Herodotus and the topography of Xerxes' invasion 2018-11-19

in his histories herodotus of halicarnassus gave an account of xerxes invasion of greece 480 bce among the information in this work features a rich topography of the places visited by the army as well as of the battlefields apparently there existed a certain demand among the greeks to behold the exact places where they believed that the greeks had fallen gods had appeared or xerxes had watched over his men this book argues that herodotus topography long taken at face value as if it provided unambiguous access to the historical sites of the war may partly be a product of greek imagination in the approximately fifty years between the xerxes invasion and its publication with the landscape functioning as a catalyst this innovative approach leads to a new understanding of the topography of the invasion and of the ways in which greeks in the late fifth century bce understood the world around them it also prompts new suggestions about the real world locations of various places mentioned in herodotus text

The Global Wordsworth 2019-05-24

the global wordsworth charts the travels of william wordsworth s poetry around the english speaking world but as katherine bergren shows wordsworth s afterlives reveal more than his influence on other writers his appearances in novels and essays from the antebellum u s to post apartheid south africa change how we understand a poet we think we know bergren analyzes writers like jamaica kincaid j m coetzee and lydia maria child who plant wordsworth in their own writing and bring him to life in places and times far from his own and then record what happens by working beyond narratives of british influence bergren highlights a more complex dynamic of international response in which later writers engage wordsworth in conversations about slavery and gardening education and daffodils landscapes and national belonging his global reception critical appreciative and ambivalent inspires us to see that wordsworth was concerned not just with local english landscapes and people but also with their changing place in a rapidly globalizing world this study demonstrates that wordsworth is not tangential but rather crucial to our understanding of global romanticism published by bucknell university press distributed worldwide by rutgers university press

Mapping Beyond Measure 2019-12

over the last century a growing number of visual artists have been captivated by the entwinements of beauty and power truth and artifice and the fantasy and functionality they perceive in geographical mapmaking this field of map art has moved into increasing prominence in recent years yet critical writing on the topic has been largely confined to general overviews of the field in mapping beyond measure simon ferdinand analyzes diverse map based works of painting collage film walking performance and digital drawing made in britain japan the netherlands ukraine the united states and the former soviet union arguing that together they challenge the dominant modern view of the world as a measurable and malleable geometrical space this challenge has strong political ramifications for it is on the basis of modernity s geometrical worldview that states have legislated over social space that capital has coordinated global markets and exploited distant environments and that powerful cartographic institutions have claimed exclusive authority in mapmaking mapping beyond measure breaks fresh ground in undertaking a series of close readings of significant map artworks in sustained dialogue with spatial theorists including peter sloterdijk zygmont bauman and michel de certeau in so doing ferdinand reveals how map art calls into question some of the central myths and narratives of

rupture through which modern space has traditionally been imagined and establishes map art's distinct value amid broader contemporary shifts toward digital mapping

The Greek and Roman Trophy 2018-03-12

in the greek and roman trophy from battlefield marker to icon of power kinnee presents the first monographic treatment of ancient trophies in sixty years the study spans archaic greece through the augustan principate kinnee aims to create a holistic view of this complex monument type by breaking down boundaries between the study of art history philology the history of warfare and the anthropology of religion and magic ultimately the kaleidoscopic picture that emerges is of an ad hoc anthropomorphic greek talisman that gradually developed into a sophisticated augustan sculptural or architectural statement of power the former a product of the hoplite phalanx disappeared from battlefields as the macedonian cavalry grew in importance shifting instead onto coins and into rhetoric where it became a statement of military might for their part the romans seem to have encountered the trophy as an icon on syracusan coinage recognizing its value as a statement of territorial ownership the romans spent two centuries honing the trophy concept into an empire building tool planted at key locations around the mediterranean to assert roman presence and dominance this volume covers a ubiquitous but poorly understood phenomenon and will therefore be instructive to upper level undergraduates graduate students and scholars in all fields of classical studies

Defining Hybrid Homeschools in America 2020-10-28

defining hybrid homeschools in america little platoons explores the idea of hybrid homeschools where students attend a formal school setting for part of the week and are homeschooled the rest of the week eric wearne observes that school choice in america typically comes in two forms programs set up for disadvantaged students and the more common form of choice that wealthy parents can exercise paying private tuition or moving to a more desirable school district while disadvantaged families in many places and wealthy families everywhere can exercise choice when it comes to schooling a sizeable group typically gets left out of those options the large number of families who are too wealthy to access state or local programs but not wealthy enough to pay for private schooling or moving expenses wearne argues that this is a long term weakness for school choice in america the middle class is generally a well off demographic but is almost completely unserved when it comes to this large aspect of their children s lives however one low cost option has arisen to address this niche hybrid home schools wearne cites existing research to argue for this model s efficacy for the middle class as a strong example of a healthy civil society and examines how policy definitions are breaking down and evolving in education as we challenge the existing definitions of schooling
