the key to gaining nursing experience is to be alert to opportunities be willing to step out of your comfort zone explore 10 ways that improve your potential to be hired in the nursing position you want therefore this article aimed to explore and describe the experiences of nursing students clinical placement in phc settings and to formulate recommendations to support and strengthen students resilience during challenging situations patients and nurses experiences of caring in nursing an integrative literature review across clinical practices hynnekleiv 2024 journal of clinical nursing wiley online library journal of clinical nursing volume 33 issue 4 p 1233 1255 review open access seven themes emerged 1 being new is overwhelming even more so during covid 19 2 need to be flexible 3 pandemic knowledge and practice disconnect 4 communication barriers worsened with masks 5 being a covid nurse 6 no self care and 7 gratitude still glad to be a nurse the four themes of self development based on one s inner self fostering a positive attitude towards life developing personal strategies for overcoming adversity and building professionalism to become a better nurse illustrate that they want to improve their inner strength and develop themselves through self examination conclusion the findings are summarized in the following three themes 1 balancing harm and care 2 work overload affecting quality and 3 navigating in disagreement ethically difficult situations are evident across settings and in very diverse environments from neonatal care to caring for the older people five theme clusters emerged from the analysis 1 nurses struggling under the weight of dealing with infectious disease 2 challenges added to difficult caring 3 double suffering from patient care 4 support for caring and 5 expectations for post covid 19 life there are many ways that aspiring nurses can gain work experience in the field learning more about these methods could help you begin your nursing career in this article we explain 10 ways you can gain experience the benefits of nursing experience and the skills you can develop during your work experience to help your career since the human experience includes a vast range of behaviors emotions and thoughts we believe that when the patient experience improves the human experience will also improve 2 nurses are quite literally at the front lines of influencing both nursing related patient experience categories a refresher doi 10 1016 j nedt 2022 105517 abstract background historically attrition rates among nursing students in the united states have been a significant problem however beyond academic struggles little is known about the unsuccessful experiences of nursing students nursing students experiences need to meet students expectations students expectations and experiences should be intergrated to constructively support clinical learning abstract background clinical learning is an important component of nursing education that can support the development of competence pmid 35803653 doi 10 1016 j profnurs 2022 05 005 abstract background as the demand for qualified nurses increases nursing education prepares students for the complex healthcare setting nursing education focuses on academic success measures including licensure examination passage graduation rates and grade point average twelve studies using qualitative approach were identified that identified five major themes assessment cognitive skill affective student mentorship relation and clinical 21955 claire is a second year student nurse at birmingham city university in this blog she discusses her five favourite nursing experiences which she believes makes her profession as a nurse the best storytime best nursing experiences watch on play video claire shares her five favourite experiences from her time as a student nurse students experiences of distrust violence and heavy workload from patients and instructors hinder compassionate care hospital and nursing administrators need to foster a positive practice environment nursing instructors should be role models to promote compassionate care abstract nursing is a tough job the profession itself entails a lot of responsibilities dedication and hard work to get us through the day to day but things i like about nursing are the rewards no matter how small these may be petty and quirky but they never fail to bring a smile to a nurse s face 1 when you get a flash on a hard stick background due to the covid 19 pandemic many unexpected changes occurred in healthcare with the abrupt change to online education in 2020 nursing students experienced challenges with virtual learning which impacted their perception of preparedness to practice they work long shifts doing many of the tiny important tasks that keep us healthy everything from school nurses who fix booboos with band aids and send kids back to the playground to nurses in they experience firsthand a patient or family member s worries fears hopes and care goals they are patients best advocates fueled by empathy and compassion nurses don t just recognize the need to perfect the patient experience they encompass the heart felt desire to make it happen
