over the past four centuries botanists and gardeners in the British Isles have gathered, maintained, and propagated many varying species of plants. Their work has been documented in innumerable books and articles which are often difficult to trace. The dictionary of British and Irish Botanists and Horticulturalists represents a time-saving reference source for those who wish to discover more about the lives and achievements of the horticulturalists listed. The dictionary's utility comes not only from indicating the major publications of the named authors but also the location of their herbaria and manuscripts. The previous 1977 edition of the dictionary has for many years been a much-used source of information for botanists, botanic artists, and archivists. In this revised edition, the scope has been expanded to include among its 13,000 entries flower painters in addition to botanical artists over 1,400 entries, and for the first time garden designers. Finally, the dictionary should have international appeal since so many botanists and gardeners worked on collective plants overseas, in particular in North America and the British Commonwealth. Each entry gives wherever possible details of dates and places of birth and death, educational qualifications, professional posts, honours, and awards, publications, location of plant collections, manuscripts, drawings, and portraits. Its main function, however, is to provide further biographical references to books and periodicals. Comprehensive, classified indices facilitate access by professions and activities, countries, and plant interests.
