**Love's Promises** 2016-05-24 blends memoir and legal cases to show how contracts can create family relationships. Most people think of love and contracts as strange bedfellows or even opposites in love's promises. However, law professor Martha Ertman shows that far from cold and calculating, contracts shape and sustain families. Blending memoir and law, Ertman delves into the legal cases, anecdotes, and history of family law to show that love comes in different packages, each shaped by different contracts and mini-contracts she calls deals. Family law should and often does recognize that variety because legal rules like relationships aren't one size fits all. The most common form of family, which Ertman calls Plan A, come into being through different kinds of agreements than the more uncommon families that she dubs Plan B. Recognizing the contractual core of all families shows that Plan B is neither unnatural nor unworthy of legal recognition. Just different. After telling her own moving and often irreverent story about becoming part of a Plan B family of two moms and a dad raising a child, Ertman shows that all kinds of people—straight and gay, married and single, related by adoption or by genetics—use contracts to shape their relationships. As couples navigate marriage, reproductive technologies, adoption, and cohabitation, they encounter contracts, sometimes hidden and other times openly acknowledged. These contracts ensure that the people they think of as family are legally recognized as family in the eyes of the law. Family exchanges can be substantial, like vows of fidelity, or small, like "I cook and you clean," but regardless of scope, the agreements shape the emotional, social, and financial terrain of family relationships. Seeing the instrumental role contracts will help readers better understand how contracts and deals work in their own families, as well as those around them, both insightful and paradigm-shifting. *Love's Promises* lets readers in on the power of contracts and deals to support love in its many forms and to honor the different ways that our nearest and dearest contribute to our daily lives.

*Romantic Ecocriticism* 2016-03-15 romantic ecocriticism origins and legacies is unique due to its rare assemblage of essays which has not appeared within an edited collection before romantic ecocriticism is distinct

because the essays in the collection develop transnational and transhistorical approaches to the proto-ecological early environmental aspects in British and American Romanticism. First, the edition's transnational approach is evident through transatlantic connections such as but are not limited to comparisons among the following writers: William Wordsworth, William Howitt, and Henry D. Thoreau; John Clare and Aldo Leopold; Charles Darwin and Ralph W. Emerson. Second, the transhistorical approach of Romantic ecocriticism is evident in connections among the following writers: William Wordsworth and Emily Brontë; Thomas Malthus and George Gordon Byron; James Hutton and Percy Shelley; Erasmus Darwin and Charlotte Smith; Gilbert White and Dorothy Wordsworth, among others. Thus, Romantic ecocriticism offers a dynamic collection of essays dedicated to links between scientists and literary figures interested in natural history.

*Islam, IS and the Fragmented State* 2021-08-10 how the imposition of crown rule across the british empire during the age of revolution corroded the rights of british subjects and laid the foundations of the modern police state during the eighteenth and nineteenth centuries the british empire responded to numerous crises in its colonies from north america to jamaica bengal to new south wales this was the age of revolution and the crown through colonial governors tested an array of coercive peacekeeping methods in a desperate effort to maintain control in the process these leaders transformed what it meant to be a british subject in the decades after the american revolution colonial legal regimes were transformed as the king s representatives ruled new colonies with an increasingly heavy hand these new autocratic regimes blurred the lines between the rule of law and the rule of the sword safeguards of liberty and justice developed in the wake of the glorious revolution were eroded while exacting obedience and imposing order became the focus of colonial governance in the process many constitutional principles of empire were subordinated to a single overarching rule where necessary colonial law

could diverge from metropolitan law within decades of the american revolution lisa ford shows the rights claimed by american rebels became unthinkable in the british empire some colonial subjects fought back but in the empire the real winner of the american revolution was the king in tracing the dramatic growth of colonial executive power and the increasing deployment of arbitrary policing and military violence to maintain order the king s peace provides important lessons on the relationship between peacekeeping sovereignty and political subjectivity lessons that illuminate contemporary debates over the imbalance between liberty and security

