Botanisches Bilderbuch für die Jugend und Freunde der Pflanzenkunde 1794 a memoir of a love affair with the forest and her native australia white beech is germaine greer s most personal book yet a powerful account of greer s attempt to reverse the calamitous environmental impact of australian history on one patch of land greer remains a winning funny indomitable figure throughout and it is fascinating to follow her as she works through so much of her messy complicated relationship with australia financial times one bright day in december 2001 sixty two year old germaine greer found herself confronted by an irresistible challenge in the shape of sixty hectares of dairy farm one of many in south east queensland that after a century of logging clearing and downright devastation had been abandoned to their fate she didn t think for a minute that by restoring the land she was saving the world she was in search of heart s ease beyond the acres of exotic pasture grass and soft weed and the impenetrable curtains of tangled lantana canes there were macadamias dangling their strings

of unripe nuts and black beans with red and yellow pea flowers growing on their branches and the few remaining white beeches stupendous trees up to forty metres in height logged out within forty years of the arrival of the first white settlers to have turned down even a faint chance of bringing them back to their old haunts would have been to succumb to despair once the process of rehabilitation had begun the chance proved to be a dead certainty when the first replanting shot up to make a forest and rare caterpillars turned up to feed on the leaves of the new young trees she knew beyond doubt that at least here biodepletion could be reversed greer describes herself as an old dog who succeeded in learning a load of new tricks inspired and rejuvenated by her passionate love of australia and of earth most exuberant of small planets

Primary Education 1895 any keen gardener would love this excellent book robin lane fox financial times carol klein is known for her no nonsense approach and inspires us to garden gardens illustrated in this invaluable book acclaimed plantswoman and bestselling author carol klein explains how to get the most from your garden by taking inspiration from what works in the wild be it in a meadow woodland hedgerow seaside or exposed setting carol encourages you to identify the conditions in your outdoor space for example the shady corner of an urban garden mimics the conditions of woodland or a windswept roof terrace will replicate an exposed hillside and to pick the plants that flourish in these conditions in each of the six chapters there are case study gardens that carol admires for the way their owners have worked with the natural habitat to glorious effect and each chapter ends with a directory of about 30 of carol s favourite plants for that habitat as ever carol s text is wise informative and beautifully written while photography by award winning jonathan buckley ensures that the book is also a visual treat
