The Building of It; A Pocket Guide and Manual on Construction by Walter J. Keith 1915 this work follows the 2021 curriculum of the association for computing machinery for specialists in data sciences with the aim of producing a manual that collects notions in a simplified form facilitating a personal training path starting from specialized skills in computer science or mathematics or statistics it has a bibliography with links to quality material but freely usable for your own training and contextual practical exercises second of a series of books it covers methodological aspects analysis and visualization it describes the crisp dm methodology the working phases the success criteria the languages and the environments that can be used the application libraries since this book uses orange for the application aspects its installation and widgets are described in visualization historical notes are made and next the book describes the characteristics of an effective visualization the types of messages that can be conveyed the grammar of graphics the use of a graph and a dashboard the software and libraries that can be used the role and use of color 55 types of graphs are then analyzed reporting meaning use examples and visual dimensions also with a vocabulary of graphs and summary tables examples are given in orange and the possible use of python with orange is explained visualization based inference is discussed exploratory and confirmatory analysis is defined and techniques are reported the book is accompanied by supporting material and it is possible to download the project samples in orange and sample data

Life Manual 2020-09-10 now available in paperback with a new preface and interview with jessica livingston about y combinator founders at work stories of startups early days is a collection of interviews with founders of famous technology companies about what happened in the very earliest days these people are celebrities now what was it like when they were just a couple friends with an idea founders like steve wozniak apple caterina fake flickr mitch kapor lotus max levchin paypal and sabeer bhatia hotmail tell you in their own words about their surprising and often very funny discoveries as they learned how to build a company where did they get the ideas that made them rich how did they convince investors to back them what went wrong and how did they

recover nearly all technical people have thought of one day starting or working for a startup for them this book is the closest you can come to being a fly on the wall at a successful startup to learn how it s done but ultimately these interviews are required reading for anyone who wants to understand business because startups are business reduced to its essence the reason their founders become rich is that startups do what businesses do create value more intensively than almost any other part of the economy how what are the secrets that make successful startups so insanely productive read this book and let the founders themselves tell you

The Congressional globe 1873 popular mechanics inspires instructs and influences readers to help them master the modern world whether it s practical diy home improvement tips gadgets and digital technology information on the newest cars or the latest breakthroughs in science pm is the ultimate guide to our high tech lifestyle