*Navy CIS | NCIS 1-20* 2016-04-15 this new collection from the acclaimed poet and critic maureen mclane works in an innovative register of essayistic writing conversable yet grounded in scholarship close readerly but far seeing mclane s encounters with poems and modellings of poetry illuminate her own poetics and suggest more generally all that poetics can encompass with characteristic brilliance mclane pursues a number of open questions how do poems shape our condition and conditioning as sentient creatures how do they generate modes for thinking how does rhyme help us measure out thought what is the relation of poetry to its surround to the environment and how do specific poems activate that relation what is the difference between a poetry of finding rather than of inspiration and how should we understand poetries invested in the notational and others committed to projects as many contemporary poets are as wordsworth was in his prelude as these questions suggest my poetics does not offer a brief for or against a position on poetry instead its artful arrangement of readings and divagations and even occasionally verse show us a way to be with poems and poetics

*Das große Navy CIS - Buch 2019* 2021-10-11 forensic chemistry is the first publication to provide coordinated expert content from world renowned leading authorities in forensic chemistry covering the range of forensic chemistry this volume in the advanced forensic science series provides up to date scientific learning on drugs fire debris explosives instrumental methods interpretation and more technical information written with the degreed professional in mind brings established methods together with newer approaches to build a comprehensive knowledge base for the student and practitioner alike like each volume in the advanced forensic science series review and discussion questions allow the text to be used in classrooms training programs and

numerous other applications sections on fundamentals of forensic science history safety and professional issues provide context and consistency in support of the forensic enterprise forensic chemistry sets a new standard for reference and learning texts in modern forensic science advanced articles written by international forensic chemistry experts covers the range of forensic chemistry including methods and interpretation includes entries on history safety and professional issues useful as a professional reference advanced textbook or training review

Navy CIS | NCIS 1-18 2021-10-28 this book is concerned with polymeric hydrogels which are considered as one of the most promising types of new polymer based materials each chapter in this book describes a selected class of polymeric hydrogels such as superabsorbent hybrid nanohydrogels conducting polymer hydrogels polysaccharide based or protein based hydrogels or gels based on synthetic polymers in this way the book also addresses some of the fascinating properties and applications of polymeric hydrogels they are three dimensional hydrophilic polymeric networks that can absorb swell and retain large quantities of water or aqueous fluids in combination with metal nanoparticles nanofibrils or nanowhiskers which may be embedded in the gels they find widespread applications ranging from agriculture and waste water treatment over electronics to pharmaceutical and biomedical applications applications mentioned in this book include electro sensors capacitors electromechanical actuators and even artificial muscles

Navy CIS 2021 2015-01-26 this handbook summarizes the data and techniques for hypofractionation and stereotactic radiation in a clinically accessible way hypofractionated radiation therapy which consists of larger dose radiation treatments that are given over a shorter time period compared to conventional radiation fraction sizes is used to treat a variety of cancers including prostate breast lung and colorectal conventional radiation therapy and hypofractionated radiation therapy have different effectiveness rates for cancer treatment and have different impacts on normal tissues in terms of causing toxicity there is a significant and growing body of literature on the use of different dosing regimens to treat a variety of cancers and radiation oncologists need to keep up with the various dosing schedules the effect of each regimen on cancer control in different cancers and how the different schedules affect each organ in terms of toxicity the book thus provides concise information ranging from commonly used dose fractionation schemes for hypofractionated and stereotactic body radiotherapy to simulation and treatment specifications to published safety and efficacy data chapters

additionally examine the biological rationales for the efficacy of hypofractionated radiation present clinical studies that demonstrate the efficacy and safety of hypofractionated radiation treatment in a variety of cancers and describe the advances in technology that have allowed hypofractionated radiation to be safely given this is an ideal guide for radiation oncology clinicians and trainees
