gather when performing penetration tests and where to look for it use
crawlers and spiders to investigate an entire website in minutes
discover security vulnerabilities in web applications in the web browser
and using command line tools improve your testing efficiency with the
use of automated vulnerability scanners exploit vulnerabilities that
require a complex setup run custom made exploits and prepare for
extraordinary scenarios set up man in the middle attacks and use them
to identify and exploit security flaws within the communication between
users and the web server create a malicious site that will find and
exploit vulnerabilities in the user s web browser repair the most
common web vulnerabilities and understand how to prevent them
becoming a threat to a site s security in detail applications are a huge
point of attack for malicious hackers and a critical area for security
professionals and penetration testers to lock down and secure kali linux
is a linux based penetration testing platform and operating system that
provides a huge array of testing tools many of which can be used
specifically to execute web penetration testing this book will teach you
in the form step by step recipes how to detect a wide array of
vulnerabilities exploit them to analyze their consequences and
ultimately buffer attackable surfaces so applications are more secure for
you and your users starting from the setup of a testing laboratory this
book will give you the skills you need to cover every stage of a
penetration test from gathering information about the system and the
application to identifying vulnerabilities through manual testing and the
use of vulnerability scanners to both basic and advanced exploitation
techniques that may lead to a full system compromise finally we will put
this into the context of owasp and the top 10 web application
vulnerabilities you are most likely to encounter equipping you with the
ability to combat them effectively by the end of the book you will have
the required skills to identify exploit and prevent web application
