ufo
abduction experiences a wisconsin farmer meets damoe a man with odd behavior
who closely resembles his son damoe eventually reveals himself as an accomplice
of ufo occupants in a startling abduction of the farmer and his wife five year
old jen is abducted at night to a nearby playground there she must teach the
techniques and skills of play to twelve seemingly identical quasi human
children along with these bizarre first person stories told by credible people
hopkins and rainey explore cutting edge advances in our own technologies and
scientific theories that show how these new ufo patterns could have a concrete
basis in contemporary science included are an examination of cloaking devices
for aircraft mind control technologies and teleportation achieved in the lab
perhaps the most compelling argument to support these cases lies in the
startling and controversial new science of transgenics that actually allows for

the creation of alien human beings
