be presented in addition the conferences always welcome a range of invited talks that survey related domains as well as satellite events such as tutorials and workshops the 2008 conference had six invited speakers two advanced tutorials and four workshops detailed information about petri nets 2008 and the related events can be found at ictp.xidian.edu.cn/atpn/acsd2008 the petri nets 2008 conference was organized by the institute of computing theory and technology at xidian university xi'an china where it took place during june 23-27 2008 we would like to express our deep thanks to the organizing committee chaired by zhenhua duan for the time and effort vested in the conference and for all the help with local organization we are also grateful for the financial support of the proceedings of the 4th international conference on theory and applications of models of computation tamc 2007 held in shanghai china in may 2007 it addresses all major areas in computer science mathematics especially logic and the physical sciences particularly with regard to computation and computability theory the papers particularly focus on algorithms complexity and computability theory when archaeology meets communities examines the history of nineteenth century sicilian archaeology through the archival documentation for the excavations at tindari lipari and nearby minor sites in the messina province from italy's unification to the end of the first world war 1861-1918 among renaissance utopias the city of the sun is perhaps second in importance only to more's more famous work there are striking similarities between campanella's utopia and more's but also striking differences which reflect both changed historical circumstances and the highly original nature of campanella's thought *la città del sole* is one of many books written by tommaso campanella philosopher scientist astrologer and poet while imprisoned in naples for his part in rebellion against the spanish and ecclesiastical authorities who ruled his native calabria this first faithful and complete english translation by daniel j donno is presented opposite the critically established italian text with essential explanatory notes and an introductory essay students of italian culture of the history of science and of political philosophical and religious thought will welcome the publication of this authoritative edition of campanella's best known work the arthurian archives series of texts and editions in translation edited by norris j lacy makes a start on italian arthurian material with a 14c tristan text this is the first critical edition with english translation of the prose compilation *tristano panciatichiano* preserved in a unique manuscript in the biblioteca nazionale of florence ms panc 33 it is the first time the italian text has been published in its entirety in any form assembled by the mid-fourteenth century the manuscript is an original compilation in italian based on several french models the *queste del san graal* *jozeph d'arimathie* *the mort artu* and notably the roman *de tristan en prose* while the edition itself will be of great interest the translation into english is a major opportunity for arthurians and other medievalists and furnishes important new evidence for the study of arthurian material in italy apparatus includes a finding list of arthurian manuscripts produced owned or read by italians a select bibliography and an index of proper names found in the narrative in this elegantly constructed study of the early decades of public opera the conflicts and cooperation of poets composers managers designers and singers producing the art form that was soon to sweep the world and that has been dominant ever since are revealed in their first freshness andrew porter this will be a standard work on the subject of the rise of venetian opera for decades rosand has provided a decisive contribution to the reshaping of the entire subject she offers a profoundly new view of baroque opera based on a solid documentary and historical critical foundation the treatment of the artistic self-consciousness and professional activities of the librettists impresarios singers and composers is exemplary as is the examination of their reciprocal relations this work will have a positive effect not only on studies of 17th century but on the history of opera in general lorenzo bianconi this book explores the tangled relationship between literary production and epistemological foundation as exemplified in one of the masterpieces of italian literature filippo andrei argues that giovanni boccaccio's *decameron* has a significant though concealed engagement with philosophy and that the philosophical implications of its narratives can be understood through an epistemological approach to the text he analyzes the influence of dante petrarch thomas aquinas aristotle and other classical and medieval thinkers on boccaccio's attitudes towards ethics and knowledge seeking beyond providing an epistemological reading of the *decameron* this book also evaluates how a theoretical reflection on the nature of rhetoric and poetic imagination can ultimately elicit a theory of knowledge the series *islamkundliche untersuchungen* was founded in 1969 by the klaus schwarz verlag since then it has become one of the most important venues for publications in islamic and middle eastern studies its more than 350 volumes cover a wide range of topics from the history culture and
