circulating cultures is an edited book about the transformation of cultural materials through the australian landscape the book explores cultural circulation exchange and transit through events such as the geographical movement of song series across the kimberley and arnhem land the transformation of australian aboriginal dance in the hands of an american choreographer and the indigenisation of symbolic meanings in heavy metal music circulating cultures crosses disciplinary boundaries with contributions from historians musicologists linguists and dance historians to depict shifts of cultural materials through time place and interventions from people it looks at the way indigenous and non indigenous performing arts have changed through intercultural influence and collaboration subduction is a major process that plays a first order role in the dynamics of the earth the sinking of cold lithosphere into the mantle is thought by many authors to be the most important source of energy for plates driving forces it also deeply modifies the thermal and chemical structure of the mantle producing arc volcanism and is responsible for the release of most of the seismic energy on earth there has been considerable achievements done during the past decades regarding the complex interactions between the various processes acting in subduction zones this volume contains a collection of contributions that were presented in june 2007 in montpellier france during a conference that gave a state of the art panorama and discussed the perspectives about subduction zone geodynamics the papers included in this special volume offer a unique multidisciplinary picture of the recent research on subduction zones geodynamics they are organized into five main topics subduction zone geodynamics seismic tomography and anisotropy great subduction zone earthquakes seismogenic zone characterization continental and ridge subduction processes each of the 13 papers collected in the present volume is primarily concerned with one of these topics however it is important to highlight that papers always treat more than one topic so that all are related lighting on different aspects of the complex and fascinating subduction zones geodynamics pcmag com is a leading authority on technology delivering labs based independent reviews of the latest products and services our expert industry analysis and practical solutions help you make better buying decisions and get more from technology explanations for sound change have traditionally focused on identifying the inception of change that is the identification of perturbations of the speech signal conditioned by physiological constraints on articulatory and or auditory mechanisms which affect the way speech sounds are analyzed by the listener while this emphasis on identifying the nature of intrinsic variation in speech has provided important insights into the origins of widely attested cross linguistic sound changes the nature of phonologization the transition from intrinsic phonetic variation to extrinsic phonological encoding remains largely unexplored this volume showcases the current state of the art in phonologization research bringing together work by leading scholars in sound change research from different disciplinary and scholarly traditions the authors investigate the progression of sound change from the perspectives of speech perception speech production phonology sociolinguistics language acquisition psycholinguistics computer science statistics and social and cognitive psychology the book highlights the fruitfulness of collaborative efforts among phonologists and specialists from neighbouring disciplines in seeking unified theoretical explanations for the origins of sound patterns in language as well as improved syntheses of synchronic and diachronic phonology proceedings of the iau symposium on coronal and stellar mass ejections for more than 40 years computerworld has been the leading source of technology news and information for it influencers worldwide computerworld s award winning site computerworld com twice monthly publication focused conference series and custom research form the hub of the world s largest global it media network pcmag com is a leading authority on technology delivering labs based independent reviews of the latest products and services our expert industry analysis and practical solutions help you make better buying decisions and get more from technology this book constitutes the proceedings of the 23rd international conference on speech and computer specom 2021 held in st petersburg russia in september 2021 the 74 papers presented were carefully reviewed and selected from 163 submissions the papers present current research in the area of computer speech processing including audio signal processing automatic speech recognition speaker recognition computational paralinguistics speech synthesis sign language and multimodal processing and speech and language resources due to the covid 19 pandemic specom 2021 was held as a hybrid event pcmag com is a leading authority on technology delivering labs based independent reviews of the latest products and services our expert industry analysis and practical solutions help you make better buying decisions and get more from technology in 1143 robert of ketton produced the first latin translation of the qur an this translation extant in 24 manuscripts was one of the main ways in which latin european readers had access to the muslim holy book yet it was not the only means of transmission of quranic stories and concepts to the latin world there were other medieval translations into latin of the qur an and of christian polemical texts composed in arabic which transmitted elements of the qur an often in a polemical mode the essays in this volume examine the range of medieval latin transmission of the qur an and reaction to the qur an by concentrating on the manuscript traditions of medieval qur an translations and anti islamic polemics in latin we see how the arabic text was transmitted and studied in medieval europe we examine the strategies of translators who struggled to find a proper vocabulary and syntax to render quranic terms into latin at times showing miscomprehensions of the text or willful distortions for polemical purposes these translations and interpretations by latin authors working primarily in twelfth and thirteenth century spain were the main sources of information about islam for european scholars until well into the sixteenth century when they were printed reused and commented this volume presents a key assessment of a crucial chapter in european understandings of islam
