Highway Safety Literature 1987

this colossal reference book documents the timeless urge to reshape the world and the machines used to do so from the 1088 s to today from utility tractors and loaders up to the largest diggers and bulldozers every piece of heavy equipment is listed here by model and manufacturer making this the most exhaustive book on the world's most hard working vehicles and machines publisher's description

International Symposium on Alcohol Fuels 1993

human factors and ergonomics have made a considerable contribution to the research design development operation and analysis of transportation systems which includes road and rail vehicles and their complementary infrastructure aviation and maritime transportation this book presents recent advances in the human factors aspects of transportation these advances include accident analysis automation of vehicles comfort distraction of drivers understanding of distraction and how to avoid it environmental concerns in vehicle systems design intelligent transport systems methodological developments new systems and technology observational

and case studies safety situation awareness skill development and training warnings and workload this book brings together the most recent human factors work in the transportation domain including empirical research human performance and other types of modeling analysis and development the issues facing engineers scientists and other practitioners of human factors in transportation research are becoming more challenging and more critical the common theme across these sections is that they deal with the intersection of the human and the system moreover many of the chapter topics cross section boundaries for instance by focusing on function allocation in nextgen or on the safety benefits of a tower controller tool this is in keeping with the systemic nature of the problems facing human factors experts in rail and road aviation and maritime research it is becoming increasingly important to view problems not as isolated issues that can be extracted from the system environment but as embedded issues that can only be understood as a part of an overall system
