efficiently as possible they are the outcome of a political economy process therefore institutional change should be envisaged not as a move towards a hypothetical one best way but as a result of socio political compromises based on a theory of institutions and comparative capitalism the book proposes an analysis of the diversity of modern economies from america to korea and identifies five different models the market based anglo saxon model asian capitalism the continental european model the social democratic economies and the mediterranean model each of these types of capitalism is characterized by specific institutional complementarities the question of the stability of the continental european model of capitalism has been open since the beginning of the 1990s inferior macroeconomic performance compared to anglo saxon economies alleged unsustainability of its welfare systems too rigid markets etc the book examines the institutional transformations that have taken place within continental european economies and analyses the political project behind the attempts at transforming the continental model it argues that continental european economies will most likely stay very different from the market based economies and caat political strategies promoting institutional change aiming at convergence with the anglo saxon model are bound to meet considerable opposition
